Deep-Security-Professional Dumps Cost, Deep-Security-Professional Certification Exam Cost

After years of research in IT exam certification, our ActualPDF has become a leader of IT industry. Our exam software is consisted of comprehensive and diverse questions. Deep-Security-Professional exam software, as one of the most popular software with best sales, has helped many candidates successfully Pass Deep-Security-Professional Exam. Besides, as we know, once you have obtain Deep-Security-Professional exam certification, your career in IT industry will be much easier.

Trend Micro Certified Professional for Deep Security Sample Questions (Q49-Q54):

NEW QUESTION # 49

What is the effect of the Firewall rule displayed in the following exhibit?

- A. This rule will allow incoming TCP and UDP communication to this server.
- B. This rule will allow incoming communication to this server, but not TCP and UDP.

- C. This rule will allow TCP and UDP replies to requests originating on this server.
- D. This rule will allow outgoing TCP and UDP communication from this server.

Answer: A

NEW QUESTION # 50

Your organization stores PDF and Microsoft Office files within the SAP Netweaver platform and requires these documents to be scanned for malware. Which Deep Security component is required to satisfy this requirement?

- A. No extra components are required, this can be done by enabling the AntiMalware Protection Module on the SAP Netweaver server.
- B. A Smart Protection Server must be installed and configured to service the SAP Netweaver platform
- **C. Deep Security Scanner is required.**
- D. The Netweaver plug-in must be installed on the Deep Security Agent.

Answer: C

Explanation:

Deep Security Scanner provides integration with the SAP NetWeaver platform and performs anti-malware scans and reviews the information to identify potential threats in SAP systems.

Note: Deep Security Scanner is not supported on computers where the Deep Security Agent is enabled as a Relay.

Explication: Study Guide - page (26)

NEW QUESTION # 51

In the policy displayed in the exhibit, the state of the Web Reputation Protection Module is set to "Inherited (On)", while the state for the other Protection Module is set to "On". Why is the Web Reputation Protection Module displayed differently than the other Protection Modules.

- A. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on at the computer level.
- B. In this example, the state for the Web Reputation Protection Module is listed as "Inherited (On)" as it was inherited from the default setting in the Base Policy.
- C. The state for a Protection Module is always displayed as "Inherited (On)" until the module components are installed on the Deep Security Agent.
- **D. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on specifically in this child policy.**

Answer: D

NEW QUESTION # 52

Recommendation scans can detect applications and/or vulnerabilities on servers on the network. Which of the following Protection Modules make use of Recommendation scans?

- A. Intrusion Prevention, Firewall, Integrity Monitoring and Log Inspection
- B. Log Inspection, Application Control, and Intrusion Prevention
- C. Firewall, Application Control, and Integrity Monitoring
- **D. Intrusion Prevention, Integrity Monitoring, and Log Inspection**

Answer: D

Explanation:

Recommendation scans in Deep Security are used to recommend rules for:

Intrusion Prevention

Integrity Monitoring

Log Inspection

Firewall and Application Control do not use recommendation scans for their rule or inventory management.

NEW QUESTION # 53

Which of the following VMware components is not required to enable agentless protection using Deep Security.

- A. VMware NSX
- B. VMware vCenter
- C. VMware ESXi
- D. VMware vRealize

Answer: D

Explanation:

For agentless protection (such as with VMware NSX integration), vCenter, ESXi, and NSX are required, as they provide the virtualization platform, centralized management, and security services integration, respectively. VMware vRealize is a cloud automation and management suite and is not required for Deep Security's agentless protection.

From the official documentation:

"Agentless protection requires VMware NSX, ESXi hypervisors, and vCenter Server. VMware vRealize is not required for Deep Security agentless deployment." Option C is correct.

Options A, B, D are required components for agentless integration.
