Free PDF Quiz Marvelous SAP - C-ACDET-2506 - Latest SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Test Sample

Our PDF version of C-ACDET-2506 training materials is legible to read and remember, and support printing request. Software version of C-ACDET-2506 practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of C-ACDET-2506 Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q21-Q26):

NEW QUESTION # 21
During verification in Production, a stakeholder reports that the imported form template appears outdated.
What could be a likely reason for this?

- A. The Production site does not support custom form templates.
- B. The system automatically reverted the template to a previous version during import.
- C. The Test site template was not the latest version when exported.
- D. The Production site is missing certain parameter settings.

Answer: C

Explanation:
If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.
SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.
Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

NEW QUESTION # 22
What does the "?" represent in the Ariba expression below?
HierarchicalType=="SubAgreement" ? false : true

- A. if
- B. then
- C. else
- D. replace

Answer: B

Explanation:
The "?" symbol in Ariba expressions functions as the equivalent of "then" in conditional logic. The expression is a shorthand form of a ternary operator common in programming:

* The condition HierarchicalType=="SubAgreement" is evaluated first.
* If true, the expression returns the value immediately after the "?" - in this case, false.
* The ":" symbol separates the "then" and "else" parts, so if the condition is false, the expression returns the value after the colon - true. Hence, "?" corresponds to the "then" clause of the if-then-else logic, making option C the correct answer. This syntax allows concise inline conditionals within Ariba's expression language.

NEW QUESTION # 23

What does ? represent in the ariba expression below? HierarchicalType=="SubAgreement" ? false: true

- A. if
- B. then
- C. else
- D. replace

Answer: B

NEW QUESTION # 24

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Translations are included in migrations and are listed as AMLStringResource in the migration
- B. User with Partner Administrator can configure translation.
- C. Contact an SAP Deployment lead for customization help.
- D. Create a package to migrate translations by ICM.

Answer: A

NEW QUESTION # 25

Which key technical activities occur during the Deploy phase? (Select 3 correct answers)

- A. Execute change management plans
- B. Go-live
- C. Rebuild all custom header fields in production
- D. Apply the bundle in production
- E. Migration to production

Answer: B,D,E

Explanation:
During the Deploy phase, key technical activities include:
* A. Apply the bundle in production: Using Intelligent Configuration Manager (ICM) to migrate configuration bundles to the production environment.
* B. Go-live: Transitioning from project mode to operational live usage of the SAP Ariba solution.
* D. Migration to production: Performing final configuration migration, data loads, and cutover activities per the deployment plan. Rebuilding custom header fields manually (C) is not required because configuration is migrated rather than rebuilt. Executing change management plans (E) is important but considered a business/change activity, not a technical migration activity. These technical tasks ensure the system is correctly configured and operationally ready for end users.

NEW QUESTION # 26

......

There is no such excellent exam material like our PrepPDF C-ACDET-2506 exam materials. We not only provide all candidates with most reliable guarantee, but also have best customer support. Our C-ACDET-2506 exam material's efficient staff is always prompt to respond you. If you have any doubts about our exam materials and need detailed answer, you can send emails to our customers' care department. If you are in hurry, you can consult our C-ACDET-2506 exam material's online customer service. We will solve your problem as soon as possible. Our customer support is available for you 24/7. 365 days a Year. Our PrepPDF C-

ACDET-2506 Exam Materials have managed to build an excellent relationship with our users through the mutual respect and attention we provide to everyone. We believed that you will pass the C-ACDET-2506 exam in the first attempt without any obstacles, and will get your ideal job.
