## Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q37-Q42):

### NEW QUESTION # 37

A financial institution has created a new policy that states the company will not send more than 500 emails per day. Which option allows you to implement the requirement?

- A. Applicability rules
- B. Outbound channel limits
- C. Volume constraints
- D. Suppression rules

**Answer: C**

Explanation:

Volume constraints allow you to limit the number of times an action is presented to customers across one or more channels. You can use volume constraints to implement a policy that restricts the number of emails sent per day. Outbound channel limits are used to limit the number of customers contacted per channel per run, not per day. Suppression rules are used to exclude customers from receiving an action based on certain conditions, such as opt-out preferences or recent purchases. Applicability rules are used to determine whether an action is relevant for a customer based on their profile or context, not based on the number of times the action is presented. Verified Reference: Certified Pega Decisioning Consultant | Pega Academy, Volume constraints

### NEW QUESTION # 38

In the following figure, a volume constraint uses the Return any action that does not exceed constraint mode with the three following action type constraints that have remaining limits:

- Maximum 50 Daily with Action: Protect Your Device, 5 remaining
- Maximum 75 Daily with Action: MyFone Buds, 7 remaining
- Maximum 25 Daily with Action: MyFone AirPods Pro, 0 remaining

A customer, CUST-01, qualifies for all the three actions. Given this scenario, how many actions does the system select for CUST-01 in the outbound run?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

### NEW QUESTION # 39

U+- Bank, a retail bank, has recently Implemented a project in which qualified customers see mortgage offers when they log in to

the web self-service portal.

Currently, only the customers who satisfy the following engagement policy conditions receive the Fifteen-year fixed-rate mortgage offer:

□ The bank decides to make two changes:

1. Update the suitability condition for the Fifteen-year fixed-rate mortgage offer.
2. Introduce a new offer, Twenty-year fixed-rate mortgage.

The following table shows the new engagement policy conditions for both mortgage offers:

□ What is the best practice to fulfill this change management requirement in the business operations environment?

- A. Create a single change request in the 1:1 Operations Manager portal.
- B. Create two change requests: one in the Pega Customer Decision Hub portal and the other in the 1:1 Operations Manager portal.
- C. Create a single change request in the Pega Customer Decision Hub portal.
- **D. Create two change requests in the 1:1 Operations Manager portal.**

**Answer: D**

#### NEW QUESTION # 40

In a decision strategy, you can use aggregation components to \_\_\_\_\_.

- **A. make calculations based upon a list of actions**
- B. filter actions based on priority and relevance
- C. choose between actions
- D. set a text value to a strategy property

**Answer: A**

Explanation:

Aggregation components are used to perform calculations on a list of actions, such as sum, average, count, minimum, or maximum. For example, you can use an aggregation component to calculate the total value of all the actions in a group. Verified References: Pega Academy - Decisioning Consultant - Aggregating actions

#### NEW QUESTION # 41

U+ Bank wants to send promotional emails related to credit card offers to their qualified customers. The business intends to use the same action flow template with the desired flow pattern for all the credit card actions.

What do you configure to implement this requirement?

- A. Output template
- B. Email treatment
- **C. Dynamic template**
- D. File template

**Answer: C**

Explanation:

To implement this requirement, you need to configure a dynamic template in Customer Decision Hub. A dynamic template is a type of template that allows you to define a common action flow pattern for a group of actions that share similar characteristics, such as channel, issue, or group. You can specify which properties and components are required for each action in the group, and how they are mapped to the action flow template. This way, you can reuse the same action flow template for all the credit card actions, while still allowing some variations in their content and configuration. Verified References: Pega Academy - Decisioning Consultant - Creating dynamic templates

#### NEW QUESTION # 42

.....

This confusion leads to choosing outdated material and ultimately failure in the test. The best way to avoid failure is using updated and real questions. PracticeVCE has come up with real Pegasystems PEGACPDC25V1 Questions for students so they can pass
