Trustable ChromeOS-Administrator Valid Test Voucher, Trustworthy ChromeOS-Administrator Pdf

It is compatible with Windows computers and comes with a complete support team to manage any issues that may arise. By using the Professional ChromeOS Administrator Exam (ChromeOS-Administrator) practice exam software, you can reduce the risk of failing in the actual ChromeOS-Administrator Exam. So, if you're looking for a reliable and effective way to prepare for your ChromeOS-Administrator exam, PremiumVCEDump is the best option.

Google Professional ChromeOS Administrator Exam Sample Questions (Q56-

Q61):

NEW QUESTION # 56

You have been tasked with selecting a 3rd party IdP to allow logging into ChromeOS devices. Your ChromeOS devices are displaying an "Unable to sign in to Google" message. How should you troubleshoot this?

- A. Disable the SSO connection in the Google Admin console
- B. Apply the SSO certificate to the ChromeOS device
- C. Check Multi-Factor Authentication for the user account in the Google Admin console
- **D. Ensure the Identity provider is using an SAML compliant connection**

Answer: D

Explanation:

The error message "Unable to sign in to Google" in the context of 3rd party IdP login typically points towards an issue with the SAML (Security Assertion Markup Language) connection. SAML is the standard protocol used for authentication between ChromeOS devices and external identity providers.

Here's a breakdown of troubleshooting steps:

- * **Verify SAML Compliance:** The most critical step is to ensure that the 3rd party IdP is configured correctly to use SAML 2.0 and is adhering to the required SAML attributes and formatting.
- * **Check IdP Configuration:** Review the SAML configuration settings in both the Google Admin console (under Security > Set up single sign-on (SSO) with a third party IdP) and the 3rd party IdP's administration portal. Ensure that the entity IDs, SSO URLs, and certificate information match exactly.
- * **Test SAML Connection:** Use a SAML testing tool (e.g., SAML Tracer) to simulate the login process and inspect the SAML assertions. This can help pinpoint any errors or inconsistencies in the SAML response.
- * **Google Admin Console Logs:** Check the Google Admin console logs for any relevant error messages related to the SAML authentication process.
- * **Contact IdP Support:** If the issue persists, reach out to the support team of your 3rd party IdP for further assistance. They may have specific troubleshooting steps or logs to help diagnose the problem.

NEW QUESTION # 57

What is the recommended way to provision users from an on-prem Active Directory environment into the Google Admin console?

- A. Upload via CSV
- B. Azure AD Google Cloud/G Suite Connector
- **C. Google Cloud Directory Sync**
- D. Admin SDK Directory API

Answer: C

Explanation:

The "Deprovision" command is specifically designed to remove a ChromeOS device from management policy updates. This means the device will no longer receive updates, configurations, or restrictions pushed from the Google Admin console.

Here's what happens when you deprovision a device:

- * **Policy Removal:** All enterprise policies and configurations are removed from the device.
- * **Management Removal:** The device is disassociated from the Google Admin console and no longer considered managed.
- * **Data Wipe (Optional):** You can choose to wipe the device's data during deprovisioning to ensure no company data remains.

Other options like "Reset," "Disable," or "Powerwash" may have different effects:

- * **Reset:** Resets the device to factory settings but might not remove management if not done through the Admin console.
- * **Disable:** Prevents the user from signing in but doesn't remove policies or management.
- * **Powerwash:** Factory resets the device, removing all user data and configurations, including management.

NEW QUESTION # 58

You need to create a recovery image on a USB stick. Which two steps should you take?

Choose 2 answers

- A. Go to Google Play store

- B. Go to Chrome Web Store on a Chrome device
- C. Go to Device Settings
- D. Install Chrome Recovery Utility and download the image for the correct device model to a USB stick
- E. Go to google.com/chromebooks

Answer: B,D

Explanation:

To create a recovery image on a USB stick, you need to:

- * Access Chrome Web Store: Open the Chrome Web Store on a Chrome device (either a Chromebook or a computer with the Chrome browser installed).
- * Install Chromebook Recovery Utility: Search for and install the "Chromebook Recovery Utility" extension.
- * Launch the Utility: Open the installed extension.
- * Identify Device: Enter the model number of the ChromeOS device for which you want to create the recovery image.
- * Insert USB Stick: Insert a USB stick with sufficient storage capacity (at least 4GB).
- * Download and Create: Follow the on-screen instructions in the utility to download the correct recovery image and create the bootable USB stick.

This process will prepare a USB stick that can be used to recover or reinstall ChromeOS on a device that is not functioning properly.

NEW QUESTION # 59

You need to create a recovery image on a USB stick. Which two steps should you take?

(Choose 2 answers)

- A. Go to Device Settings.
- B. Install Chrome Recovery Utility and download the image for the correct device model to a USB stick.
- C. Go to Google Play store
- D. Go to Chrome Web Store on a Chrome device
- E. Go to google.com/chromebooks

Answer: B,D

Explanation:

Creating a recovery image for ChromeOS involves using the Chrome Recovery Utility, which is available in the Chrome Web Store. This tool allows users to create a recovery USB drive by downloading the necessary OS image and writing it to the USB stick.

Verified Answer from Official Source:

The correct answers are verified from the ChromeOS Recovery Guide, which specifies the use of the Chrome Recovery Utility from the Chrome Web Store.

"To create a ChromeOS recovery image, download the Chrome Recovery Utility from the Chrome Web Store.

Follow the on-screen instructions to create a recovery USB stick."

The Recovery Utility is the recommended method for creating a USB recovery device, ensuring compatibility and correctness of the OS image.

Objectives:

- * Perform system recovery for ChromeOS devices.
- * Utilize official recovery tools.

NEW QUESTION # 60

At a specific location in your organization, users cannot log in to their ChromeOS devices. The ChromeOS Administrator has also noticed that devices have not synced in the past 24 hours. You have updated policies in the Admin console for your fleet of ChromeOS devices, but the devices are not getting the updated policies.

What is a probable change in the environment that can cause these issues?

- A. Your root Certificate Authority expired.
- B. Your network administrator has blocked all network traffic to Google services.
- C. Your organization's licenses have recently expired.
- D. A different location enrolled a large number of new devices.

Answer: B

Explanation:

If ChromeOS devices cannot log in and are not syncing with the Admin console, it is likely that network traffic to Google services has been blocked. ChromeOS devices require access to Google servers for authentication and policy synchronization.

Verified Answer from Official Source:

The correct answer is verified from the Google ChromeOS Troubleshooting Guide, which notes that blocking traffic to essential Google services can result in login and sync failures.

"Ensure that the network configuration allows access to essential Google services. Blocking such services can prevent device login and policy synchronization." Blocking traffic to Google servers disrupts the device's ability to authenticate users and receive updates from the Admin console, leading to connectivity issues.

Objectives:

* Troubleshoot network-related login issues.

* Ensure uninterrupted access to Google services for ChromeOS devices.

NEW QUESTION # 61

.....

It might be time-consuming and tired to prepare for the ChromeOS-Administrator exam without a specialist study material. So it's would be the best decision to choose our ChromeOS-Administrator study tool as your learning partner. Our ChromeOS-Administrator study tool also gives numerous candidates a better perspective on the real exam.
