## ABPMP International Certified Business Process Associate (CBPA) Exam Sample Questions (Q75-Q80):

### NEW QUESTION # 75

What are the commonly known industry reference models?

- A. FEAF, TOGAF
- B. DoDAF, MODAF
- C. PCF, SCOR
- D. APQC, RACI

**Answer: C**

Explanation:

The most commonly known industry reference models are:

\* PCF (Process Classification Framework) by APQC - categorizes and standardizes processes across industries.

\* SCOR (Supply Chain Operations Reference Model)- provides standardized descriptions for supply chain processes. These models offer best practices and benchmarking standards, facilitating consistent process design, assessment, and comparison. "Industry reference models like PCF and SCOR provide frameworks for classifying and assessing processes across organizations. They support benchmarking and the development of best-in-class process architectures."

#### NEW QUESTION # 76

Which best defines continuous business process improvement within an organization?

- A. It is the responsibility of the process manager
- B. It is the exclusive responsibility of the BPMS tool
- C. It requires continuously improving the organizational structure
- **D. It is a sustained approach to monitoring process performance**

**Answer: D**

Explanation:

Continuous business process improvement involves a sustained, iterative approach to monitoring, analyzing, and enhancing processes to drive better outcomes over time.

"Continuous process improvement refers to a structured, ongoing effort to measure, analyze, and refine processes using performance data, typically supported by BPM tools and methodologies."

#### NEW QUESTION # 77

The outcome of process analysis is a fact-based

- A. Graphical representation of the current state (as-is) process in BPMN 2.0
- B. Implementation plan for the improvement of a process
- **C. Understanding of the current state (as-is) process**
- D. Management dashboard for the measurement of a process

**Answer: C**

Explanation:

The primary result of process analysis is a detailed, objective understanding of how the current process operates. This includes identifying pain points, cycle times, variation, and causes of inefficiencies. It is the foundation for evidence-based decision-making.

"A thorough process analysis results in a fact-based understanding of the as-is process, including performance baselines, root causes, and points of failure."

- ABPMP CBOK, Chapter 4 - Process Analysis

Such insights enable:

\* Risk identification

\* Compliance assessments

#### NEW QUESTION # 78

Which initial information gathering method is NOT usually used in process analysis?

- A. Observation of how the processes run
- B. Interviews with participants in a process
- C. Process auditing
- **D. Process simulation**

**Answer: D**

Explanation:

While process simulation is a powerful tool, it is typically used after modeling and analysis, not during the initial information gathering phase. In contrast, interviews, audits, and observations are foundational techniques used to collect data and understand current practices before simulation is even considered.

"Initial data gathering methods for process analysis include interviews, direct observation, document analysis, and auditing. Simulation is applied later during validation or scenario testing phases."
