SAP C-SEC-2405 Exam Dumps | C-SEC-2405 Real Dump

Our key priority is to provide such authentic SAP C-SEC-2405 Exam Material which helps the candidate qualify for SAP Certified Associate - Security Administrator C-SEC-2405 exam on the very first attempt. This means that you can download the product right after purchasing and start your journey toward your big career.

SAP Certified Associate - Security Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which tool can you use to modify the entities schema content across multiple repositories?

- A. SAP BTP Account Explorer
- B. SAP Business Application Studio
- C. SAP Cloud Identity Services Schemas app
- D. SAP Cloud Identity Services Transformation Editor

Answer: C

NEW QUESTION # 38

Which protocol is the industry standard for provisioning identity and access management in hybrid landscapes?

- A. SSL
- B. SCIM
- C. OIDC
- D. SAML

Answer: B

Explanation:

The System for Cross-domain Identity Management (SCIM) is the industry standard protocol for provisioning identity and access management in hybrid landscapes. SCIM enables automated user provisioning and deprovisioning across different systems, including cloud and on-premise environments, by standardizing the exchange of user identity data. It supports operations like creating, updating, and deleting user accounts, making it ideal for managing identities in hybrid SAP landscapes where integration between SAP Cloud Identity Services and on-premise systems is required. SAML (Security Assertion Markup Language) is used for single sign-on authentication, not provisioning. OIDC (OpenID Connect) is an authentication protocol built on OAuth, and SSL (Secure Sockets Layer) is a security protocol for data encryption, not identity provisioning. SCIM's role as a provisioning standard ensures efficient and secure identity management, reducing administrative overhead and enhancing interoperability in complex SAP and non-SAP hybrid environments.

NEW QUESTION # 39

To connect to data sources that are NOT all based on OData, which of the following options does SAP recommend you use?

- A. SAP Integration Suite
- B. OData Provisioning service
- C. SAP Process Integration
- D. Cloud connector

Answer: A

NEW QUESTION # 40

When segregating the duties for user and role maintenance, which of the following should be part of a decentralized treble control strategy for a production system? Note: There are 3 correct answers to this question.

- A. One user administrator per application area in the production system
- B. One user administrator per production system
- C. One decentralized role administrator
- D. One authorization profile administrator
- E. One authorization data administrator

Answer: B,C,E

Explanation:

A decentralized treble control strategy for user and role maintenance in a production system involves distributing responsibilities to ensure segregation of duties. One user administrator per production system is recommended to manage user master records, ensuring centralized control over user creation and assignment within each system. One authorization data administrator is responsible for maintaining authorization objects and values within roles, ensuring that permissions are correctly defined. One decentralized role administrator handles role creation and assignment, allowing flexibility across different business units or applications while maintaining oversight. Having one user administrator per application area (option A) is too granular and risks inconsistency in a production system. A single authorization profile administrator (option C) is not ideal, as profile generation is typically automated within PFCG, and the role is less distinct in a decentralized strategy.

This treble control approach enhances security by preventing any single individual from controlling all aspects of access, aligning with SAP's best practices for governance and compliance.

NEW QUESTION # 41

When planning an authorization concept for your SAP S/4HANA Cloud Public Edition implementation, what rules must you consider? Note: There are 2 correct answers to this question.

- **A. Business roles can be assigned directly to a business user.**
- B. SAP Fiori apps, dashboards, and displays can be assigned directly to a business role.
- C. Business catalogs can be assigned directly to a business user.
- **D. Business catalogs can be assigned directly to a business role.**

Answer: A,D

NEW QUESTION # 42

.....

We respect privacy of buyers, and if you buying C-SEC-2405 exam materials from us, we will ensure you that your personal information such as name and email address will be protected well and we won't send junk mail to you. We can tell you that once you finish buying the C-SEC-2405 exam dumps, your personal information will be concealed. Moreover C-SEC-2405 Exam Dumps are famous for high quality, and you can pass the exam just one time. Free demo will offer to you, so that you can have a try before buying. If you indeed have other questions, just contact us.
