# Apple DEP-2025 Dumps Download - DEP-2025 Test Questions Pdf

Exam    :    **DEP-2025**

Title    :    Apple Deployment and Management Exam

https://www.passcert.com/DEP-2025.html

What's more, part of that FreeCram DEP-2025 dumps now are free: https://drive.google.com/open?id=1KoiN8sLTfut940UoMupxNfcHmL5q86qD

Are you looking for valid IT exam materials or study guide? You can try our free Apple DEP-2025 new exam collection materials. We offer free demo download for our PDF version. You can know several questions of the real test. It can make you master fundamental knowledge quickly. Our DEP-2025 new exam collection materials are authorized legal products. Our accuracy is nearly 100% pass which will help you clear exam.

## Apple DEP-2025 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
| Topic 1 | • Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality. |
| Topic 2 | • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools. |

| Topic 3 | • Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices. |
|---|---|
| Topic 4 | • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed. |
| Topic 5 | • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments. |
| Topic 6 | • Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes. |
| Topic 7 | • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager. |
| Topic 8 | • Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage. |
| Topic 9 | • Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements. |

# DEP-2025 Test Questions Pdf - DEP-2025 100% Correct Answers

Our DEP-2025 guide torrent through the analysis of each subject research, found that there are a lot of hidden rules worth exploring, this is very necessary, at the same time, our DEP-2025 training materials have a super dream team of experts, so you can strictly control the proposition trend every year. In the annual examination questions, our DEP-2025 study questions have the corresponding rules to summarize, and can accurately predict this year's test hot spot and the proposition direction. This allows the user to prepare for the DEP-2025 test full of confidence.

## Apple Deployment and Management Exam Sample Questions (Q144-Q149):

**NEW QUESTION # 144**
Which feature allows IT administrators to manage Wi-Fi settings on a device?

- A. Find My
- <span style="color:red">B. Configuration profiles</span>
- C. iCloud
- D. MDM

**Answer: B**

Explanation:
Configuration profiles enable IT administrators to manage Wi-Fi settings on a device, such as preconfiguring network SSIDs, passwords, and security protocols (e.g., WPA2 Enterprise). These profiles are deployed via MDM or manually, ensuring devices connect to approved networks. Find My (option B) and iCloud (option C) are unrelated to Wi-Fi management. MDM (option D) is the delivery mechanism, but the profiles define the settings. The Apple Platform Deployment Guide details Wi-Fi configuration via profiles.
Reference: Apple Platform Deployment Guide (Chapter: Configuration Profiles).

**NEW QUESTION # 145**
What's required to use content caching on a Mac?

- A. Supervision
- B. An MDM solution
- C. A VPN configuration
- D. macOS 10.13 or later

**Answer: D**

Explanation:
Content caching requires a Mac running macOS 10.13 (High Sierra) or later, enabling it to cache content like app updates and iCloud data for network efficiency. An MDM solution (option A) can manage caching settings but isn't required to enable it. Supervision (option C) is unrelated, as caching is a macOS feature, not a supervision requirement. A VPN configuration (option D) doesn't apply. The Apple Platform Deployment Guide specifies the macOS version requirement for content caching.

**NEW QUESTION # 146**
You deploy an app to a supervised Apple device that already has the app installed as unmanaged. Using your organization's MDM, you convert unmanaged apps to managed. What's the expected behavior?

- A. The unmanaged app asks the user to convert it to managed.
- B. The unmanaged app is removed and the managed app is installed.
- C. The unmanaged app converts to managed and sends a notification.
- D. The unmanaged app converts to managed without user interaction.

**Answer: D**

Explanation:
Apple's MDM framework allows organizations to take ownership of apps that users may have installed manually. This process is calledconverting unmanaged apps to managed. When an administrator deploys the same app via MDM to a supervised device, Apple documentation specifies that the system silently converts the app to a managed state. No user interaction is required, and the existing app data remains intact. This avoids disruption while still giving the organization control over the app, including the ability to configure settings, update it, or remove it remotely. Options like requiring user approval or uninstalling the app are not part of the standard workflow; Apple designed the feature to ensure seamless transition for end users while granting IT management authority. References:Apple Platform Deployment - "Managing apps: Convert unmanaged apps to managed."

**NEW QUESTION # 147**
A user forgot their password for their organization-owned Mac. Their Mac has FileVault turned on, and the key is escrowed to the MDM solution. What can the user use in macOS Recovery to reset their password?

- A. Personal recovery key
- B. Secure token
- C. Institutional recovery key
- D. Bootstrap token

**Answer: A**

Explanation:
The personal recovery key resets passwords. The macOS Security Overview states, "With FileVault enabled and the personal recovery key escrowed to MDM, users can use it in macOS Recovery to reset their password." Reference:
macOS Security Overview, "FileVault Recovery" section.
Apple Platform Deployment Guide, "Password Recovery" section.

**NEW QUESTION # 148**
Which feature allows IT administrators to manage iCloud settings on a device?

- A. Find My
- B. Configuration profiles
- C. iCloud Backup
- D. MDM

**Answer: B**

Explanation:
Configuration profiles allow IT administrators to manage iCloud settings on a device, such as enabling
/disabling iCloud Drive, restricting backups, or limiting document sync. These profiles are deployed via MDM or manually, providing granular control over iCloud features. Find My (option B) is a user-facing tracking feature, not a management tool. iCloud Backup (option C) is a specific iCloud service, not a management feature. MDM (option D) is the system that deploys profiles, but the profiles themselves contain the settings. The Apple Platform Deployment Guide details configuration profiles' role in iCloud management.
Reference: Apple Platform Deployment Guide (Chapter: Configuration Profiles).

**NEW QUESTION # 149**
......

It is compatible with Windows computers and comes with a complete support team to manage any issues that may arise. By using the Apple Deployment and Management Exam (DEP-2025) practice exam software, you can reduce the risk of failing in the actual DEP-2025 Exam. So, if you're looking for a reliable and effective way to prepare for your DEP-2025 exam, FreeCram is the best option.
