최신 Salesforce Administrator Plat-Admn-301 무료샘플문제 (Q98-Q103):

질문 # 98

The administrator at Cloud Kicks made new fields and page layout adjustments based on new requirements from the service team. The changes have been built In a sandbox and are ready to be deployed Into production. What should an administrator do before deploying the change set in production?

- A. Create the fields and update the page layouts In production.
- B. Make a new sandbox based on production to restore changes from.
- C. Push the change set to another sandbox to restore from**
- D. Request a new sandbox based on the sandbox where the changes were made.

정답: C

설명:

change sets are tools that allow administrators to move customizations from one Salesforce org to another.

However, change sets do not track dependencies or conflicts between components in different orgs, so administrators need to manually verify that all required components are included in the change set and that they do not overwrite existing customizations in the target org. To avoid losing changes in production due to deploying an incomplete or incorrect change set, administrators should push the change set to another sandbox first and test it there before deploying it to production. 질문 # 99

A sales manager at AW Computing has created a contact record but is missing some of the information to complete the record. The organization-wide default for Accounts is set to Public Read Only, and Contacts are controlled by parent.

- A. The owner and users below the owner in the role hierarchy

- B. Users above the sales manager in the role hierarchy
- C. All users in the organization
- D. Who will be able to edit this new contact record?
- E. Sales manager and system administrator

정답: E

설명:

The sales manager and system administrator will be able to edit this new contact record because they are either the owner or have Modify All Data permission respectively. Users above or below the sales manager in the role hierarchy will not be able to edit this contact record because contacts are controlled by parent and accounts are set to Public Read Only. All users in the organization will be able to view but not edit this contact record because accounts are set to Public Read Only. References:

질문 # 100

Cloud Kicks (CK) has a backup team of employees that helps short-staffed departments. These users could be working with sales one day and service the next. CK is implementing new Lightning record pages for each department so that they view records In a way that makes sense for each department.

How should the administrator ensure this is configured correctly?

- A. Allow the backup team users to update their own profile with Delegated Administration.
- B. Adjust the profile of the backup users each day to align with the proper access they require.
- C. Configure one app per department and activate record pages for each app.
- D. Create permission sets for each department and assign them to the backup team users.

정답: C

설명:

Configuring one app per department and activating record pages for each app will ensure that users view records in a way that makes sense for each department. An app is a collection of items that work together to serve a particular function. An app can have different record pages for different objects and profiles. By activating record pages for each app, the administrator can customize what users see based on their app context. 질문 # 101

A request was made to import a spreadsheet of new Campaign Members. He system administrator started Data import Wizard but the Campaign Members object was unavailable as a choice. What is causing as a choice.

What is causing this occur?

- A. The marketing user feature license assignment is missing on the admin's user record.
- B. The Campaign Member option is only available for Update.
- C. The Salesforce,id field is required and was missing from the file.
- D. Import Wizard is only available for the Standard objects Accounts, Contacts, and Leads.

정답: B

설명:

The Campaign Member option is only available for Update when using Data Import Wizard. This means that you can use Data Import Wizard to update existing campaign members with new or modified information, but you cannot use it to create new campaign members from a spreadsheet. To create new campaign members from a spreadsheet, you need to use other tools such as Data Loader, Import Wizard for Leads and Contacts, or Manage Members button on the campaign page. References:

질문 # 102

DreamHouse Realty (DR) wants to ensure that its data is protected. There have been several recent attempts to phish employees. What should DR do to help ensure that the user that is logged in is the right user when the running user is trying to view reports and dashboards?

- A. Require a high assurance session when exporting or printing reports and dashboards.
- B. Require MFA when users need to view and export dashboards and reports.
- C. Set up an authentication provider for reports and dashboards.
- D. Require a Username, Password, and Security Token when logging in.

정답: A

설명:

To help ensure that users who are viewing reports and dashboards are who they say they are, DR should require a high assurance session when exporting or printing reports and dashboards. A high assurance session requires users to verify their identity using multi-factor authentication before accessing sensitive data or functionality in Salesforce. References:
