

Dynatrace-Associate Test Questions Fee & Dynatrace-Associate Latest Dumps Ebook

It Contains a pool of real Dynatrace Dynatrace-Associate exam questions. This Dynatrace Associate Certification Exam (Dynatrace-Associate) practice test is compatible with every windows-based system. One downloaded does not require an active internet connection to operate. You can self-evaluate your mistakes after each Dynatrace-Associate Practice Exam attempt and work on the weak points that require more attention.

Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
Topic 2	<ul style="list-style-type: none"> Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
Topic 3	<ul style="list-style-type: none"> User Experience Monitoring: Covers real user monitoring (RUM) to track and analyze how end users interact with and experience web and mobile applications.

Topic 4	<ul style="list-style-type: none"> • Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.
Topic 5	<ul style="list-style-type: none"> • Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.
Topic 6	<ul style="list-style-type: none"> • Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.
Topic 7	<ul style="list-style-type: none"> • Security: Covers vulnerability detection, security alerting, and how Dynatrace identifies and prioritizes security risks across the environment.
Topic 8	<ul style="list-style-type: none"> • Reporting and Analysis: Covers tools and methods for analyzing observability data and generating insights to support performance and operational decisions.
Topic 9	<ul style="list-style-type: none"> • Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.
Topic 10	<ul style="list-style-type: none"> • Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.

Dynatrace Dynatrace-Associate Latest Dumps Ebook - Dynatrace-Associate Valid Mock Test

Owing to our high-quality Dynatrace-Associate real test and high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of Dynatrace-Associate study torrent. What's more, we can always get latest Dynatrace-Associate exam information resource. We have unique advantages on study guide materials. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to pass exams and acquire the certifications. Our Dynatrace-Associate Actual Exam will be definitely conducive to realizing the dream of obtaining the certificate.

Dynatrace Associate Certification Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

Under what conditions can you mute or unmute a vulnerability?

- A. If a vulnerability is resolved
- B. If a vulnerability is open
- C. For a specific Management Zone
- D. For a specific CVE
- E. For a specific Process Group

Answer: C,D,E

Explanation:

Dynatrace allows muting/unmuting vulnerabilities with granular scope control, including:

- * Specific Process Group
- * Specific Management Zone
- * Specific CVE (vulnerability identifier)

These options allow precise control over how vulnerabilities are handled and displayed.

Options based on state (open/resolved) are not the criteria for muting configuration.

Reference: Based on official Dynatrace University training materials on Application Security.

NEW QUESTION # 34

What are the different User Types? (Select all that apply)

- A. Robots
- B. Real
- C. Synthetic
- D. Human

Answer: B,C

Explanation:

Dynatrace categorizes user types primarily into Real Users and Synthetic Users .

* Real Users represent actual human users interacting with applications. Their behavior is captured through Real User Monitoring (RUM), which tracks real-time user interactions, performance, and experience.

* Synthetic Users are simulated users generated by Synthetic Monitoring. These are automated scripts that mimic user behavior to test availability and performance proactively.

The terms "Robots" and "Human" are not official Dynatrace user type classifications in the platform.

Dynatrace specifically uses the standardized categories of Real and Synthetic users for monitoring and analysis.

Reference: Based on official Dynatrace University training materials covering Real User Monitoring and Synthetic Monitoring concepts.

NEW QUESTION # 35

Welcome to the Practical section of your exam!

This portion of the exam requires you to configure and analyze various components within Dynatrace and is open book using Dynatrace documentation ONLY by opening a new tab. The Dynatrace Operator is already deployed for you in a Kubernetes environment (Linux host) in Cloud-Native Full-Stack. The easyTrade and easyTravel applications are also already deployed for you. You will most likely only interact with the Dynatrace Environment (SaaS Platform). For a majority of these questions: paste or attach your screen captures directly to the question using the image control.

Information for connecting to exam components is provided in Dynatrace University in your event classroom.

Open the Associate Exam Event / Classroom and go to the Environments tab, <https://university.dynatrace.com/account/events>

If you deem it necessary: you may use SSH through the built in terminal or through an SSH client of your choice. Use the IP address and credentials provided to log in to the Linux virtual machine running your Kubernetes cluster. When you SSH to the public IP and are presented with the credential prompt, enter the provided username and then the provided password.

Review these and additional instructions for connecting to your environment and creating screenshots by clicking 'View all questions' and then the 'Info' icon.

easyTravel Information

easyTravel is a multi-tier application implemented in .Net and Java. It provides a web portal which allows users to log in, search for journeys to various destinations, select promotional journeys that are offered, and to book a journey using credit card details.

Additionally, a Business-to-Business (B2B) web portal for travel agencies is provided where travel agencies can manage the journeys that they offer and can review reports about created bookings.

easyTrade Information

easyTrade is also a multi-tier application that allows you to login as a fake user or even create a new user.

After which point, you are able to buy and sell stocks or deposit money into your balance using fake information. These interactions will create transactions in Dynatrace for you to analyze. However, there is a load generator running which means that interacting with this page should not be necessary to answer the questions.

Tips for completing tasks:

1. Read each task carefully and fully before starting, and then follow the instructions to complete each task.
2. Be sure your screen captures match the requirements stated and are readable.
3. To create your screen captures, you can zoom your screen, or take multiple screenshots to show all the areas requested. You can attach multiple images to the same question. It is recommended to provide more proof than necessary and document your steps. When in doubt, the old saying "show your work", comes in handy.
4. Use a screen capture tool to create and then copy to your clipboard and paste screen captures directly into the file upload control. To upload a file, allowed file types for the upload are: .jpg, .jpeg, and .png.
5. When saving your images for upload into the test be sure that your image titles do not contain the following characters: !, -, _ , . , " , ' , (,) .
6. To access the web portal, use the links found in the SSH terminal. They will be listed as soon as you login.

Tasks1:

An application team needs to know how much memory their application, EasyTrade, is taking up in their Kubernetes cluster. They have to see the memory usage for all the pods running in the 'easytrade' namespace, summed up into a single metric. Use a Dashboard in the new Platform interface (not Dashboards Classic) to show this information to the team and set the timeframe for this

data to look at the last 30 minutes. Call this dashboard "EasyTrade memory usage".

Screen capture(s) required:

Upload image(s) that show the following:

1. A dashboard "EasyTrade memory usage".
2. The tile used to display memory usage for all pods in the "easytrade" namespace as well as its configuration.

Answer:

Explanation:

See the solution below

Explanation:

Objective

Create a dashboard in the new Dynatrace platform (NOT Classic) that shows:

- * Memory usage
- * For all pods
- * In easytrade namespace
- * Summed into a single metric
- * Timeframe = Last 30 minutes
- * Dashboard name = EasyTrade memory usage

STEP-BY-STEP EXECUTION

Step 1: Open Dashboards (New Platform)

* Go to: # Dashboards & Notebooks

* Click: # Dashboards

* Click: # Create Dashboard

Step 2: Name the Dashboard

* Set name exactly as: # EasyTrade memory usage

Match spelling exactly (case-sensitive matters sometimes)

Step 3: Add a Tile

* Click: # Add Tile

* Select: # Data Explorer

Step 4: Select the Correct Metric

In the metric selector:

Choose:

* Kubernetes container memory usage

Typical metric:

builtin:kubernetes.container.memory.usage

Step 5: Apply Namespace Filter

* Add filter: # Kubernetes Namespace = easytrade

This is CRITICAL (without this # wrong answer)

Step 6: Aggregate Data (MOST IMPORTANT STEP)

* Set: # Aggregation = SUM

This ensures:

All pods memory = ONE combined value

Step 7: Remove Splitting

* Ensure: # No Split by anything (pod/container/etc.)

If you see multiple lines # YOU DID IT WRONG

Step 8: Choose Visualization

Pick one:

* # Single value tile (BEST for exam)

* OR simple graph (no split)

Step 9: Set Timeframe

Top right of dashboard:

Set:

* Last 30 minutes

Step 10: Save Dashboard

* Click: # Save

□

NEW QUESTION # 36

I need to perform data transformation on logs during the ingestion phase, which capability provides this functionality?

- A. Service detection rules
- B. Anomaly Detection rules
- C. Custom process monitoring rules
- **D. Log Processing rules**
- E. Log Events

Answer: D

Explanation:

Log Processing rules in Dynatrace allow transformation of log data during the ingestion phase.

They enable:

- * Parsing and structuring log data
- * Masking sensitive information
- * Enriching logs with additional attributes
- * Filtering and modifying log content before storage

Other options are unrelated:

- * Anomaly detection rules are for alerting
 - * Log events are outputs, not transformation tools
 - * Custom process monitoring rules and service detection rules are unrelated to logs
- Reference: Based on official Dynatrace University training materials on log monitoring and processing.

NEW QUESTION # 37

Which of the following data points can be found within a User Session?

- **A. Session and Action Properties**
- B. Server side code level insights
- **C. User Actions**
- **D. User Tags**
- **E. JavaScript and Request errors**

Answer: A,C,D,E

Explanation:

A User Session in Dynatrace contains detailed information about user interactions and experience:

- * User Tags - custom identifiers assigned to users
 - * Session and Action Properties - metadata describing session behavior
 - * JavaScript and Request Errors - frontend and backend errors impacting the session
 - * User Actions - all interactions such as clicks, page loads, and XHR calls
- Server-side code-level insights are not directly part of the user session view; they belong to service-level and distributed tracing analysis.

Reference: Based on official Dynatrace University training materials on Real User Monitoring and user sessions.

NEW QUESTION # 38

.....

Our Dynatrace-Associate practice materials enjoy great popularity in this line. We provide our Dynatrace-Associate practice materials on the superior quality and being confident that they will help you expand your horizon of knowledge of the exam. They are time-tested practice materials, so they are classic. As well as our after-sales services. We can offer further help related with our Dynatrace-Associate practice materials which win us high admiration. By devoting in this area so many years, we are omnipotent to solve the problems about the Dynatrace-Associate practice exam with stalwart confidence. Providing services 24/7 with patient and enthusiastic staff, they are willing to make your process more convenient.
