Employment details such as hire dates or termination records can also be preserved using this operator.
Job Relationships and Addresses do not support the &&NO_OVERWRITE&& operator.

NEW QUESTION # 78
You have updated several position departments using Import and Export data, but the incumbent's data still shows the previous information for the department hris-field.
What are some possible causes for this data inconsistency? Note: There are 2 correct answers to this question.

- A. The business rule to sync data changes sets the Position Department to be equal to Job Information.Department.
- B. The technicalParameters column with a value of SYNC has NOT been included in the import file.
- C. The technicalParameters value has NOT been set to SYNC in the position records.
- D. The business rule to sync data changes sets the Job Information.Department to be equal to Job Information.Position.Department.

Answer: A,B

Explanation:
B . The technicalParameters column with a value of SYNC has NOT been included in the import file:
When importing position data, the technicalParameters column with the value "SYNC" must be included to ensure that changes to position attributes are synchronized to the incumbent's data.
C . The business rule to sync data changes sets the Position Department to be equal to Job Information.Department:
If the rule is incorrectly configured, the department field on the incumbent's job information may not update as expected. The correct configuration should align the position department with the incumbent's job information.
These factors contribute to discrepancies between position and incumbent data.

NEW QUESTION # 79

How should you build the IF condition to identity the user when the employee is updating their own Personal Information?

- A. Option D
- B. Option C
- C. Option A
- D. Option B

Answer: B

Explanation:
To identify the user when the employee is updating their own personal information, the IF condition in Option C is correct. This configuration:
* Checks if the Context.Current User is equal to the Login User.
* Ensures that the rule applies only when the employee is making changes to their own personal data.
This approach is aligned with SAP SuccessFactors logic for self-service scenarios, enabling accurate identification of the user in such workflows.
Scenario 2: Approvals for Self-Service

NEW QUESTION # 80

In which section in the Manage Permission Roles tool do you set Biographical Information?
