CIS-Discovery Vce Torrent, Valid CIS-Discovery Test Cost

In a knowledge-based job market, learning is your quickest pathway, your best investment. Knowledge is wealth. Modern society needs solid foundation, broad knowledge, and comprehensive quality of compound talents. Our CIS-Discovery certification materials can help you transfer into a versatile talent. Many job seekers have successfully realized financial freedom with the assistance of our CIS-Discovery test training. All your dreams will be fully realized after you have obtained the CIS-Discovery certificate. Finding a good paying job is available for you. Good chances are few. Please follow your heart.

Becoming a Certified Implementation Specialist in Discovery can help individuals advance their careers by demonstrating their expertise in implementing and configuring ServiceNow Discovery solutions. It can also provide employers with confidence that their employees are knowledgeable and skilled in implementing and managing ServiceNow Discovery, helping to ensure the success of their ServiceNow platform deployment.

The CIS-Discovery Exam is a proctored exam that consists of 60 multiple-choice questions. Candidates have 90 minutes to complete the exam, and a passing score of 70% is required to earn the certification. CIS-Discovery exam covers topics such as Discovery architecture, configuration, and troubleshooting. It also covers topics such as MID server installation, mapping, and data sources.

Valid CIS-Discovery Test Cost & Reliable CIS-Discovery Dumps Ebook

In order to help all people to pass the CIS-Discovery exam and get the related certification in a short time, we designed the three different versions of the CIS-Discovery study materials. We can promise that the products can try to simulate the real examination for all people to learn and test at same time and it provide a good environment for learn shortcoming in study course. If you buy and use the CIS-Discovery study materials from our company, you can complete the practice tests in a timed environment, receive grades and review test answers via video tutorials. You just need to download the software version of our CIS-Discovery Study Materials after you buy our study materials. You will have the right to start to try to simulate the real examination. We believe that the CIS-Discovery study materials from our company will not let you down.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q68-Q73):

NEW QUESTION # 68
A network device has both an SSH port and an SNMP port open. Discovery tries the SSH probe first and it fails. This triggers the SNMP probe, which succeeds. Discovery uses SNMP first for subsequent discoveries on that device.
What discovery functionality allows the above to happen?

- A. MID Server affinity
- B. IP service affinity
- C. Classification
- D. Credential affinity

Answer: B

NEW QUESTION # 69
Which of the below choices are needed for Quick Discovery? (Choose two.)

- A. PID
- B. MID Server
- C. Target IP
- D. Discovery Schedule

Answer: B,D

NEW QUESTION # 70
What entry point type must a horizontal pattern have to execute from a process classifier?

- A. It does not matter, it is triggered for all entry point types.
- B. HTTP(S) entry point type if the pattern is running on a web server application.
- C. TCP entry point type or ALL entry point type.
- D. A subnet entry point type.

Answer: C

Explanation:
A horizontal pattern must have a TCP entry point type or an ALL entry point type to execute from a process classifier. A process classifier is a rule that matches a process running on a host and triggers a horizontal pattern to discover the application associated with that process1. The entry point type determines the type of connection that the pattern uses to access the target host. A TCP entry point type means that the pattern uses a TCP port to connect to the host, while an ALL entry point type means that the pattern can use any available connection method2.

NEW QUESTION # 71

Which of the following executes the osquery commands on agents to gather attribute details from a CI?

- A. ACC for Discovery
- B. Agent Collector
- C. Agent listener
- D. Policies
- E. Check Definitions

Answer: B

Explanation:

Agent Collector is the component that executes the osquery commands on agents to gather attribute details from a CI. Agent Collector is a feature of the Agent Client Collector (ACC) for Discovery, which is an integration that enables ServiceNow Discovery to use osquery to collect data from Linux and Windows devices that have the Elastic Agent installed1. Agent Collector allows you to define osquery queries and assign them to policies that target specific devices or groups of devices2. Agent Collector then runs the queries on the agents and sends the results back to the instance, where they are processed by the Agent Listener and stored in the CMDB3.

NEW QUESTION # 72

A Discovery Schedule contains a /24 subnet IP Range and a Shazzam batch size of 5000. How many times will a Shazzam probe be launched during discovery?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

A /24 subnet IP Range means that there are 256 possible IP addresses in the range, from 0 to 255. A Shazzam batch size of 5000 means that Discovery will send 5000 ICMP packets at a time to scan the IP addresses.
Therefore, Discovery will launch the Shazzam probe once for every 5000 IP addresses in the range, or 256 /
5000 = 0.0512 times. Since the number of times must be an integer, Discovery will round up to 1 and launch the Shazzam probe once. However, since the Shazzam probe is launched for each MID Server that is assigned to the Discovery Schedule, the actual number of times will depend on how many MID Servers are available. If there are N MID Servers, then the Shazzam probe will be launched N times, each sending 5000 ICMP packets to the same IP range. Therefore, the total number of times that the Shazzam probe will be launched during discovery is N * 1 = N.
