Microsoft MB-335 Exam Simulator, MB-335 Valid Test Practice

After the user has purchased our MB-335 learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our MB-335 Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the MB-335 qualification question. Once you have submitted your practice time, MB-335 study tool system will automatically complete your operation.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q32-Q37):

NEW QUESTION # 32

You need to configure the system for plastic operations.

Which two parts should be manually reported as finished? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. mold tooling
- B. excess plastic
- C. machined plastic pieces
- D. unmachined plastic pieces

Answer: C,D

NEW QUESTION # 33

A company has manufacturing sites that process different types of production orders using highly specialized equipment.

Released production orders have been processing for an excessive amount of time while the system tries to find a viable route that conforms to the constraints specified in the system.

The system must automatically time out if a viable solution is not found after 120 seconds.

You need to configure the automatic timeout.

Which form should you use for each configuration? To answer, drag the appropriate forms to the correct configurations. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 34

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

- * Create a purchase agreement for the subcontracting vendor and add SP-01 as the painting service.
- * Create a vendor resource then create a work cell for outsourced painting and add the resource to the work cell.
- * Create a production flow process activity for the painting work cell and add the component to be painted as a picking activity.
- * Create a server term to tie the purchase agreement to the activity.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

The solution does not meet the goal. Here is the explanation:

To create a subcontracting activity for the painting service, you should use the following steps1:

Create a vendor warehouse for the subcontracting vendor. This step is missing in the solution, but it is required to track the inventory that is located at the vendor's site. You need to create a warehouse that is assigned to the vendor account and set it as vendor-managed1.

Create a vendor resource and add it to a new work cell for outsource painting. This step is correct, because you need to create a resource that is assigned to the vendor account and add it to a resource group that represents the subcontracting work cell1. This

way, you can assign the subcontracting activity to the vendor resource.

Create a production flow process activity for the painting work cell and add the component to be painted as a picking activity. This step is incorrect, because you need to add the service item (SP-01) as the product of the process activity, not the component to be painted¹. The service item represents the subcontracting service that is provided by the vendor. You also need to select the Generate license plate option on the mobile device menu item that is used for reporting as finished¹.

Create a purchase agreement for the subcontracting vendor and add SP-01 as the painting service. This step is correct, because you need to create a purchase agreement that defines the terms and conditions for purchasing the subcontracting service from the vendor¹. You also need to add a purchase agreement line for SP-01 and specify the quantity and price of the service.

Create a service term to tie the purchase agreement to the activity. This step is incorrect, because you need to create a service term that links the purchase agreement line to the production flow process activity¹. A service term defines how a service item is consumed in production and how it is invoiced by the vendor.

¹: Activity-based subcontracting

NEW QUESTION # 35

A company uses the production control module in Dynamics 365 Supply Chain Management.

Production workers require precise instructions to know which tools and parts to use and how to use them when the workers put things together during the assembly process.

You need to configure the system to initiate mixed reality Dynamics 365 Guides for production workers.

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

NEW QUESTION # 36

A process manufacturing company is implementing Dynamics 365 Supply Chain Management. The company will use multiple process manufacturing functionalities including by-products.

You need to configure by-product formula allocation methods.

Which methods should you use? To answer, drag the appropriate by-product burden allocation methods to the correct scenarios.

Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

A white background with black text AI-generated content may be incorrect.

NEW QUESTION # 37

.....

Candidates who want to be satisfied with the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) preparation material before buying can try a free demo.
