## **Pass Guaranteed 2026 HCL Software Academy HCL-DOM-AADM-12 Latest Test Lab Questions**

May be you doubt the ability of our HCL Software Academy test dump; you can download the trial of our practice questions. All HCL-DOM-AADM-12 exam prep created by our experienced IT workers who are specialized in the certification study guide. We checked the updating of HCL-DOM-AADM-12 vce braindumps to make sure the preparation successful.

## **HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q50-Q55):**

**NEW QUESTION # 50**

What authentication method does Domino use by default for client-to-server access?

- A. OAuth 2.0 token-based login
- B. RADIUS-based challenge-response
- **C. Notes ID-based authentication using public key infrastructure (PKI)**
- D. Biometric signature verification

**Answer: C**

Explanation:

The foundational security of HCL Domino is built on Public Key Infrastructure (PKI) . By default, when a Notes client connects to a Domino server, it uses the Notes ID file . This file contains the user's private key.

The server uses the corresponding public key (stored in the user's Person document) to perform a complex cryptographic "handshake" to verify the user's identity without ever sending the actual password or private key over the network.

---

---

#### **NEW QUESTION # 51**

Which two installation modes are supported by HCL Domino 12 for server setup? (Choose two)

- **A. Graphical install**
- B. Web-based install
- **C. Silent install**
- D. Smartphone install

**Answer: A,C**

Explanation:

HCL Domino 12 supports multiple deployment methods to suit different server environments. The Graphical install is the traditional wizard-based method used for manual setups. For automated deployments or installations on servers without a graphical user interface (GUI), the Silent install allows administrators to use a response file to provide configuration parameters without interactive prompts.

---

---

#### **NEW QUESTION # 52**

What must be consistent across servers in the same Domino domain to ensure seamless replication and communication?

- **A. Organizational Certificate Authority**
- B. Domain Name System suffix
- C. Domino version
- D. Hostnames

**Answer: A**

Explanation:

For servers within a Domino domain to trust one another for replication and mail routing, they must share a common security root, which is the Organizational Certificate Authority (Certifier) . During the installation and configuration of any new server in the domain, it must be registered using a certifier that descends from the same top-level Organization (O). This shared ancestry allows servers to authenticate each other's identities securely using the Notes public-key system.

---

---

#### **NEW QUESTION # 53**

In a hierarchical name like \$CN=Server1/OU=Boston/O=HCL\$ the component "OU" stands for

- A. Operating Unit
- **B. Organizational Unit**
- C. Organization Unit
- D. Office Unit

**Answer: B**

Explanation:

HCL Domino utilizes a hierarchical naming structure to ensure every entity (user or server) has a unique name. In this structure, OU stands for Organizational Unit . OUs are typically used to represent departments, physical locations, or branches within the broader Organization (O), allowing for granular administrative control and security delegation.

---

#### NEW QUESTION # 54

The AdminP task processes its queue from the \_\_\_\_ database.

- A. certlog.nsf
- B. admin4.nsf
- C. names.nsf
- D. mail.box

**Answer: B**

Explanation:

The Administration Process (AdminP) is an automated system for updating the Domino Directory and managing various server and database tasks throughout a domain. All administrative requests-such as user renames, deletions, or moves-are submitted as "request notes" to the Administration Requests database (admin4.nsf) . The AdminP task on each server monitors this database, identifies tasks it needs to perform, and records the results of those actions back into the same database for the administrator to review.
