SPLK-3002인기시험덤프최신인기덤프

그 외, PassTIP SPLK-3002 시험 문제집 일부가 지금은 무료입니다: https://drive.google.com/open?id=1-IDucW3loUNCYSKeyWPMz9WbqX2LJcgV

PassTIP에서 Splunk인증 SPLK-3002덤프를 구입하시면 퍼펙트한 구매후 서비스를 제공해드립니다. Splunk인증 SPLK-3002덤프가 업데이트되면 업데이트된 최신버전을 무료로 서비스로 드립니다. 시험에서 불합격성적표를 받으시면 덤프구매시 지불한 덤프비용은 환불해드립니다.

Splunk SPLK-3002 자격증 시험을 준비하기 위해서는, 후보자는 Splunk Enterprise 및 ITSI를 사용하여 IT 서비스를 모니터링하고 분석하는 경험이 있어야 합니다. 또한 IT 서비스 관리 원칙과 최상의 실천 방법에 대한 강력한 이해력이 필요합니다. Splunk는 교육 과정, eLearning 모듈 및 모의 시험을 비롯한 다양한 교육 자원을 제공하여 후보자들이 시험을 준비할 수 있도록 돕고 있습니다. Splunk IT Service Intelligence Certified Admin 자격증을 취득함으로써 IT 전문가들은 잠재적인 고용주에게 자신의 전문성을 증명하고 IT 산업에서 경력을 발전시킬 수 있습니다.

SPLK-3002덤프자료 & SPLK-3002완벽한 시험덤프

PassTIP의Splunk SPLK-3002덤프로Splunk SPLK-3002시험공부를 하여 시험에서 떨어지는 경우 덤프비용전액을 환불해드릴만큼 저희 덤프는 높은 적중율을 자랑하고 있습니다. 주문번호와 불합격성적표를 메일로 보내오시면 바로 환불가능합니다. 환불해드린후에는 무료업데이트 서비스가 종료됩니다. Splunk SPLK-3002 시험을 우려없이 패스하고 싶은 분은 저희 사이트를 찾아주세요.

최신 Splunk IT Service SPLK-3002 무료샘플문제 (Q80-Q85):

질문 # 80
What should be considered when onboarding data into a Splunk index, assuming that ITSI will need to use this data?

- A. Plan to build as many data models as possible for ITSI to leverage
- B. Make sure that all fields conform to CIM, then use the corresponding module to import related services.
- C. Check if the data could leverage pre-built KPIs from modules, then use the correct TA to onboard the data.
- D. Use | stats functions in custom fields to prepare the data for KPI calculations.

정답：C

설명:
Reference: https://newoutlook.it/download/book/splunk/advanced-splunk.pdf When onboarding data into a Splunk index, assuming that ITSI will need to use this data, you should consider the following:
B). Check if the data could leverage pre-built KPIs from modules, then use the correct TA to onboard the data.
This is true because modules are pre-packaged sets of services, KPIs, and dashboards that are designed for specific types of data sources, such as operating systems, databases, web servers, and so on. Modules help you quickly set up and monitor your IT services using best practices and industry standards. To use modules, you need to install and configure the correct technical add-ons (TAs) that extract and normalize the data fields required by the modules.

The other options are not things you should consider because:
A). Use | stats functions in custom fields to prepare the data for KPI calculations. This is not true because using | stats functions in custom fields can cause performance issues and inaccurate results when calculating KPIs. You should use | stats functions only in base searches or ad hoc searches, not in custom fields.
C). Make sure that all fields conform to CIM, then use the corresponding module to import related services. This is not true because not all modules require CIM-compliant data sources. Some modules have their own data models and field extractions that are specific to their data sources. You should check the documentation of each module to see what data requirements and dependencies they have.
D). Plan to build as many data models as possible for ITSI to leverage. This is not true because building too many data models can cause performance issues and resource consumption in your Splunk environment. You should only build data models that are necessary and relevant for your ITSI use cases.
References: Overview of modules in ITSI, [Install technical add-ons for ITSI modules]

질문 # 81
Which ITSI functions generate notable events? (Choose all that apply.)

- A. KPI anomaly detection.
- B. Multi-KPI alert.
- C. Correlation search.
- D. KPI threshold breaches.

정답： A,C,D

설명：
After you configure KPI thresholds, you can set up alerts to notify you when aggregate KPI severities change. ITSI generates notable events in Episode Review based on the alerting rules you configure.
Anomaly detection generates notable events when a KPI IT Service Intelligence (ITSI) deviates from an expected pattern.
Notable events are typically generated by a correlation search.
Reference:
https://docs.splunk.com/Documentation/ITSI/4.10.1/SI/AboutSI
A, B, and D are correct answers because ITSI can generate notable events when a KPI breaches a threshold, when a KPI detects an anomaly, or when a correlation search matches a defined pattern. These are the main ways that ITSI can alert you to potential issues or incidents in your IT environment. Reference: Configure KPI thresholds in ITSI, Apply anomaly detection to a KPI in ITSI, Generate events with correlation searches in ITSI

질문 # 82
What is the main purpose of the service analyzer?

- A. Monitor overall Service and KPI status.
- B. Display a list of All Services and Entities.
- C. Allow Analysts to add comments to Alerts.
- D. Trigger external alerts based on threshold violations.

정답： A

설명：
Reference: https://docs.splunk.com/Documentation/MSExchange/4.0.3/Reference/ServiceAnalyzer The service analyzer is a dashboard that allows you to monitor the overall service and KPI status in ITSI. The service analyzer displays a list of all services and their health scores, which indicate how well each service is performing based on its KPIs. You can also view the status and values of each KPI within a service, as well as drill down into deep dives or glass tables for further analysis. The service analyzer helps you identify issues affecting your services and prioritize them based on their impact and urgency. The main purpose of the service analyzer is:
D). Monitor overall service and KPI status. This is true because the service analyzer provides a comprehensive view of the health and performance of your services and KPIs in real time.
The other options are not the main purpose of the service analyzer because:
A). Display a list of all services and entities. This is not true because the service analyzer does not display entities, which are IT components that require management to deliver an IT service. Entities are displayed in other dashboards, such as entity management or entity health overview.
B). Trigger external alerts based on threshold violations. This is not true because the service analyzer does not trigger alerts, which

are notifications sent to external systems or users when certain conditions are met. Alerts are triggered by correlation searches or alert actions configured in ITSI.
C). Allow analysts to add comments to alerts. This is not true because the service analyzer does not allow analysts to add comments to alerts, which are notifications sent to external systems or users

질문 # 83
Which capabilities are enabled through "teams"?

- A. Teams restrict searches against the itsi_notable_audit index.
- B. Teams restrict notable event alert actions.
- C. Teams allow restrictions to service content in UI views.
- D. Teams allow searches against the itsi_summary index.

정답：D

설명：
Explanation
Teams provide presentation-layer security only and not data-level security. It's still possible for a user with access to the Splunk search bar to look up ITSI summary index data.

질문 # 84
Which of the following is a characteristic of base searches?

- A. It is possible to filter to entities assigned to the service for calculating the metrics for the service's KPIs.
- B. Search expression, entity splitting rules, and thresholds are configured at the base search level.
- C. The base search will execute whether or not a KPI needs it.
- D. The fewer KPIs that share a common base search, the more efficiency a base search provides, and anomaly detection is more efficient.

정답：A

설명：
Reference: https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/BaseSearch A base search is a search definition that can be shared across multiple KPIs that use the same data source.
Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. One of the characteristics of base searches is that it is possible to filter to entities assigned to the service for calculating the metrics for the service's KPIs. This means that you can use entity filtering rules to specify which entities are relevant for each KPI based on the base search results. References: Create KPI base searches in ITSI, [Filter entities for KPIs based on base searches]
