Reliable 300-415 Test Questions, 300-415 Latest Braindumps Free

The modern job market is becoming more competitive with every passing moment. You have to be ready for it and learn in-demand skills with the Implementing Cisco SD-WAN Solutions Exam 300-415 certification exam. If you are not doing this you are going to end up in a normal company with low pay. Be smart in your decision and get registered for the Implementing Cisco SD-WAN Solutions 300-415 certification exam and put all your efforts, commitment and dedication to crack the Implementing Cisco SD-WAN Solutions 300-415 exam. Once you pass the Implementing Cisco SD-WAN Solutions 300-415 certification exam you will get personal and professional benefits throughout your career. Do you have the plan to accept this challenge and enroll in the 300-415 Certification Exam? Looking for a simple, quick, and smart way to pass the Implementing Cisco SD-WAN Solutions 300-415 exam? If your answer is yes then you do not need to get worried about it. Just visit PassLeader and explore the top features of Cisco 300-415 PDF Questions and practice tests. The PassLeader is quite confident that you will crack the 300-415 exam shortly.

What's Next After Cisco ENSDWI 300-415?

After passing 300-415 Exam, one will officially be identified as a CCNP Enterprise certified professional. The immediate step for anyone who just passed the tests is to update their social media profiles, especially LinkedIn, to let the connections know you're now a CCNP Enterprise holder. Doing so would mark your name for lucrative job offers by interested potential employers.

Since the CCNP Enterprise is a professional-level certification, the next path you can take is to target one of the expert-level ones such as CCIE Enterprise Infrastructure or CCIE Enterprise Wireless.

Cisco Implementing Cisco SD-WAN Solutions Sample Questions (Q416-Q421):

NEW QUESTION # 416

Which feature allows reachability to an organization's internally hosted application for an active DNS security policy on a device?

- A. local domain bypass
- B. data pokey with redirect
- C. DNSCrypt configurator
- D. DHCP option 6

Answer: A

Explanation:

A local domain bypass allows reachability to an organization's internally hosted applications when an active DNS security policy is in place. It permits the device to bypass DNS security policies for specific domains or hosts, typically those that are hosted internally by the organization. This ensures that access to internal resources is not blocked or affected by DNS security policies.

NEW QUESTION # 417

Drag and drop the policies from the left onto the correct policy types on the right.

Answer:

Explanation:

□ Explanation
strict hubandspoke topology
prefer voice and video via MPLS link
perform shaping on traffic
service firewall insertion

NEW QUESTION # 418

When redistribution is configured between OMP and BGP at two Data Center sites that have Direct Connection interlink, which step avoids learning the same routes on WAN Edge routers of the DCs from LAN?

- A. Set OMP admin distance lower than BGP admin distance
- B. Set down-bit on Edge routers on DC1
- C. Define different VRFs on both DCs
- D. Set same overlay AS on both DC WAN Edge routers

Answer: D

Explanation:

□

NEW QUESTION # 419

What is the next step when the WAN Edge device boots up and resolves the domain in the ZTP process for WAN Edge deployment?

- A. The WAN Edge router authenticates to the vBond orchestrator with the chassis serial number and root certificate.
- B. The WAN Edge device establishes secure control plane connections with the controllers and secure data plane connections in the SD-WAN overlay network.
- C. The WAN Edge device learns the vBond and organization name from the configuration and initiates a secure control connection to the vBond orchestrator.
- D. The WAN Edge device establishes secure connections with the vManage and vSmart and downloads the configuration using NETCONF.

Answer: A

Explanation:

During the Cisco SD-WAN ZTP (Zero Touch Provisioning) process, after the WAN Edge device resolves the domain, the next step is to authenticate with the vBond orchestrator using the chassis serial number and the root certificate. This authentication ensures that the WAN Edge device is authorized to join the SD-WAN fabric before proceeding to establish control plane connections with other controllers like vManage and vSmart.

NEW QUESTION # 420

When redistribution is configured between OMP and BGP at two Data Center sites that have Direct Connection interlink, which step avoids learning the same routes on WAN Edge routers of the DCs from LAN?

- A. Set OMP admin distance lower than BGP admin distance
- B. Set down-bit on Edge routers on DC1
- C. Define different VRFs on both DCs
- **D. Set same overlay AS on both DC WAN Edge routers**

Answer: D

Explanation:

NEW QUESTION # 421
