As to some exam candidate are desperately eager for useful Associate-Cloud-Engineer actual tests, our products help you and other customer who are having an acute shortage of efficient practice materials.

Google Associate Cloud Engineer Exam Sample Questions (Q248-Q253):

NEW QUESTION # 248
Your application stores files on Cloud Storage by using the Standard Storage class. The application only requires access to files created in the last 30 days. You want to automatically save costs on files that are no longer accessed by the application. What should you do?

- A. Enable object versioning on the storage bucket and add lifecycle rules to expire non-current versions after 30 days
- B. Create an object lifecycle on the storage bucket to change the storage class to Archive Storage for objects with an age over 30 days.
- C. Create a retention policy on the storage bucket of 30 days, and lock the bucket by using a retention policy lock.
- D. Create a cron job in Cloud Scheduler to call a Cloud Functions instance every day to delete files older than 30 days.

Answer: B

NEW QUESTION # 249
You are configuring Cloud DNS. You want !to create DNS records to point home.mydomain.com, mydomain.
com. and www.mydomain.com to the IP address of your Google Cloud load balancer. What should you do?

- A. Create one A record to point mydomain.com to the load balancer, and create two CNAME records to point WWW and HOME to mydomain.com respectively.
- B. Create one CNAME record to point mydomain.com to the load balancer, and create two A records to point WWW and HOME lo mydomain.com respectively.
- C. Create one A record to point mydomain.com lo the load balancer, and create two NS records to point WWW and HOME to mydomain.com respectively.
- D. Create one CNAME record to point mydomain.com to the load balancer, and create two AAAA records to point WWW and HOME to mydomain.com respectively.

Answer: A

NEW QUESTION # 250
You are configuring service accounts for an application that spans multiple projects. Virtual machines (VMs) running in the web-applications project need access to BigQuery datasets in crm-databases-proj. You want to follow Google-recommended practices to give access to the service account in the web-applications project.
What should you do?

- A. Give "project owner" role to crm-databases-proj and the web-applications project.
- B. Give "project owner" role to crm-databases-proj and bigquery.dataViewer role to web-applications.
- C. Give bigquery.dataViewer role to crm-databases-proj and appropriate roles to web-applications.
- D. Give "project owner" for web-applications appropriate roles to crm-databases- proj

Answer: B

NEW QUESTION # 251
You have recently joined a startup who is migrating their infrastructure from AWS to Google Cloud. A junior was assigned the task of migrating one of their web server with Amazon Linux OS from AWS to GCP in a public subnet of custom VPC. He was able to migrate the instance successfully but is unable to get SSH access of migrated instance. What are the possible steps to look for? (Multiple Answer)

- A. Google Cloud does not support Amazon Linux images because of market competition.
- B. Ask if he has added SSH key to the instance while launching phase.
- C. Make sure the firewall is attached to the instance with tcp port 22 open.
- D. Check if he has attached correct firewall rule with port udp:22 open to the instance.

Answer: B,C

NEW QUESTION # 252

You have set a firewall rule that will permit inbound connections to a VM instance named server-2.
You want to apply this rule only if there is not another rule that would deny that traffic. What priority would you give to this rule?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
If the rule will have the lowest priority, it will permit inbound traffic/ connections to the VM instance server-2. The large will be the number, the low will be the priority. The lowest priority will ensure that the other rules that match will apply. So, the largest number should be selected to make the priority lowest.

NEW QUESTION # 253

......
