P.S. Free 2026 Snowflake GES-C01 dumps are available on Google Drive shared by PDFVCE: https://drive.google.com/open?id=1BNnQm0IDjOzs35PLG_rXO0zZmcCdjpb

Our GES-C01 exam questions provide with the software which has a variety of self-study and self-assessment functions to detect learning results. This function is conducive to pass the GES-C01 exam and improve you pass rate. Our software is equipped with many new functions, such as timed and simulated test functions. After you set up the simulation test timer with our GES-C01 Test Guide which can adjust speed and stay alert, you can devote your mind to learn the knowledge. There is no doubt that the function can help you pass the GES-C01 exam.

It is known to us that our GES-C01 study materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the GES-C01 study materials. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the GES-C01 Study Materials from our company, you will get the certification in a shorter time.

For the complete SnowPro® Specialty: Gen AI Certification Exam exam preparation and success, the PDFVCE GES-C01 exam practice test questions are the best choice. With the Snowflake GES-C01 Exam Questions, you will get everything that you need to learn, prepare and succeed in the SnowPro® Specialty: Gen AI Certification Exam certification exam. You must add Snowflake GES-C01 Exam Questions in your preparation and should not ignore them.

Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q184-Q189):

NEW QUESTION # 184

- A.
- B. Data for all these operations remains within Snowflake's governance boundary.
- C.
- D.
- E.

Answer: B

Explanation:

Option D is correct. All the mentioned Snowflake Cortex AI functions (e.g., 'SNOWFLAKE.CORTEX.COMPLETE') are designed to operate within Snowflake's governance boundary under default configurations. uses Snowflake's proprietary Arctic-TILT model for document extraction, keeping data within the platform. Snowflake Cortex AI functions, including embedding and completion models like 'mistral-large?', are fully hosted and managed by Snowflake, ensuring data remains secure and in place. While 'REGION' allows processing in a different region, user inputs and outputs are not stored or cached, maintaining data within Snowflake's overall control. Therefore, no data egress to a third-party LLM provider occurs in these steps. Options A, B, and C are incorrect as they contradict the principle of Snowflake-hosted and managed AI features. Option E is incorrect because the 'CORTEX MODELS ALLOWLIST' restricts which models can be used, but it does not dictate data egress, as the allowed models are still Snowflake-hosted.

NEW QUESTION # 185

A data engineer is tasked with implementing a product recommendation system in Snowflake. They have pre-computed product embeddings and want to find similar items using VECTOR_COSINE_SIMILARITY. They are evaluating options for interacting with this function. Which of the following statements is TRUE regarding the use of VECTOR_COSINE_SIMILARITY and Snowflake's VECTOR data type?

- A. A column defined as
- B.
- C. Direct comparison operators like
- D. The maximum dimension supported by the
- E. The

Answer: B

Explanation:

Option A is incorrect because the Snowpark Python library does not directly support the VECTOR data type in Snowflake is 4096, not 768. Option D is incorrect. Direct vector comparisons using operators like < and > on VECTOR columns and is supported when using the Snowflake Python Connector.

NEW QUESTION # 186

A security administrator needs to manage access to Snowflake Cortex LLM functions and models, and ensure compliant usage across different regions for various teams. Which configuration options and parameters are relevant for these requirements?

- A. Option D
- B. Option C
- C. Option B

- D. Option E
- E. Option A

Answer: B,C,E

Explanation:

NEW QUESTION # 187

A data engineering team is optimizing an AI-infused pipeline that processes millions of rows of customer interaction data in a LOG_DATA table using various Snowflake Cortex AI functions. They need to accurately estimate costs and ensure optimal performance. Which of the following statements regarding cost, performance, and operational considerations for these functions are true?

- A. Option D
- B. Option C
- C. Option B
- D. Option A
- E. Option E

Answer: B,D,E

Explanation:

NEW QUESTION # 188

A Gen AI specialist is preparing to upload a large volume of diverse documents to an internal stage for Document AI processing. The objective is to extract detailed information, including lists of items and potentially classifying document types, and then automate this process. Which of the following statements represent 'best practices or important considerations/limitations' when preparing documents and setting up the Document AI workflow in Snowflake? (Select ALL that apply.)

- A. When defining data values for extraction, especially for nonstandard formats or combinations of values, fine-tuning the model with annotations is generally more effective than relying solely on complex prompt engineering.
- B. Documents with a page count exceeding 125 pages or a file size greater than 50 MB will be processed, but with a potential reduction in extraction accuracy.
- C. If the Document AI model does not find an answer for a specific field, the '!PREDICT method will omit the 'value' key but will still return a 'score' key to indicate confidence that the answer is not present.
- D. To improve model training, documents uploaded should represent a real use case, and the dataset should consist of diverse documents in terms of both layout and data.
- E. For continuous processing of new documents, it is best practice to create a stream on the internal stage and a task to automate the '!PREDICT method execution.

Answer: A,C,D,E

Explanation:

NEW QUESTION # 189

.....

All these three PDFVCE's Snowflake GES-C01 exam dumps formats contain the real and updated Snowflake GES-C01 practice test. These Snowflake GES-C01 pdf questions are being presented in practice test software and PDF dumps file formats. The Snowflake GES-C01 desktop practice test software is easy to use and install on your desktop computers. Whereas the other Snowflake GES-C01 web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.
