You will master the most practical knowledge in the shortest possible time. It is also very easy if you want to get the EMT certificate. As long as you buy our EMT study braindumps and practice step by step, you are bound to pass the exam.

Following are the requirements of Test Prep EMT Exam

Candidates for national emergency medical technician certification must meet the following requirements:

- Successful completion of a state-approved State Medical Technician (EMT) course that meets or exceeds the National Emergency Medical Service training standards for the emergency technician.
- Candidate must have completed the course in the last 2 years & the course director needs to verify the success of the course on the National Registry website.
- Have a current CPR-BLS for "healthcare provider" or equivalent credentials.
- Pass state-approved cognitive (knowledge) and psychomotor (skills) tests.
- The successful parts of the cognitive and psychomotor exam remain valid for 24 months. For candidates whose course completion date is before November 1, 2018, the valid parts of each exam are valid for 12 months. Provided all other entry

conditions are met.

NREMT Emergency Medical Technicians Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

A law enforcement officer requests that you place the clothes from a sexual assault victim in a bag for transport to the hospital. Which type of bag should you use?

- A. Cloth
- B. Plastic
- C. Polypropylene
- **D. Paper**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In cases of sexual assault, preserving evidence integrity is critical. Clothing or other forensic evidence must be placed in paper bags. Plastic or non-breathable materials can trap moisture, promoting mold or degradation of evidence like DNA or bodily fluids.

This approach follows chain-of-custody protocols used by law enforcement and medical facilities for handling forensic material.

NEW QUESTION # 12

An infectious disease spread by the fecal-oral route that is considered an acute infection with a currently available vaccine is

- **A. Hepatitis A**
- B. Hepatitis C
- C. Hepatitis E
- D. Hepatitis B

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Hepatitis A is transmitted primarily via the fecal-oral route, often through contaminated food or water. It leads to an acute liver infection, not a chronic condition. Unlike Hepatitis C, which has no vaccine, Hepatitis A has an effective vaccine and is preventable with proper hygiene and immunization.

Hepatitis B is spread through blood and sexual contact, not fecal-oral. Hepatitis E is also fecal-oral but is rare in the U.S. and doesn't have a widely used vaccine.

NEW QUESTION # 13

In order for a plaintiff to recover damages in a lawsuit against an EMT, there must be a duty to perform, breach of duty, damage, and

- **A. Proximate causation**
- B. Malfeasance
- C. Contributory neglect
- D. Abandonment

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To establish negligence, four legal elements must be proven:

- * Duty to act- a legal obligation to provide care.
- * Breach of duty- failing to meet the standard of care.
- * Damages- harm occurred.
- * Proximate causation- the breach directly caused the damage.

"Proximate causation" means the EMT's action or inaction is closely linked to the harm suffered by the patient.

NEW QUESTION # 14

Through which of the following routes is hepatitis A transmitted?

- A. Blood
- B. Saliva
- C. Fecal
- D. Urine

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Hepatitis A virus is transmitted exclusively via the fecal-oral route. Ingesting contaminated food or water allows the virus to enter the digestive tract, infecting liver cells. It's often spread through poor hand hygiene or unsanitary food handling.

It is not bloodborne, unlike Hepatitis B and C. It is not commonly spread through saliva or urine.

NREMT Medical Guidelines - Communicable Disease

National EMS Education Standards - Infection Control and Prevention

NEW QUESTION # 15

During a mass casualty incident, a patient has an open tibia and fibula deformity. Using START triage, in which of the following priorities should the EMT place the patient?

- A. Emergent
- B. Delayed
- C. Immediate
- D. Minimal

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The START (Simple Triage and Rapid Treatment) system classifies patients based on ability to walk, respirations, perfusion, and mental status. A patient with an open fracture who can breathe adequately, has a pulse, and follows commands is categorized as "Delayed".

Immediate (Red) is reserved for those who cannot walk and have life-threatening conditions, such as compromised airway or severe bleeding.
