### PECB QMS ISO 9001:2015 Lead Auditor Exam Sample Questions (Q133-Q138):

#### NEW QUESTION # 133

You are carrying out an audit at a single-site organisation seeking certification to ISO 9001 for the first time.

The organisation manufactures cosmetics for major retailers.

You are interviewing the Manufacturing Manager (MM).

You: "I would like to begin by looking at the cleaning controls."

MM: "We record the cleaning of the equipment at the end of every batch. This document details the minimum cleaning frequency and the procedures to follow for all areas and each item of equipment. The person who carries out the cleaning puts their initial on the document and records the time and date alongside." Narrative: You sample production records over 3-days and note down evidence of nonconformity as per the table below.

Date	Batches of product made	Production line to be cleaned	Cleaned by	Number of cleaning records
10/XX	10	Line 1	DS	6
	14	Line 2	HM	8
11/XX	12	Line 1	WR	7
	12	Line 2	DD	9
12/XX	15	Line 1	DS	10

PECB

You decide to raise a nonconformity.

# PECB

Nonconformity report	
ISO 9001 Clause Number:	
Nature of problem:	
ISO 9001 requirement that has not been fulfilled:	
Evidence:	40 cleaning records are available for 63 batches.

To complete the nonconformity report click on the blank section you want to complete so it is highlighted in red and then click on the applicable text from the options below. Alternatively, you may drag and drop the options to the appropriate blank section.

**ISO 9001** - "The organization shall implement production provision under controlled conditions."

8.5.4

Cleaning and sanitising not always completed.

Cleaning and sanitising are not always completed by trained staff.

**ISO 9001** - "The organization shall preserve the outputs during production provision to the extent necessary to ensure conformity to requirements."

**ISO 9001** - "The organization shall implement planned arrangements, at appropriate stages, to verify that the product requirements have been met."

8.7

Cleaning and sanitising records are not available for every batch.

6.2.1

**Answer:**

**Explanation:**

you decide to raise a nonconformity.

#### NEW QUESTION # 134

Which one of the following options is the definition of the context of an organisation?

- A. Comparison of internal and external issues that can have an effect on an organisation's desire to achieve its objectives.
- **B. Combination of internal and external issues that can have an effect on an organisation's approach to developing and achieving its objectives.**
- C. Coordination of internal and external issues that can have a positive or negative effect on an organisation's success.
- D. Complexity of internal and external issues that can have an effect on an organisation's approach to developing and achieving its purpose.

**Answer: B**

Explanation:

Understanding "Context of the Organization":

The term "context of the organization" is defined in ISO 9001:2015 Clause 4.1, which states:

"The organization shall determine external and internal issues that are relevant to its purpose and its strategic direction and that affect its ability to achieve the intended result(s) of its quality management system."

The definition emphasizes identifying both internal and external issues that influence the organization's approach to developing and achieving its objectives.

Option Analysis:

\* Option A: Correct. This option aligns with the standard definition as it explicitly mentions the combination of internal and external issues that affect the organization's approach to achieving its objectives, which is the essence of Clause 4.1.

\* Option B: Incorrect. The term "comparison of internal and external issues" does not reflect the ISO 9001 requirements. The standard does not require a comparison but rather an understanding of these issues.

\* Option C: Incorrect. Although it mentions "complexity," the focus of ISO 9001:2015 is on identifying relevant issues rather than the complexity of those issues.

\* Option D: Incorrect. This option mentions "coordination" and focuses only on the positive or negative effects. ISO 9001 requires identifying issues but does not emphasize coordination.

Clause Reference and Relevance:

ISO 9001:2015 requires organizations to understand their context because internal and external factors can influence the Quality Management System's effectiveness. Understanding this context helps in:

\* Addressing risks and opportunities (Clause 6.1).

\* Aligning the QMS with the organization's strategic direction.

Why A is Correct:

"Combination of internal and external issues" captures the essence of Clause 4.1, making it the accurate definition of the context of the organization.

#### NEW QUESTION # 135

What competence, among others, should each audit team member have?

- A. A formal degree in quality management.

- B. Expertise in each domain to be audited.
- **C. Knowledge of the risk-based approach to auditing.**
- D. Knowledge of the industry in which the auditee operates.

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Auditors must have competence in risk-based auditing to effectively assess an organization's QMS performance and compliance.

Clause References:

\* ISO 19011:2018, Clause 7.2.3 - Determining Auditor Competence:

\* Auditors must have knowledge of risk-based thinking to assess risk impact on processes.

\* ISO 9001:2015, Clause 0.3.3 - Risk-Based Thinking:

\* The standard emphasizes proactive risk management, which auditors must understand.

Why is the Correct Answer B?

\* Risk-based auditing ensures audits focus on high-risk areas, improving audit effectiveness.

\* Auditors must assess how organizations apply risk-based thinking in decision-making, process control, and improvement.

Why are the Other Options Incorrect?

\* A (Industry knowledge) # While helpful, it is not mandatory for all auditors.

\* C (Expertise in all domains) # Auditors are not required to be experts in all areas, just in audit methodology.

\* D (Formal degree in quality management) # ISO does not require a formal degree, just competence in audit principles and methods.

## NEW QUESTION # 136

Scenario 4:

TD Advertising is a print management company based in Chicago. The company offers design services, digital printing, storage, and distribution. As TD expanded, its management recognized that success depended on adopting new technologies and improving quality.

To ensure customer satisfaction and quality improvement, the company decided to pursue ISO 9001 certification.

After implementing the QMS, TD hired a well-known certification body for an audit. Anne Key was appointed as the audit team leader. She received a document listing the audit team members, audit scope, criteria, duration, and audit engagement limits.

Anne reviewed the document and approved the audit mandate. The certification body and TD's top management signed the certification agreement.

Before contacting TD, Anne reviewed the audit scope and noticed that TD made changes to it due to the adoption of new printing equipment. However, Anne disagreed with the changes, stating they would affect the audit timeline. She considered withdrawing from the audit.

In scenario 4, the audit team determined the audit feasibility by considering only the resources available for the audit. Is this acceptable?

- **A. No, because other factors should be considered when determining the audit feasibility, such as information needed to plan the audit, the cooperation of the auditee, duration of the audit, etc.**
- B. No, the audit feasibility should be determined by TD's top management.
- C. Yes, considering only the resources available for the audit is sufficient for determining the audit feasibility.
- D. Yes, because the audit team leader has final authority over audit feasibility.

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

An audit's feasibility must be assessed using multiple factors, not just resource availability.

Clause References:

\* ISO 19011:2018, Clause 5.3 - Establishing the Audit Program: Requires consideration of logistical, technical, and cooperation factors when assessing audit feasibility.

\* ISO/IEC 17021-1:2015, Clause 9.1.3 - Determining Feasibility of the Audit: Requires evaluating more than just resources to ensure a successful audit.

Why is the Correct Answer B?

\* Audit feasibility should consider:

\* Availability of information (documents, records).

\* Cooperation from the auditee.

\* Operational conditions that might affect the audit.

\* Scope and complexity of the QMS being audited.

\* Resource availability alone is not enough to determine feasibility.

Why are the Other Options Incorrect?

\* A (Top management determines feasibility) # Incorrect because feasibility is determined by the certification body, not the auditee.

\* C (Resources alone are sufficient) # Incorrect because other key factors must be evaluated.

\* D (Final authority lies with the audit leader) # Incorrect because ISO requires multiple factors to be considered, not just an auditor's decision.

Reference:

ISO 19011:2018, Clause 5.3 - Establishing the Audit Program

ISO/IEC 17021-1:2015, Clause 9.1.3 - Determining Feasibility of the Audit

## NEW QUESTION # 137

Scenario 4:

TD Advertising is a print management company based in Chicago. The company offers design services, digital printing, storage, and distribution. As TD expanded, its management recognized that success depended on adopting new technologies and improving quality.

To ensure customer satisfaction and quality improvement, the company decided to pursue ISO 9001 certification.

After implementing the QMS, TD hired a well-known certification body for an audit. Anne Key was appointed as the audit team leader. She received a document listing the audit team members, audit scope, criteria, duration, and audit engagement limits.

Anne reviewed the document and approved the audit mandate. The certification body and TD's top management signed the certification agreement.

Before contacting TD, Anne reviewed the audit scope and noticed that TD made changes to it due to the adoption of new printing equipment. However, Anne disagreed with the changes, stating they would affect the audit timeline. She considered withdrawing from the audit.

The audit team members were selected based on their knowledge of the legal and other regulations that TD is subject to. Is this acceptable?

- A. Yes, but only the lead auditor needs to have knowledge of legal and other regulatory requirements.
- **B. Yes, to ensure effective conduct of the audit, each audit team member should have knowledge of legal and other requirements that TD is subject to.**
- C. No, because only one audit team member is required to have knowledge of legal and other regulatory requirements that TD is subject to.
- D. No, because there is no need to have knowledge of the legal and other requirements that TD is subject to.

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

ISO 9001:2015 requires organizations to ensure that auditors have the necessary competence and knowledge to conduct audits effectively.

Clause References:

\* ISO 19011:2018, Clause 7.2.1 - Determining Competence of Auditors: Auditors must have knowledge of applicable legal and regulatory requirements that affect the scope of the audit.

\* ISO/IEC 17021-1:2015, Clause 7.1.2 - Competence Requirements: Certification bodies must ensure that auditors assigned to the audit team possess relevant knowledge in areas such as legal and regulatory compliance.

Why is the Correct Answer C?

\* Each audit team member should have sufficient knowledge of relevant legal and regulatory requirements to ensure compliance.

\* This helps auditors identify gaps or nonconformities related to compliance obligations.

\* Having multiple team members with knowledge reduces reliance on a single expert and ensures a comprehensive assessment.

Why are the Other Options Incorrect?

\* A (Only one team member needs knowledge) # Incorrect because audits involve various aspects, and all auditors should have basic awareness of legal and regulatory requirements.

\* B (Legal knowledge is not necessary) # Incorrect because compliance is essential for QMS effectiveness.

\* D (Only the lead auditor needs legal knowledge) # Incorrect because ISO requires all auditors to be competent in applicable laws, not just the leader.

## NEW QUESTION # 138

.....

All the IT professionals are familiar with the PECB ISO-9001-Lead-Auditor exam. And all of you dream of owning the most demanding certification.
