## Quiz Microsoft - MS-721 - Collaboration Communications Systems Engineer Authoritative Exam Actual Tests

Our veteran professional generalize the most important points of questions easily tested in the MS-721 practice exam into our practice questions. Their professional work-skill paid off after our MS-721 training materials being acceptable by tens of thousands of exam candidates among the market. They have delicate perception of the MS-721 study quiz over ten years. So they are dependable. You will have a big future as long as you choose us!

## Microsoft Collaboration Communications Systems Engineer Sample Questions (Q271-Q276):

### NEW QUESTION # 271

You have a Microsoft Teams deployment.

You have two teams that have meeting room requirements as shown in the following table.

Name	Requirement
Human Resources	<ul style="list-style-type: none"><li>• Must support audio, video, and content sharing.</li><li>• Must support third-party video teleconferencing (VTC) devices.</li></ul>
Marketing	<ul style="list-style-type: none"><li>• Must support coordinated meetings that use Microsoft Surface Hub devices.</li><li>• Must support Direct Guest Join of third-party conference solutions.</li></ul>

You need to recommend a meeting room solution for the teams.

What should you include in the recommendation for each team? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Human Resources: Cloud Video Interop (CVI) [selected]  
Cloud Video Interop (CVI)  
Teams Rooms on Android  
Teams Rooms on Windows

Marketing: Cloud Video Interop (CVI) [selected]  
Cloud Video Interop (CVI)  
Teams Rooms on Android  
Teams Rooms on Windows

Answer:

Explanation:

**NEW QUESTION # 272**

Drag and Drop Question

You have a Microsoft Teams Phone deployment.

When you attempt to deploy a Session Border Controller (SBC) named sbc1.contoso.com, you receive the following error message:

"We can't use the "SBC1-Contoso.com" domain as it hasn't been set up in the organization. Try agaax. If you continue to have problems, contact Microsoft customer support."

You need to add the SBC to the tenant.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: From Microsoft 365 admin center, add and validate the contoso.com domain. Add a base domain to the tenant and verify it.

1. In the Microsoft 365 admin center, go to Setup > Domains > Add domain.

2. In the Enter a domain you own box, type the FQDN of the base domain. In the following example, the base domain is

customers.adatum.biz

3. Click Next.

4. If you add an FQDN that has not been verified before, you'll need to go through the process of verification.

5. Etc.

Step 2: From Microsoft 365 admin center, add a licensed user that has a UPN to the contoso.com domain.

Activate the domain name.

After you have registered a domain name, you need to activate it by adding at least one user with a Phone System license and assigning a SIP address with the FQDN portion of the SIP address matching the created base domain.

Step 3: From Microsoft 365 admin center, add the SBC as sbc1.contoso.com Add the FQDNs for the SBC. In this case sbc1.contoso.com

### NEW QUESTION # 273

Your company has a main office in New York and a branch office in Calgary. All offices connect to each other by using a dedicated WAN.

You have a Microsoft Teams Phone deployment.

You need to recommend a Direct Routing solution that meets the following requirements:

\* If a Session Border Controller (SBC) fails in the New York office, PSTN services must remain available through a local PSTN egress in New York. The Calgary office must prioritize a local PSTN egress and ensure that PSTN services remain available in the event of a local SBC outage.

\* The number of SBCs must be minimized.

What should you recommend for each office? To answer, drag the appropriate components to the correct offices. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

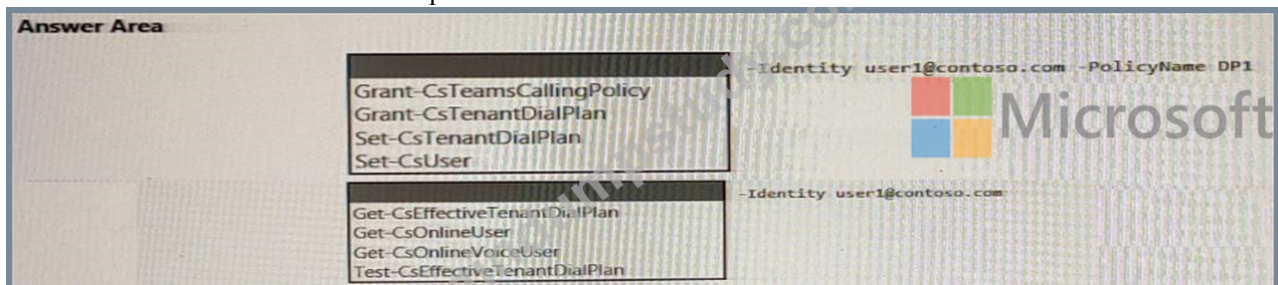

### NEW QUESTION # 274

You have a dial plan named DPI.

You need to assign DPI to a new Microsoft Teams user named User1. You must verify that the appropriate dial plan and the associated normalization rules are assigned to User1.

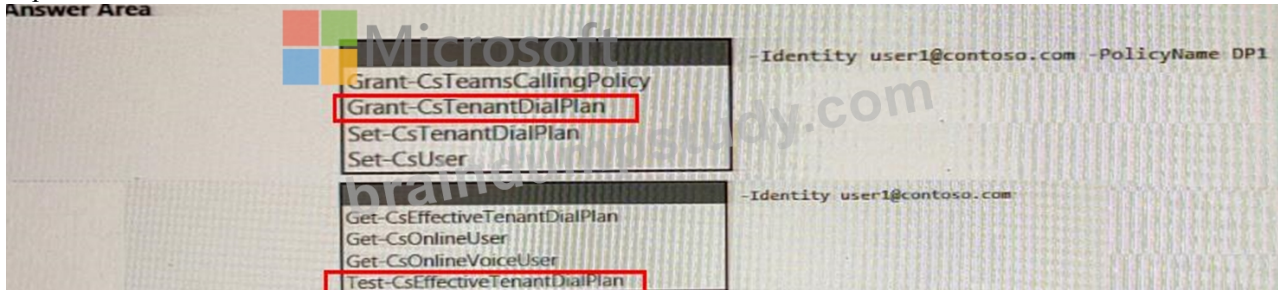

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/create-and-manage-dial-plans>

### NEW QUESTION # 275

You need to recommend network design changes that must be implemented before the Skype for Business Server to Microsoft Teams migration.

What should you recommend for the Vancouver facility users and the remote sale team users? To answer, drag the appropriate recommendation to the correct users. Each recommendation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

The screenshot shows an exam question interface. On the left, under 'Recommendations', there are five items:

- Decrease the NAT pool size.
- Implement VPN split tunneling.
- Deploy a local internet connection.
- Implement a web proxy server for media traffic.
- Force TCP instead of UDP for the media traffic of Teams.

On the right, under 'Answer Area', there are two input fields:

- Vancouver facility users: [ ]
- Remote users: [ ]

The Microsoft logo is visible in the bottom right corner.

Answer:

Explanation:

This screenshot shows the same exam question interface as above, but with the following recommendations dragged to the answer area:

- 'Deploy a local internet connection.' is dragged to the 'Vancouver facility users' field.
- 'Implement a web proxy server for media traffic.' is dragged to the 'Remote users' field.

Explanation:

This screenshot shows the final correct answer for the question. The 'Vancouver facility users' field contains 'Deploy a local internet connection.' and the 'Remote users' field contains 'Implement a web proxy server for media traffic.'

### Topic 2, Litware Case Study 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference into rm. it ion that is provided in the case study. Case

studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

#### Overview

Litware, Inc. is an online retailer.

Litware is replacing its telephony platform with Microsoft Teams Phone.

Currently, all users are assigned Microsoft 365 E3 licenses.

#### Telephony Environment

The existing telecommunications system has several third-party IP-PBXes at the corporate and warehouse sites. Currently, the PBXes are linked through the corporate WAN and an inter-office dial plan is in place.

A unique PSTN direct inward dial (DID) is assigned to each user. The last five digits of each DID are used as an extension.

Litware piloted Microsoft Skype for Business Server Enterprise Voice, but has since decided to migrate directly to Teams Phone.

During the pilot, a response group was created, and the response group is still in use.

Agents in the response group use Skype for Business Server-certified handsets.

#### Locations

Litware has global retail stores and datacenters.

The telephony topology contains the following four types of sites:

##### Corporate sites

The corporate sites contain information workers who collaborate by using the Teams desktop client and SharePoint Online.

The reception desk at each corporate site has an analog intercom with an integrated door control. Each intercom connects to an existing PBX by using an FXS Analog Telephony Adapter (ATA).

SIP trunks are delivered directly to the site by using a resilient WAN that connects directly to the on-site PBX solution.

##### Warehouse sites

The warehouse sites are critical to the business. Users at these sites use either the Teams desktop client or the Teams mobile client.

Each warehouse has a public announcement (PA) system that connects to the PBX by using a SIP ATA along with the sites' existing ISDN trunks.

Currently, users at the company's warehouse in Georgia can call the PA system by dialing 123456.

All calls to emergency services from the warehouses are played over the warehouses' PA system automatically.

WAN connectivity at the warehouses can be unreliable, so local PSTN connectivity is preferred as compared to centrally hosted connectivity.

##### Retail sites

Each retail site has only one or two desk phones and a specialized point of sale (POS) computer that cannot run the desktop or web versions of the Teams client. Users at the retail sites have the Teams app and an associated data plan installed on their mobile device.

Currently, each retail site uses a managed SD-WAN appliance to connect to both the internet and the corporate WAN. The users report that in the event of an internet outage at the retail sites, they can use their mobile devices, which have strong reception.

#### Planned Changes

Litware plans to implement the following changes:

- \* Maintain the existing emergency call PA integration.
- \* Replace the existing IP-PBX solutions by using Teams Phone.
- \* Consolidate all its PSTN trunks by using region-specific datacenters, wherever possible.

During the planned deployment of Teams Phone, Litware will open a new retail site in the United Kingdom that will have five users.

Litware does not have any existing telephony in the United Kingdom. Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.

You are opening a new warehouse site in Melbourne. The new warehouse will connect to a phone carrier by using a Session Border Controller (SBC). Dialing rules are an area code of two digits beginning with a zero followed by a subscriber number of eight digits. For example, an E.164 number of +61370105550 will be translated to 03 7010 5550, and +6125505550 will be translated to 02 5550 5550.

#### Technical Requirements

Litware identifies the following technical requirements:

- Minimize the amount of voice traffic over the WAN.
- Whenever possible, use natively supported Teams solutions.
- \* Avoid replacing existing analog device adapters and SIP phones.
- \* Assign a Microsoft 365 Phone System license to all the users listed in a CSV file.
- \* Ensure that the retail sites can place and receive calls in the event of a WAN failure.
- \* Assign a phone number of +61370105550 to a user named User1. User1 is located at a corporate site.

- \* Ensure that the warehouse sites maintain calling in the event of an internet outage or Teams service failure.
- \* Provide users at the United Kingdom retail site with phone numbers. The users must only be allowed to make in-country calls.
- \* Replace the response group from the Skype for Business Server Voice Enterprise pilot with a call queue. The agents must be able to use their existing handset.

## NEW QUESTION # 276

.....

Unlike other question banks that are available on the market, our MS-721 guide dumps specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. This greatly improves the students' availability of fragmented time. You can choose the version of MS-721 Learning Materials according to your interests and habits. And if you buy all of the three versions, the price is quite preferential and you can enjoy all of the MS-721 study experiences.
