Formative Quiz 2

- Due Jan 15 at 11:59pm
- Points 5
- Questions 5
- Available Jan 15 at 12am - Jan 15 at 11:59pm 23 hours and 59 minutes
- Time Limit None
- Allowed Attempts Unlimited

Instructions

This quiz is intended to help you identify and reflect on your strengths and weaknesses in the development of unit 10.

It also provides you with feedback whenever you make a mistake, so that you know what points need to be reviewed.

Additional practice is also suggested in the MyEnglishLab platform, so make sure you work on those exercises to consolidate your knowledge.

It consists of 5 multiple choice items.

To answer, read the statement and choose the one alternative that is best.

You may take it multiple times as it is not graded.

Study CV0-004 Center & CV0-004 Instant Download

These formats hold high demand in the market and offer a great solution for quick and complete CompTIA CV0-004 exam preparation. These formats are CompTIA CV0-004 PDF dumps, web-based practice test software, and desktop practice test

software. All these three CompTIA Cloud+ (CV0-004) Certification Exam (CV0-004) exam questions contain the real, valid, and updated CompTIA Exams that will provide you with everything that you need to learn, prepare and pass the challenging but career advancement CV0-004 certification exam with good scores.

CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q93-Q98):

NEW QUESTION # 93

A developer is building a new application version using a CI/CD pipeline. The developer receives the following error message log when the build fails:

```
Traceback (most recent call last):
  File "app.py", line 4, in <module>
    import requests
ModuleNotFoundError: No module named 'requests'
```

Which of the following is the most likely cause of this failure?

- A. Test case failure
- B. Broken build pipeline
- C. Dependency issue
- D. Incorrect version

Answer: C

Explanation:

The error message indicates that the 'requests' module, which is a dependency, is not found. The failure is most likely due to the 'requests' library not being installed or not included in the environment where the application is running.

NEW QUESTION # 94

Which of the following is used to deliver code quickly and efficiently across the development, test, and production environments?

- A. VM template
- B. Container image
- C. Snapshot
- D. Serverless function

Answer: B

Explanation:

A container image is used to deliver code quickly and efficiently across the development, test, and production environments. Container images are lightweight, standalone, executable software packages that include everything needed to run a piece of software, including the code, runtime, system tools, libraries, and settings.

NEW QUESTION # 95

A company that has several branches worldwide needs to facilitate full access to a specific cloud resource to a branch in Spain. Other branches will have only read access. Which of the following is the best way to grant access to the branch in Spain?

- A. Create a network security group with required permissions for users in Spain.
- B. Implement an IPS/IDS to detect unauthorized users.
- C. Set up MFA for the users working at the branch.
- D. Apply a rule on the WAF to allow only users in Spain access to the resource.

Answer: A

Explanation:

The best way to grant full access to a specific cloud resource to a branch in Spain, while other branches have only read access, is to create a network security group with the required permissions.

This group can be configured to allow full access to users within the branch's IP range while restricting others to read-only access.

NEW QUESTION # 96

A cloud engineer is designing a cloud-native, three-tier application. The engineer must adhere to the following security best practices:

- * Minimal services should run on all layers of the stack.
- * The solution should be vendor agnostic.
- * Virtualization could be used over physical hardware.

Which of the following concepts should the engineer use to design the system to best meet these requirements?

- **A. Micro services**
- B. Cloud-provided managed services
- C. Fan-out
- D. Virtual machine

Answer: A

Explanation:

Microservices architecture is the most suitable design principle that aligns with the security best practices mentioned. It involves developing a suite of small services, each running in its own process and communicating with lightweight mechanisms, often an HTTP resource API. This architecture minimizes the services running on each layer, allows for vendor-agnostic solutions, and is well-suited for virtualization over physical hardware.

Microservices as an architectural approach is discussed in the context of cloud-native applications within the CompTIA Cloud+ material.

NEW QUESTION # 97

A cloud engineer is troubleshooting a connectivity issue. The application server with IP 192.168.1.10 in one subnet is not connecting to the MySQL database server with IP 192.168.2.20 in a different subnet. The cloud engineer reviews the following information:

Inbound rules	Outbound rules
PERMIT ANY 443	PERMIT ANY 443
ENY ANY ANY	PERMIT ANY 3306
	PERMIT ANY 53
	DENY ANY ANY

Destination	Gateway
Default	192.168.1.1
92.168.1.0/24	Local

Inbound rules	Outbound rules
PERMIT 192.168.1.10/32 306	DENY ANY ANY
ENY ANY ANY	

Destination	Gateway
92.168.2.0/24	192.168.1.1
92.168.1.0/24	Local

Which of the following should the cloud engineer address to fix the communication issue?

- A. The Application Server Subnet Routing Table
- B. The MySQL Server Subnet Routing Table
- **C. The MySQL Server Stateful Firewall**
- D. The Application Server Stateful Firewall

Answer: C

Explanation:

The connectivity issue between the application server and the MySQL database server in different subnets is likely due to the

MySQL Server Stateful Firewall's inbound rules. The application server has an IP of 192.168.1.10, but the MySQL server's inbound rules only permit IP 192.168.1.10/32 on port 3306. This rule allows only a single IP address (192.168.1.10) to communicate on port 3306, which is typical for MySQL. However, if the application server's IP is not 192.168.1.10 or the application is trying to communicate on a different port, it would be blocked. To fix the communication issue, the cloud engineer should address the inbound rules on the MySQL Server Stateful Firewall to ensure that the application server's IP address and the required port are allowed.

NEW QUESTION # 98

.....

TestsDumps offers authentic and actual CV0-004 dumps that every candidate can rely on for good preparation. Our top priority is to give you the most reliable prep material that helps you pass the CV0-004 Exam on the first attempt. In addition, we offer up to three months of free CompTIA Cloud+ (CV0-004) Certification Exam questions updates.

Study CV0-004 Center: https://www.testsdumps.com/CV0-004_real-exam-dumps.html

CV0-004 Online test engine is convenient and easy to learn, and it has testing history and performance review, if you like this mode, you can choose this version, The frequent updates feature, ensure that the candidates' knowledge is up to date and they can prepare for an exam anytime they want, this updated Study CV0-004 Center training material feature is the biggest cause of the success of our candidates in Study CV0-004 Center, Our CV0-004 test prep materials are the up-to-dated and compiled by professional experts with latest exam information.

Since then, his research, teaching, and consulting activities have focused CV0-004 Reliable Study Questions on the discovery of systematic and practical ways to help businesses achieve quality growth that is not only exceptional but also sustainable.

100% TestsDumps CV0-004 Practice Questions get Pass

Adding and Removing Shapes with the Text Pane, CV0-004 Online Test engine is convenient and easy to learn, and it has testing history and performance review, if you like this mode, you can choose this version.

The frequent updates feature, ensure that the CV0-004 Test Discount candidates' knowledge is up to date and they can prepare for an exam anytime they want, this updated CompTIA Cloud+ training material CV0-004 feature is the biggest cause of the success of our candidates in CompTIA Cloud+.

Our CV0-004 test prep materials are the up-to-dated and compiled by professional experts with latest exam information, Our efficient staff is always prompt to respond you.

Except the help of CV0-004 TestsDumps training materials, you should do an action plan for the CV0-004 certification exams.
