It is designed for Product Owners, Product Managers, Business Analysts, and anyone else who is responsible for maximizing the value of a product or service. Professional Scrum Product Owner II certification is offered by Scrum.org, a leading provider of Scrum training and certification programs.

Scrum Professional Scrum Product Owner II Sample Questions (Q73-Q78):

NEW QUESTION # 73

When the Product Owner is too busy to work with all of the teams in a multi-team product development effort, which strategy will help them?

(choose the best answer)

- A. Enlist the Program Management Office to help coordinate work.
- **B. Communicate a clear Product Goal and delegate some activities to the Developers.**
- C. Assign sub-Product Owners to each Scrum Team.
- D. Add component team Product Owners.
- E. All of the above.

Answer: B

Explanation:

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. They are also accountable for effective Product Backlog management, which includes clearly expressing Product Backlog items, ordering them to best achieve goals and missions, ensuring that the Product Backlog is transparent, visible and understood. The Product Owner may do the above work or may delegate the responsibility to others. However, the Product Owner remains accountable¹. When working with multiple Scrum Teams on the same product, the Product Owner should ensure that there is a shared understanding of the Product Goal among all the teams and stakeholders. The Product Goal is the long-term objective for the Scrum Team. They must fulfill (or abandon) one objective before taking on the next². The Product Owner should also collaborate with the Developers to create and refine Product Backlog items that are valuable, feasible, and testable. The Developers are accountable for creating a plan for the Sprint, the Sprint Backlog¹. The Product Owner should trust the Developers to self-organize and deliver the most valuable increments possible.

The other options are not recommended strategies for the Product Owner, as they may introduce unnecessary complexity, confusion, and waste. Adding component team Product Owners, enlisting the Program Management Office, or assigning sub-Product Owners may create silos, dependencies, and conflicts among the teams and stakeholders. These roles may also undermine the authority and accountability of the Product Owner, and reduce the transparency and alignment of the Product Backlog. The Product Owner should work with the Scrum Master and the Developers to find ways to optimize the value delivery and collaboration across the teams, rather than creating intermediaries or proxies³⁴. Reference: 1: Scrum Guide 2: Understanding and Applying the Scrum Framework 3: Managing Products with Agility 4: Evolving the Agile Organization

NEW QUESTION # 74

What is an effective Product Vision? (choose the best answer)

- **A. It inspires the people who deliver the product.**
- B. None of the above
- C. It is approved by all stakeholders.
- D. All of the above
- E. It forms a contract with the business.

Answer: A

NEW QUESTION # 75

Management wants to understand whether a team is effective.

Which of the following measures will help them understand the team's performance? (choose the best answer)

- A. The change in customer satisfaction measured over time.
- B. The team's ability to meet schedule release dates.
- C. The team's planned versus actual budget performance.
- D. All of the above.

Answer: A

NEW QUESTION # 76

What typically happens if Product Backlog items are not sufficiently clear during Sprint Planning?
(choose the best answer)

- A. Nothing in particular.
- B. Nothing, so long as the Product Owner gives the Developers a clear Sprint Goal.
- C. The Developers will have difficulty creating a forecast of work for the Sprint.
- D. The meeting is cancelled so refinement can be done first.
- E. The Scrum Master should not allow this to happen. Look for a new Scrum Master and re-start the Sprint.

Answer: C

Explanation:

If Product Backlog items are not sufficiently clear during Sprint Planning, the Developers will typically have difficulty creating a forecast of work for the Sprint (B). This is because the clarity of the Product Backlog items is crucial for the Developers to understand what is expected and to plan their work accordingly. The Scrum framework emphasizes the importance of a well-refined Product Backlog for effective Sprint Planning

NEW QUESTION # 77

The timebox for the Sprint Review is:
(choose the best answer)

- A. 15 minutes.
- B. At the end of every Sprint.
- C. Any length of time needed.
- D. 4 hours for a 4-week Sprint. Usually shorter for shorter Sprints.

Answer: D

Explanation:

D is correct because the timebox for the Sprint Review is four hours or less for a one-month Sprint, and usually shorter for shorter Sprints¹. The Sprint Review is an event where the Scrum Team and the stakeholders inspect the outcome of the Sprint and collaborate on what to do next¹. A is incorrect because the Sprint Review is not an open-ended event, but a timeboxed one that respects the attendees' time and ensures productivity². B is incorrect because the Sprint Review is not a point in time, but a timeboxed event that has a specific purpose and agenda¹. C is incorrect because the Sprint Review is not the same as the Daily Scrum, which is a 15-minute event for the Developers to synchronize their work¹.
