If your answer is yes then you do not need to go anywhere, just download PracticeMaterial 156-315.81 Questions and start Check Point Certified Security Expert R81 (156-315.81) exam preparation with complete peace of mind and satisfaction.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q463-Q468):

NEW QUESTION # 463

How many policy layers do Access Control policy support?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

Two policy layers:

- Network Policy Layer
- Application Control Policy Layer

NEW QUESTION # 464

What is the benefit of "fw monitor" over "tcpdump"?

- A. "fw monitor" reveals Layer 2 information, while "tcpdump" acts at Layer 3.
- B. "fw monitor" is also available for 64-Bit operating systems.
- **C. With "fw monitor", you can see the inspection points, which cannot be seen in "tcpdump"**
- D. "fw monitor" can be used from the CLI of the Management Server to collect information from multiple gateways.

Answer: C

Explanation:

Explanation

The benefit of fw monitor over tcpdump is that with fw monitor, you can see the inspection points, which cannot be seen in tcpdump. Inspection points are the locations in the firewall kernel where packets are inspected by the security policy and other software blades. Fw monitor allows you to capture packets at different inspection points and see how they are processed by the firewall. Tcpdump, on the other hand, is a generic packet capture tool that only shows the packets as they enter or leave the network interface.

NEW QUESTION # 465

What is UserCheck?

- A. Messaging tool used to verify a user's credentials.
- **B. Communication tool used to inform a user about a website or application they are trying to access.**
- C. Administrator tool used to monitor users on their network.
- D. Communication tool used to notify an administrator when a new user is created.

Answer: B

Explanation:

UserCheck is a communication tool used to inform a user about a website or application they are trying to access. UserCheck allows administrators to interact with users in real time, informing them of the security policy and the actions they need to take. UserCheck can also enable users to self-remediate incidents or request exceptions from the administrator. Reference: Training & Certification | Check Point Software, Check Point Resource Library

NEW QUESTION # 466

What is required for a certificate-based VPN tunnel between two gateways with separate management systems?

- A. Unique Passwords
- B. Shared Secret Passwords
- C. Shared User Certificates
- **D. Mutually Trusted Certificate Authorities**

Answer: D

Explanation:

Explanation

A certificate-based VPN tunnel between two gateways with separate management systems requires mutually trusted certificate authorities. This means that each gateway must have a certificate issued by a certificate authority (CA) that the other gateway trusts. The CA can be either an internal CA or an external CA. The CA issues certificates that contain the public key and identity information of the gateway. The gateway uses its private key to sign and encrypt the VPN traffic. The other gateway can verify the signature and decrypt the traffic using the public key in the certificate. This ensures the authenticity, integrity, and confidentiality of the VPN tunnel.

NEW QUESTION # 467

You have enabled "Full Log" as a tracking option to a security rule. However, you are still not seeing any data type information. What is the MOST likely reason?

- A. Data Awareness is not enabled.
- B. Logs are arriving from Pre-R81 gateways.
- C. Identity Awareness is not enabled.
- **D. Logging has disk space issues. Change logging storage options on the logging server or Security Management Server properties and install database.**

Answer: D
