

100% Pass C_TS422_2023 - SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Pass-Sure Training Kit

2026 Latest Dumpcollection C_TS422_2023 PDF Dumps and C_TS422_2023 Exam Engine Free Share:
<https://drive.google.com/open?id=1Nvhva6-Zn-yd1deQ0PxN9v0pGdA0GbV->

In rare cases, if you fail to pass the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing C_TS422_2023 exam despite using SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam dumps we will return your whole payment without any deduction. Take the best decision of your professional career and start exam preparation with SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam practice questions and become a certified SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing C_TS422_2023 expert.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Capacity Planning in SAP S 4HANA: This section covers a discussion of SAP S 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 2	<ul style="list-style-type: none"> Introduction to SAP S 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S 4HANA, its main components, business applications, and user experience strategy.
Topic 3	<ul style="list-style-type: none"> Demand Management in SAP S 4HANA: This section covers a comparison of production methods in various manufacturing environments.
Topic 4	<ul style="list-style-type: none"> Process Orders in SAP S 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.

Topic 5	<ul style="list-style-type: none"> • Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 6	<ul style="list-style-type: none"> • Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.
Topic 7	<ul style="list-style-type: none"> • Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.

100% Pass Quiz Latest SAP - C_TS422_2023 - SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Training Kit

We provide a free sample before purchasing SAP C_TS422_2023 valid questions so that you may try and be happy with its varied quality features. Learn for your SAP certification with confidence by utilizing the Dumpcollection C_TS422_2023 Study Guide, which is always forward-thinking, convenient, current, and dependable.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q47-Q52):

NEW QUESTION # 47

What could be the reason for multiple commitments where several operations have the same scheduled dates on a work center after dispatching? Note: There are 2 correct answers to this question.

- A. The work center has several individual capacities.
- B. The Finite Scheduling indicator is NOT set in the strategy profile.
- C. Alternative work centers are fully occupied.
- D. The Change Planning Direction indicator is set in the strategy profile.

Answer: A,B

Explanation:

In SAP S/4HANA, dispatching operations (e.g., in CM21 or PP/DS Planning Board) assigns them to work centers. Multiple commitments on the same date indicate overlapping schedules, caused by:

* The Finite Scheduling indicator is NOT set in the strategy profile(A): In PP/DS (strategy profile, /SAPAPO/CDPSC11) or capacity planning (OPU5), if finite scheduling isn't active (e.g., work center CR02, Capacity tab, "Relevant to Finite Scheduling" unchecked), the system schedules operations infinitely, ignoring capacity limits and allowing overlaps on the same date.

* The work center has several individual capacities(B): If the work center (CR02, Capacity tab) has multiple individual capacities (e.g., 3 machines, field: No. of Individual Capacities), operations can be scheduled in parallel on the same date, each assigned to a separate capacity, resulting in multiple commitments.

Alternative work centers fully occupied(C) might force scheduling onto one center but doesn't inherently cause overlaps-it's a capacity issue, not a scheduling logic flaw. Change Planning Direction indicator(D) (e.

g., Forward/Backward in strategy profile) affects sequence, not overlapping commitments. This is per SAP's scheduling behavior.

NEW QUESTION # 48

Which of the following processes lead to an entry in the MRP planning file? Note: There are 2 correct answers to this question.

- A. Changing the delivery address in transportation management
- B. Changing the storage bin in warehouse management
- C. Changing the stock in inventory management
- D. Changing the procurement type in the product master

Answer: C,D

Explanation:

In SAP S/4HANA, the MRP planning file (table MDVM, visible via MD05) tracks changes that trigger MRP to re-evaluate a material's planning situation. Entries are created when:

* Changing the procurement type in the product master(C): The procurement type (material master, MRP

2 view, field: Procurement Type) determines whether a material is produced in-house ("E"), procured externally ("F"), or both ("X").

Changing it (e.g., via MM02) affects how MRP generates planned orders or purchase requisitions, so an entry is added to the planning file (e.g., NETCH or NETPL indicator) to prompt recalculation.

* Changing the stock in inventory management(D): Any stock change (e.g., goods receipt via MIGO, goods issue via MB1A) updates the available stock (MD04). This triggers an MRP planning file entry because it alters the net requirements calculation, requiring MRP (MD01/MD02) to reassess supply versus demand.

Changing the delivery address in transportation management(A) affects logistics execution (e.g., shipment documents), not MRP

planning directly-no entry is created.Changing the storage bin in warehouse management(B) (e.g., via LT10) is a WM-level movement that doesn't impact MRP unless stock quantity changes, which falls under (D). This is per SAP's MRP planning file logic.

NEW QUESTION # 49

Which actions does the system perform by default when you save a confirmation for a finished product in repetitive manufacturing?

Note: There are 3 correct answers to this question.

- A. Post the goods receipt for the finished product.
- B. Create associated capacity requirements.
- C. Reduce run schedule quantities.
- D. Post production costs to the planned order.
- E. Update statistics for the Business Information Warehouse.

Answer: B,C,D

NEW QUESTION # 50

Your company manufactures materials whose characteristics differ for each manufacturing process. Which application do you have to use in SAP S/4HANA Cloud Private Edition to be able to track and use this information in all areas of logistics?

- A. Batch management
- B. Process order management
- C. Engineering change management
- D. Quality management

Answer: A

Explanation:

In SAP S/4HANA Cloud Private Edition, tracking materials with varying characteristics across manufacturing processes and logistics requires:

* Batch management(D): Batch management (activated in material master, MM01, General Plant Data /Storage view, field: Batch Management) assigns unique batch numbers to materials (e.g., via MSC1N).

It tracks characteristics (e.g., viscosity, color) via classification (CL02, linked in MSC2N), ensuring this information is available in all logistics areas-production (e.g., CO11N goods issue), inventory (MMBE), and sales (VA01 batch determination). This is ideal for materials like chemicals with process- specific traits.

Process order management(A) (COR1) executes production but relies on batch management for characteristic tracking-it's not the tracking tool itself.Engineering change management(B) (CC01) manages design changes, not runtime characteristics.Quality management(C) (e.g., QA01) inspects batches but doesn't track characteristics across logistics-batch management underpins it. This is per SAP's batch management capabilities.

NEW QUESTION # 51

You use planning strategy Finite Scheduling with Reverse and want to allow scheduling in the past. How can you parameterize this in the strategy profile?

- A. Specify a negative PP/DS horizon.

- B. Specify a negative planning horizon.
- C. Specify a negative opening period.
- D. Specify a negative offset time.

Answer: D

Explanation:

In SAP S/4HANA PP/DS, the Finite Scheduling with Reverse strategy (configured in the strategy profile, transaction /SAPAPO/CDPSC11) schedules operations backward from a fixed end date, respecting finite capacity. To allow scheduling in the past (e.g., before today's date):

* Specify a negative offset time(A): In the strategy profile (Detailed Scheduling tab, field: Scheduling Offset), a negative value (e.g., -2 days) shifts the scheduling reference point into the past. This allows operations to be scheduled before the current date, accommodating scenarios where late planning or historical adjustments are needed, while still respecting capacity constraints.

Negative opening period(B) isn't a standard PP/DS parameter-it's a production order term (MRP 2 view) for order start buffers, not scheduling control. Negative planning horizon(C) (Planning Horizon in /SAPAPO

/CDPSC11) defines the future planning scope, not past scheduling. Negative PP/DS horizon(D) refers to the PP

/DS planning horizon (Customizing), which limits planning scope forward, not backward. This is per SAP's PP/DS scheduling configuration.

NEW QUESTION # 52

.....

As you know, the low-quality latest C_TS422_2023 exam torrent may do harmful influence on you which may causes results past redemption. Whether you have experienced that problem or not was history by now. The free demos do honor to the perfection of our latest C_TS422_2023 exam torrent, and also a performance of our considerate after sales services. Those demos serve as epitomes of real C_TS422_2023 Quiz guides for your reference. In our demos, some examples or question points were enumerated as some representatives of our C_TS422_2023 test prep. How convenient and awesome of it!
