

Windows-based SAP C_TS422_2023 Practice Exam Software

DOWNLOAD the newest Actualtests4sure C_TS422_2023 PDF dumps from Cloud Storage for free:
https://drive.google.com/open?id=1gtfQgiwptAcfb_4r02Jg37igqLCQUZ_N

our company made our C_TS422_2023 practice guide with accountability. Our C_TS422_2023 training dumps are made by our C_TS422_2023 exam questions responsible company which means you can gain many other benefits as well. We offer free demos of our for your reference, and send you the new updates if our experts make them freely. What is more, we give some favorable discount on our C_TS422_2023 Study Materials from time to time, which mean that you can have more preferable price to buy our products.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Capacity Planning in SAP S• 4HANA: This section covers a discussion of SAP S• 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 2	<ul style="list-style-type: none">• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.
Topic 3	<ul style="list-style-type: none">• Process Orders in SAP S• 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.
Topic 4	<ul style="list-style-type: none">• Material Requirements Planning in SAP S• 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.

Topic 5	<ul style="list-style-type: none"> • Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.
Topic 6	<ul style="list-style-type: none"> • Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
Topic 7	<ul style="list-style-type: none"> • Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

Valid Test C_TS422_2023 Bootcamp, Answers C_TS422_2023 Real Questions

After taking a bird's eye view of applicants' issues, Actualtests4sure has decided to provide them with the real C_TS422_2023 Questions. These C_TS422_2023 dumps pdf is according to the new and updated syllabus so they can prepare for C_TS422_2023 certification anywhere, anytime, with ease. A team of professionals has made the product of Actualtests4sure after much hard work with their complete potential so the candidates can prepare for SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice test in a short time.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q13-Q18):

NEW QUESTION # 13

How can you limit the validity of a bill of material (BOM)? Note: There are 2 correct answers to this question,

- **A. By Plant**
- B. By Industry
- **C. By Period**
- D. By Material Status

Answer: A,C

Explanation:

You can limit the validity of a BOM by plant and by period. The plant determines the organizational area of validity for the BOM, and you can assign the same BOM to different or further plants if the prerequisites are met. The period of validity for a BOM is restricted by the valid-from date and the valid-to date in the BOM header and item, which determine when the BOM becomes effective and when it ends. Reference: Validity of Bills of Material, BOM Item Validity

NEW QUESTION # 14

Where do you maintain the work center that represents the production line for repetitive manufacturing? Note: There are 2 correct answers to this question.

- **A. Routing**
- B. Production cost collector
- **C. Production version**
- D. Repetitive manufacturing profile

Answer: A,C

Explanation:

In SAP S/4HANA repetitive manufacturing, the production line is represented by a work center, and this is maintained in:

* Production version(B): The production version (material master, MRP 4 view, transaction C223) links a material to a specific production line by referencing a work center (via the routing or rate routing).

The "Production Line" field explicitly identifies the work center used for repetitive production, tying it to the planning table (MF50).

* Routing(D): In repetitive manufacturing, a rate routing (transaction CA21) or standard routing (CA01) defines the operations and assigns the work center (field: Work Center) that represents the production line. This work center is then referenced in the production version for planning and execution.

Production cost collector(A) (transaction KKF6N) collects costs for repetitive production but doesn't define the work center-it uses the production version's data.

Repetitive manufacturing profile(C) (Customizing, transaction OSP2) controls REM settings (e.g., backflushing), not the specific work center assignment. This is per SAP's REM master data setup.

NEW QUESTION # 15

Your company manufactures materials whose characteristics differ for each manufacturing process. Which application do you have to use in SAP S/4HANA Cloud Private Edition to be able to track and use this information in all areas of logistics?

- A. Batch management
- B. Quality management
- C. Engineering change management
- D. Process order management

Answer: A

Explanation:

In SAP S/4HANA Cloud Private Edition, tracking materials with varying characteristics across manufacturing processes and logistics requires:

* Batch management(D): Batch management (activated in material master, MM01, General Plant Data /Storage view, field: Batch Management) assigns unique batch numbers to materials (e.g., via MSC1N).

It tracks characteristics (e.g., viscosity, color) via classification (CL02, linked in MSC2N), ensuring this information is available in all logistics areas-production (e.g., CO11N goods issue), inventory (MMBE), and sales (VA01 batch determination). This is ideal for materials like chemicals with process- specific traits.

Process order management(A) (COR1) executes production but relies on batch management for characteristic tracking-it's not the tracking tool itself.

Engineering change management(B) (CC01) manages design changes, not runtime characteristics.

Quality management(C) (e.g., QA01) inspects batches but doesn't track characteristics across logistics-batch management underpins it. This is per SAP's batch management capabilities.

NEW QUESTION # 16

What does forecasting in the demand planning cycle include? Note: There are 3 correct answers to this question.

- A. One-off events
- B. Past production planning quantities
- C. Past quotation quantities
- D. Market intelligence
- E. Past sales order quantities

Answer: A,D,E

Explanation:

Forecasting in SAP S/4HANA's demand planning cycle, managed via transaction MC87 or MD61, generates planned independent requirements (PIRs) based on historical data and external factors. The process includes:

* One-off events(A): These are special occurrences (e.g., promotions, trade shows) that can be manually entered or factored into forecast models (e.g., using event-based forecasting in the forecast profile) to adjust demand predictions.

* Market intelligence(D): This refers to external data or insights (e.g., market trends, competitor actions) that planners can incorporate into forecasting models, often manually or via integration with tools like SAP Integrated Business Planning (IBP).

* Past sales order quantities(E): Historical sales data (from transaction MD73 or LIS) is a core input for statistical forecasting models (e.g., constant, trend, seasonal models), allowing the system to predict future demand based on past consumption.

Past production planning quantities(B) are not typically used in demand forecasting, as they reflect supply rather than demand.

Past quotation quantities(C) could influence sales forecasting in some scenarios but are not a standard input in SAP's demand planning cycle, which focuses on confirmed sales orders. This aligns with SAP's forecasting methodology in Demand Management.

NEW QUESTION # 17

Which time elements are relevant for lead time scheduling of a production order?

Note: There are 2 correct answers to this question.

- A. Opening period
- B. Float after production
- C. Setup time
- D. Total replenishment lead time

Answer: B,C

NEW QUESTION # 18

.....

If you decide to buy our C_TS422_2023 study questions, you can get the chance that you will pass your exam and get the certification successfully in a short time. we can claim that if you study with our C_TS422_2023 exam questions for 20 to 30 hours, then you will be easy to pass the exam. In a word, if you want to achieve your dream and become the excellent people in the near future, please buy our C_TS422_2023 Actual Exam, it will help you get all you want!
