And you will be enjoyed one-year free updating after you make payment.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q89-Q94):

NEW QUESTION # 89

What is the first thing a business stakeholder should focus on when considering a Data Cloud implementation?

- A. Review consent and privacy management policies
- **B. Obtain cross-organizational buy-in**
- C. Identify data sources
- D. Identify activation targets

Answer: B

Explanation:

This is the first thing a business stakeholder should focus on when considering a Data Cloud implementation.

Obtaining cross-organizational buy-in involves aligning the goals and expectations of different teams and stakeholders who will use or contribute to Data Cloud. NEW QUESTION # 90

Which method should an administrator use when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK?

- A. Segment
- B. Activation
- **C. Streaming Insight**
- D. Calculated Insight

Answer: C

Explanation:

This method should be used when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK. Streaming Insight allows you to query and aggregate data from real-time streams using window functions. NEW QUESTION # 91

An organization wants to enable users with the ability to identify and select text attributes from a picklist of options. Which Data Cloud feature should help with this use case?

- A. Transformation formulas
- B. Data harmonization
- **C. Value suggestion**
- D. Global picklists

Answer: C

Explanation:

Value suggestion is a Data Cloud feature that allows users to see and select the possible values for a text field when creating segment filters. Value suggestion can be enabled or disabled for each data model object (DMO) field in the DMO record home. Value suggestion can help users to identify and select text attributes from a picklist of options, without having to type or remember the exact values. Value suggestion can also reduce errors and improve data quality by ensuring consistent and valid values for the segment filters. NEW QUESTION # 92

Which three features can be used to validate the data in the unified profile object?

- **A. Profile Explorer**
- B. Data Actions
- **C. Query API**
- D. Identity Reconciliation
- **E. Data Explorer**

Answer: A,C,E

Explanation:

These three features can be used to validate the data in the unified profile object. Data Explorer allows you to view the ingested data from different sources and how it is mapped to the unified profile object. Query API allows you to query the unified profile object using SOQL or SQL queries. Profile Explorer allows you to view the unified profile records and their attributes. References:
