All our customers have successfully passed the exam. DEP-2025 certification materials will enable you to obtain the actual certification within days, and will be the best choice for your time and money.

Apple Deployment and Management Exam Sample Questions (Q113-Q118):

NEW QUESTION # 113

Which type of enrollment supports Shared iPad?

- A. Automated Device Enrollment
- B. User Enrollment
- C. Device Enrollment

Answer: A

Explanation:

Shared iPad, a feature for multi-user environments like education or business, requires devices to be supervised and enrolled via Automated Device Enrollment (ADE) through Apple School Manager (ASM) or Apple Business Manager (ABM). ADE ensures the device is pre-configured with an MDM solution that supports Shared iPad settings, such as user session management with Managed Apple IDs. Device Enrollment (option B) can supervise devices but isn't optimized for Shared iPad's automatic setup. User Enrollment (option C) is for BYOD and doesn't support Shared iPad, which is for organization-owned devices. The Apple Platform Deployment Guide specifies ADE for Shared iPad deployment.

NEW QUESTION # 114

Your organization is migrating to a new MDM solution. iPhone and iPad devices were reassigned to the new MDM solution using Apple Business Manager. What must you do before you can enroll the devices in the new MDM solution using Automated Device Enrollment?

- A. Send a remote wipe command from Apple School Manager or Apple Business Manager.
- B. Release the devices in Apple School Manager or Apple Business Manager.
- C. Erase the devices.
- D. Revive the devices.

Answer: C

Explanation:

Apple explains that for a device to enroll into a new MDM server through Automated Device Enrollment (ADE), it must go through the Setup Assistant workflow again. This requires the device to be erased before it will attempt to re-enroll. Simply reassigning the device in Apple Business Manager does not trigger enrollment until the device is reset and Setup Assistant runs. Apple stresses that erase is necessary because ADE workflows are tied to the initial setup sequence. Remote wipe from ABM/ASM is not a feature, and Revive is a low-level restore process for Apple silicon, not for standard redeployment. Releasing devices removes them entirely from ABM. Therefore, erasing is the only required action before the device can enroll in the new MDM.

References: Apple Platform Deployment - "Reassign devices to a new MDM server with ADE."

NEW QUESTION # 115

Which type of enrollment do you commonly use for BYOD deployments?

- A. Device
- B. User
- C. Automated device

Answer: B

Explanation:

For Bring Your Own Device (BYOD) deployments, User Enrollment is the commonly used method. It allows users to enroll their personal devices in an MDM solution via a customized URL or portal, maintaining a separation between personal and managed data. Device Enrollment (option A) is typically for organization-owned devices, requiring more control than BYOD allows.

Automated Device Enrollment (option C) is for organization-owned devices pre-registered with Apple, not BYOD. The Apple Platform Deployment Guide specifies User Enrollment as the standard for BYOD.

Reference: Apple Platform Deployment Guide (Chapter: User Enrollment).

NEW QUESTION # 116

Which Apple device capability allows MDM to secure devices?

- A. Built-in device security features
- B. Location Services
- C. Enrollment profiles

Answer: A

Explanation:

Apple devices come with built-in security features, such as data encryption, Secure Enclave, and passcode enforcement, which MDM solutions leverage to secure devices. These features allow MDM to enforce policies like requiring a passcode, enabling encryption, or remotely wiping a device if lost. Location Services (option B) provides geolocation data but is not a core security

capability used by MDM for securing devices. Enrollment profiles (option B) are the mechanism to connect a device to MDM, not a capability that secures the device itself. The Apple Platform Security Guide highlights how MDM utilizes these built-in features to enhance device security, making option C the correct choice.

NEW QUESTION # 117

Which type of content can be distributed through Apple School Manager?

- A. Custom content
- B. Apps
- C. Books
- D. All of the above

Answer: D

Explanation:

Apple School Manager (ASM) supports the distribution of multiple content types via Managed Distribution: apps (free or purchased), books (from the Books Store), and custom content (e.g., PDFs or ePub files created by the organization). This allows schools to manage all educational materials centrally. Options A, B, and C are all correct individually, but D encompasses them all, aligning with ASM's capabilities as outlined in the Apple School Manager User Guide. Reference: Apple School Manager User Guide (Section: Content Management).

NEW QUESTION # 118

.....

If you are planning to pass the DEP-2025 exam, you can choose our DEP-2025 practice materials as your learning material since our products are known as the most valid exam engine in the world, which will definitely be beneficial to your preparation for exams. There are many impressive advantages of our DEP-2025 Study Guide. And our DEP-2025 actual exam will be definitely conducive to realizing the dream of obtaining the certificate.
