Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q25-Q30):

NEW QUESTION # 25

What is one trait of a servant leader?

- A. Deflects information that could change the team's work
- B. Solves problems on behalf of the team
- C. Persuades rather than using authority
- D. Determines the day-to-day activities for the team

Answer: C

Explanation:

According to the SAFe 6 Scrum Master documentation, one of the traits of a servant leader is to persuade rather than use authority. This means that the servant leader influences others by appealing to their values, beliefs, and interests, rather than by imposing their own will or position. By persuading rather than using authority, the servant leader fosters a culture of collaboration, empowerment, and trust, where team members are more likely to accept and welcome coaching, feedback, and change. Persuasion also helps the servant leader to align the team with the organization's vision, mission, and goals, and to create a shared understanding of the purpose and value of the work.
