The Pass4sureCert is a leading platform that has been helping the Salesforce Mule-Arch-202 exam aspirants for many years. Over this long time period, thousands of Salesforce Mule-Arch-202 Exam candidates have passed their dream Mule-Arch-202 certification exam and have become a member of Salesforce Mule-Arch-202 certification exam community.

Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q167-Q172):

NEW QUESTION # 167

When designing automated tests for Mule applications, what should be considered to create effective performance tests (Choose Two)

- A. Measuring the throughput and response times of APIs.
- B. Simulating peak load conditions.
- C. Focusing solely on the security aspects of the application.
- D. Testing only the application's UI responsiveness.

Answer: A,B

NEW QUESTION # 168

A company uses CloudHub for API application deployment so that experience APIs and/or API proxies are publicly exposed using custom mTLS. The company's InfoSec team requires isolated, restricted access that is limited internally to system APIs deployed to CloudHub and the company's data center.

What are the minimum infrastructure, component, connection, and software requirements to meet the company's goal and the InfoSec team's requirements?

- A. Virtual Private Cloud
- B. Virtual Private Cloud
- C. Virtual Private Cloud
- D. Virtual Private Cloud

Answer: B

NEW QUESTION # 169

Refer to the exhibit.

In this Mule application, the retrieveFile flow's event source reads a CSV file from a remote SFTP server and then publishes each record in the CSV file to a VM queue. The processCustomerRecord flow's VM Listener receives messages from the same VM queue and then processes each message separately. This Mule application is deployed to multiple CloudHub workers with persistent queues enabled. How are messages routed to the CloudHub workers as messages are received by the VM Listener?

- A. Each message is duplicated to all of the CloudHub workers, thereby sharing each message with all the CloudHub workers
- B. Each message is routed to one of the available CloudHub workers in a non-deterministic, non-round-robin fashion, thereby approximately balancing messages among the CloudHub workers
- C. Each message is routed to the same CloudHub worker that retrieved the file, thereby binding all messages to only that one CloudHub worker
- D. Each message is routed to one of the CloudHub workers in a deterministic round-robin fashion, thereby exactly balancing messages among the CloudHub workers

Answer: B

NEW QUESTION # 170

What is the primary difference between functional and non-functional requirements in integration solutions? (Choose Two)

- A. Non-functional requirements specify business processes.
- B. Non-functional requirements focus on system security and performance.
- C. Functional requirements describe the color scheme of the user interface.
- D. Functional requirements define specific behaviors of the system.

Answer: B,D

NEW QUESTION # 171

When designing Mule applications, why might you choose to configure stateful components with an OS?

- A. To manage user access and authentication
- B. To enhance the graphical user interface
- C. To ensure data consistency across stateless components
- D. To reduce the computational load on the application

Answer: C

NEW QUESTION # 172

.....

For every candidates, practicing for the pass of the exam is an inevitable process, since we can improve our ability. Our Mule-Arch-202 Exam Torrent will provide you the practice. The pass rate is 98.88%, and if you fail to pass the test, money back guarantee. Besides, we also have online chat service staff, if you have any questions, you can have a chat with them, or you can send emails to us, we will give you the reply as quickly as we can.
