New EAEP2201 Exam Notes | EAEP2201 Latest Test Pdf

Once you pass the exam and obtain the EAEP2201 certificate, your life will take place great changes. On one hand, your job career will become more promising. All tasks will be finished excellently and efficiently because you have learned many useful skills from our EAEP2201 training guide. On the other hand, you will get more opportunities to be employed by the big company and get a brighter future with the EAEP2201 certification.

Esri Enterprise Administration Professional 2201 Sample Questions (Q68-Q73):

NEW QUESTION # 68
A GIS administrator must determine which type of service to use when publishing a new basemap for the organization. The basemap must meet several requirements:
* Support offline workflows
* Use as little storage space as possible
* High-resolution display
* Easily incorporate data updates periodically made to a feature service Which service type should be used?

- A. Dynamic map service
- B. Vector tile service
- C. Cached map service

Answer: A

NEW QUESTION # 69
ArcGIS Server is installed with its Web Adaptor on the same server. The configuration is as follows:
* ArcGIS Server is federated with Portal for ArcGIS
* Portal is set up to use Integrated Windows Authentication
* The environment was set up using a domain certificate
* The attempted login account is a Windows account with admin privileges A GIS administrator tries to connect to ArcGIS Server Manager through ArcGIS Web Adaptor but the connection fails. Why did the connection fail?

- A. The Web Adaptor was not set to allow administrative access to the server
- B. The connection must be made with an internal admin account and not a Windows account
- C. The certificate must come from a valid Certificate Authority and not a Domain Certificate Authority

Answer: C

NEW QUESTION # 70
A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.
Which action should the administrator perform?

- A. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- B. Open ArcGIS Server statistics to create a report for commonly used items.
- C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.

Answer: C

Explanation:
Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.
ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

NEW QUESTION # 71
An organization expects a large influx of users who use the standard analysis tools in the portal Map Viewer.
The organization is concerned with the hosting server's available resources.
Which system resource should be closely monitored?

- A. Network utilization
- B. CPU utilization
- C. Disk activity

Answer: B

Explanation:

When users perform standard analysis tasks in the portal Map Viewer, the hosting server executes geoprocessing operations that are computationally intensive. These operations require significant CPU resources. Monitoring CPU utilization helps ensure that the server can handle the increased load without performance degradation.

While disk activity and network utilization are important, they are less directly impacted by standard analysis tasks compared to CPU usage. Therefore, CPU utilization is the primary resource to monitor in this scenario.

NEW QUESTION # 72

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- B. Open ArcGIS Server statistics to create a report for commonly used items.
- C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.

Answer: C

Explanation:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.
