So you do not need to get worried about it choose the right Pass4Leader AACE-PSP exam questions formats and start this journey without wasting further time.

AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

For which of these delays should an owner grant a time extension?

- A. Differing site conditions at parking structure.
- B. Structural steel shop drawings.
- C. Shop drawings and centrifuge delay.
- D. Differing site conditions and centrifuge delay.

Answer: D

Explanation:

* Granting Time Extensions:

Differing site conditions are excusable delays under standard contract terms, requiring time extensions.

Centrifuge delays and shop drawings typically fall under the contractor's responsibility and are not excusable.

* Excluded Options:

A & B: Shop drawing-related delays are the contractor's risk unless explicitly agreed otherwise.

D: Combining excusable and non-excusable delays does not entitle an extension.

* Verification with PSP Guidelines:

Granting time extensions aligns with contractual principles outlined in PSP-related contracts (Ref. PSP Study Guide, Chapter 1C: Delay Analysis and Claims).

NEW QUESTION # 32

Scenario:

The entire network consists of the following activities and relationships. Activity A is twenty days long and is tied to Activity B, a ten-day activity, with a finish-to-finish tie with a lag value of five Activity B is tied to Activity C, a twenty-day activity, with a start-to-start relationship with a lag value of five.

□ PSP Activities Table

Scope Known about Rock-Filled Dam Project:

The dam requires river diversion and work over two or more rainy seasons. The contract is lump sum, competitively bid, and will be self-performed. The owner has attempted to shift all risk to the contractor by employing "no differing sit conditions" and "no damage for delay" clauses. There is a bonus/penalty provision of \$2,500 per calendar day for early or late delivery. The early completion bonus is capped at \$500,000, with no cap for late delivery penalty.

Liquidated damages end at the finish of demobilization. Indirect costs per calendar day are \$2,800 for the "normal" schedule and \$3,200 for the "crashed" schedule. The winter/wet weather season is 151 days between October 15 and March 25 of each year, reduces the efficiency of the contractor's operations by 20% and costs the contractor \$10,000 per day. Assume a start date of March 5, 2001 and use a 7-day work week.

The following table lists work activities as planned by the contractor.

□ Theoretically construct a summary activity for only those activities with a finish-to-start relationship for Activities 8001 through 10001. Using the "normal" schedule, what is the cost of this hammock?

- A. \$307,000.
- B. \$420,000.
- C. **\$552,000.**
- D. \$524,000.

Answer: C**NEW QUESTION # 33**

When a fragnet of activities represents a known schedule risk, which activity will most likely change the overall outcome?

- A. The activity with the highest sensitivity.
- B. The activity with the longest duration.
- C. **The activity with the lowest total float value.**
- D. The activity with the highest resource loading.

Answer: C**NEW QUESTION # 34**

What is the primary difference between the arrow diagramming method (ADM) and the precedence diagramming method (PDM)?

- A. PDM is a bar chart with network logic, while ADM is a pure logic network.
- B. ADM is manual CPM calculations, while PDM is computerized.
- C. ADM uses arrows, while PDM uses boxes.
- D. **ADM is limited to finish-to-start logic relationships, while PDM is not.**

Answer: D

NEW QUESTION # 35

What is the result of a forward pass calculation?

- A. Value of free float for individual activities
- **B. Early start and early finish date for individual activities**
- C. Critical path
- D. Value of total float for individual activities

Answer: B

NEW QUESTION # 36

.....
