

Salesforce-MuleSoft-Developer-I Exam Reviews | Trustworthy Salesforce-MuleSoft-Developer-I Source

What's more, part of that Pass4cram Salesforce-MuleSoft-Developer-I dumps now are free: <https://drive.google.com/open?id=1rvIKXNkYp0jAymJP9r4Qhvb0u3IfIPai>

Pass4cram has focus on offering the accurate and professional exam dumps for Salesforce certification test. All questions and answers of Salesforce-MuleSoft-Developer-I are written by our IT experts who has more than 10 years' experience in IT filed. With the help of our Salesforce-MuleSoft-Developer-I Dumps Torrent, you will get high passing score in the test with less time and money.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 2	<ul style="list-style-type: none"> Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 3	<ul style="list-style-type: none"> Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.
Topic 4	<ul style="list-style-type: none"> Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 5	<ul style="list-style-type: none"> Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 6	<ul style="list-style-type: none"> Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 7	<ul style="list-style-type: none"> Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.

Topic 8

- Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.

Trustworthy Salesforce-MuleSoft-Developer-I Source, Salesforce-MuleSoft-Developer-I Reliable Test Braindumps

We can confidently say that our Salesforce-MuleSoft-Developer-I training quiz will help you. First of all, our company is constantly improving our Salesforce-MuleSoft-Developer-I exam materials according to the needs of users. As you can see that there are three versions of our Salesforce-MuleSoft-Developer-I learning questions on our website for you to choose: the PDF, Software and APP online. As long as you have a try on our Salesforce-MuleSoft-Developer-I study prep, you will want our Salesforce-MuleSoft-Developer-I study materials to prepare for the exam for sure.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q198-Q203):

NEW QUESTION # 198

Refer to the exhibit.

Error handling

The Mule application is debugged in Any point Studio and stops at the breakpoint. What is the value of the payload displayed in the debugger at this breakpoint?

- A. Complete"
- B. "Processing"
- C. 0
- D. "Start"

Answer: D

NEW QUESTION # 199

Refer to the exhibits.

The screenshot shows the MuleSoft Studio interface for a flow named 'acceptOrder'. The flow consists of three main steps: an HTTP listener for 'HTTP: POST /order', a 'Write' operation, and a 'Set Payload' operation with the value 'File written'. Below the flow, the 'Error handling' section is expanded, showing three error handling configurations:

- On Error Continue** type: FILE:CONNECTIVITY
- On Error Continue** type: ORDER:NOT_CREATED
- On Error Propagate** when: #[true]

The 'Write' operation's 'Error Mapping' tab is also visible, showing 'There are no errors.' and an empty 'Error types to be mapped' field.

```

<flow name="acceptOrder">
  <http:listener doc:name="HTTP: POST /order" config-ref="Listener_config"
    path="/order" allowedMethods="POST">
    <http:error-response >
      <http:body ><![CDATA[#[output text/plain --- payload]]]></http:body>
    </http:error-response>
  </http:listener>
  <file:write doc:name="Write" config-ref="File_Config" path="newOrder.json">
    <error-mapping sourceType="FILE:CONNECTIVITY" targetType="ORDER:NOT_CREATED" />
    <file:content ><![CDATA[#[output application/json --- payload]]]></file:content>
  </file:write>
  <set-payload value="#['File written']" doc:name='File written' />
</flow>

```

A web client sends a POST request with the payload { "oid": "1000", "itemid": "AC200", "qty": "4" } to the Mule application. The File Write operation throws a FILE:CONNECTIVITY error. What response message is returned to the web client?

- A. "FILE:CONNECTIVITY"
- B. "File written"
- C. "ORDER:NOT_CREATED"
- D. "OTHER ERROR"

Answer: C

NEW QUESTION # 200

To avoid hard-coding values, a flow uses some property placeholders and the corresponding values are stored in a configuration file. Where does the configuration file's location need to be specified in the Mule application?

- A. a flow attribute
- B. A global element
- C. The mule-artifact.json file
- D. The pom.xml file

Answer: B

Explanation:

Correct answer is A global element

When we create a configuration file, that file needs to be added as a Global Configuration file in the Global element. A global element is a reusable object containing parameters that any number of elements in a flow can share. You reference a global element from Anypoint Connectors or components in your Mule application.

NEW QUESTION # 201

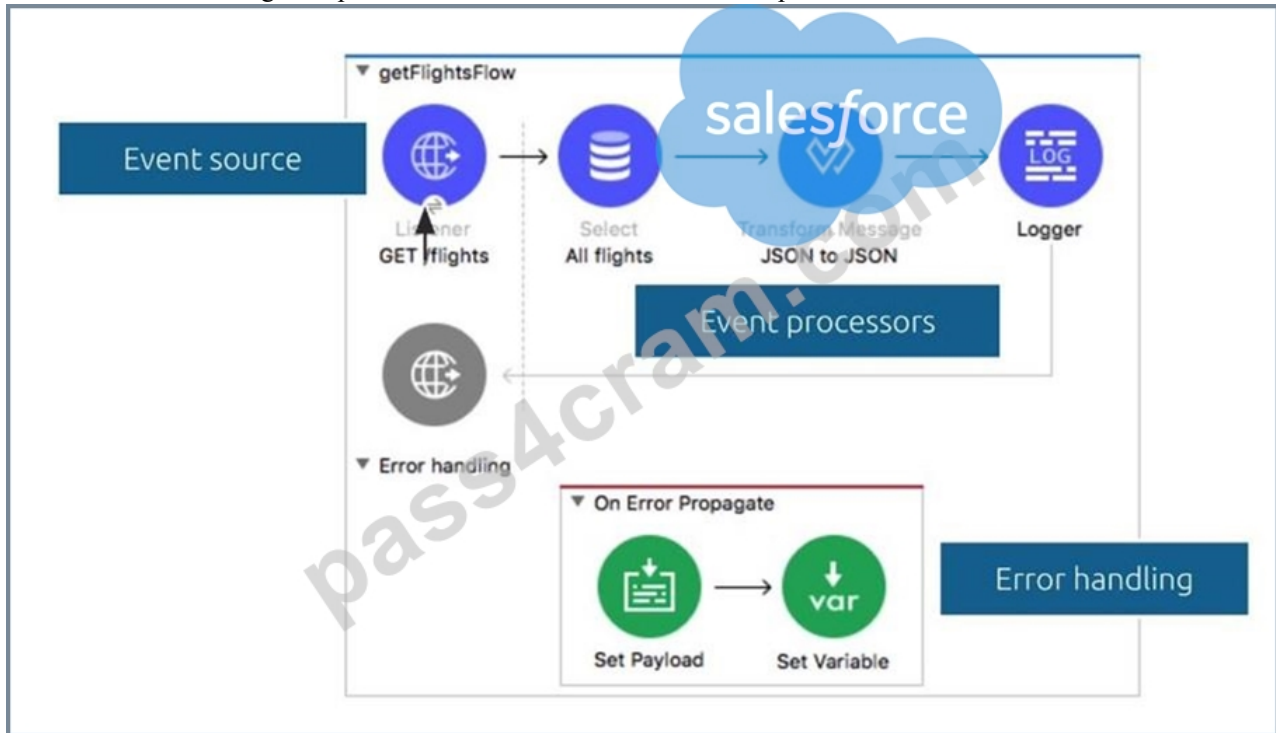

What is the minimal requirement in a flow for a Mule application to compile?

- A. Event Processors
- B. Event Source
- C. Source and processors both
- D. Error handlers

Answer: A

Explanation:

Process section is must to get compiled. Process section must have one or more processors

NEW QUESTION # 202

Refer to the exhibit.

What payload is returned from a request to <http://localhost.8081/>

Refer

to the exhibits, what payload is returned from a request to <http://localhost;8081/?>

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

The flow can be described as below. 1) First HTTP POST request is made in which payload is set to 1 and it gets returned to our main flow. 2) Second call is initiated for JMS Publish Consume JMS: num1 which adds 1 to the payload which makes it 2. Note that publish-consume is a synchronous operation. Hence payload is returned to main flow. 3) Third call is initiated for JMS Publish Consume JMS: num2 which adds 1 to the payload. Note that publish-consume is an asynchronous operation. Hence payload is never returned to main flow. So payload in main flow is still 2. 4) Finally Set Payload increments payload by 1 making payload as 3 which is returned by the flow. Hence option 3 is the correct answer.

NEW QUESTION # 203

.....

You can write down your doubts or any other question of our Salesforce Certified MuleSoft Developer (Mule-Dev-201) test questions. We warmly welcome all your questions. Our online workers are responsible for solving all your problems with twenty-four hours service. You still can enjoy our considerate service after you have purchased our Salesforce-MuleSoft-Developer-I test guide. If you don't know how to install the study materials, our professional experts can offer you remote installation guidance. Also, we will offer you help in the process of using our Salesforce-MuleSoft-Developer-I Exam Questions. Also, if you have better suggestions to utilize our study materials, we will be glad to take it seriously. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!
