- C. Existing fields are overwritten, new fields are added, and non-Imported fields are kept.**
- D. Existing Holds are overwritten, new fields are added, and non-imported fields are deleted.

Answer: C

Explanation:

When importing modules into FortiSOAR using the configuration wizard and selecting "Merge with Existing" as the bulk action, the behavior for field handling is as follows: any fields that already exist in the system are overwritten with the imported values.
