In order to reflect our sincerity on consumers and the trust of more consumers, we provide a 100% pass rate guarantee for all customers who have purchased Analytics-Con-201 study materials.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q66-Q71):

NEW QUESTION # 66

In a dataset, there are multiple boolean fields. When displayed on any dashboard, the boolean fields should all be displayed in the same way: a value of true should result in the display of the word "Yes" in green; a value of false should result in the display of the word "No" in red.

How should the consultant accomplish this?

- A. Create an XMD node in the recipe to change the label and color of the values in the fields.
- B. Select the boolean fields in the explorer's field panel, select the boolean fields, then create a derived dimension.
- C. In the explorer's field panel, select the boolean fields and use the "edit values" option on the fields to change values and colors.

Answer: C

NEW QUESTION # 67

Cloud Kicks (CK) has a dashboard that is still showing 10 former account managers. CK has since expanded, and some have moved from their former roles. CK wants the dashboard to reflect current account managers and stay up to date as new team members join.

How should the CRM Analytics developer accomplish this?

- A. Build a report and get notified when a new account manager joins, and then edit the dashboard to add the account manager.
- **B. Use a Repeater Widget that updates automatically as the data flows through the system.**
- C. Create @ Watchlist and when the number of account manager updates, update the dashboard to reflect the same.

Answer: B

Explanation:

The Repeater Widget in CRM Analytics allows dynamic updates to be reflected on the dashboard automatically as data flows are updated. This means that as new account managers join or existing account managers change roles, the data in the widget will automatically reflect the latest information without manual updates. This is the most efficient way to keep the dashboard up-to-date with the current list of account managers.

NEW QUESTION # 68

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

- A. The dashboard has been created for internal use and the users have a view only license.
- B. The users have access to the dashboard but not the dataset.
- **C. The permission set for the users is missing the download data permission.**

Answer: C

NEW QUESTION # 69

AW Computing will start using Tableau Online to report on some of its Salesforce data to users who do NOT have an SFDC license.

What is the first step the CRM Analytics consultant should take?

- **A. Enable the Tableau output connection in the Analytics settings.**
- B. Select the output connection in the "write to" option of the recipe.
- C. Use MuleSoft to generate an API to connect and push data from SFDC to Tableau.

Answer: A

NEW QUESTION # 70

A user is able to access the dashboards, lenses, and datasets of a particular app but is unable to change the name of the specific app.

What is causing the issue?

- **A. The user does not have Manager access for that app.**
- B. The app name cannot be changed once created.
- C. The user does not have Editor access for that app.

Answer: A

Explanation:

In CRM Analytics, the ability to modify the name of an app or make other significant changes typically requires Manager access. This level of access is distinct from Editor or Viewer permissions, which may allow for modifications to contents within the app but not to the app's core properties like its name. Here's the reasoning:

* Access Restrictions: Manager access is specifically designed to control structural changes within the app, including renaming the

app, which is considered a higher privilege operation.

* Role-Based Access Control: This ensures that only users with the necessary permissions can make significant changes, protecting the integrity and configuration of the app.

Ensuring users have the appropriate level of access based on their responsibilities is a fundamental aspect of managing security and functionality in CRM Analytics.

NEW QUESTION # 71

.....

Our company always lays great emphasis on service. All of our works have good sense of service. Once you browser our website and select the Analytics-Con-201 exam questions, we have arrange all study materials separately and logically. You will know the details if you click the Analytics-Con-201 practice quiz. You will find that it is easy, fast and convenient. And if you have something confused on our Analytics-Con-201 learning braindumps, then you can contact with our service online or send email to us. We will help you in the first time.
