So we creat the most effective and accurate CCFH-202b Exam Braindumps for our customers and always consider carefully for our worthy customer.

## CrowdStrike Certified Falcon Hunter Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Which of the following is the proper method to quantify search results, enabling a hunter to quickly sort and identify outliers?

- A. Using the "eval" command at the end of a search string in Event Search
- B. Exporting Event Search results to a spreadsheet and aggregating the results
- C. Using the "stats count" command at the end of a search string in Event Search
- D. **Using the "| stats count by" command at the end of a search string in Event Search**

**Answer: D**

Explanation:

This is the proper method to quantify search results, enabling a hunter to quickly sort and identify outliers. The stats command is used to calculate summary statistics on the results of a search or subsearch, such as count, sum, average, etc. The count by option is used to count the number of events for each distinct value of a field or fields and display them in a table. This can help find rare or common values that could indicate anomalies or deviations from normal behavior.

### NEW QUESTION # 36

Which field should you reference in order to find the system time of a \*FileWritten event?

- A. ProcessStartTime\_decimal
- B. **ContextTimeStamp\_decimal**
- C. timestamp
- D. FileTimeStamp\_decimal

**Answer: B**

Explanation:

ContextTimeStamp\_decimal is the field that shows the system time of the event that triggered the sensor to send data to the cloud. In this case, it would be the time when the file was written. FileTimeStamp\_decimal is the field that shows the last modified time of the file, which may not be the same as the time when the file was written. ProcessStartTime\_decimal is the field that shows the start time of the process that performed the file write operation, which may not be the same as the time when the file was written. Timestamp is the field that shows the time when the sensor data was received by the cloud, which may not be the same as the time when the file was written.

### NEW QUESTION # 37

In which of the following stages of the Cyber Kill Chain does the actor not interact with the victim endpoint(s)?

- A. Command & control
- B. **Weaponization**
- C. Exploitation
- D. Installation

**Answer: B**

Explanation:

Weaponization is the stage of the Cyber Kill Chain where the actor does not interact with the victim endpoint(s). Weaponization is where the actor prepares or packages the exploit or payload that will be used to compromise the target. This stage does not involve any communication or interaction with the victim endpoint(s), as it is done by the actor before delivering the weaponized content. Exploitation, Command & Control, and Installation are all stages where the actor interacts with the victim endpoint(s), either by executing code, establishing communication, or installing malware.

### NEW QUESTION # 38

Which Falcon documentation guide should you reference to hunt for anomalies related to scheduled tasks and other Windows related artifacts?

- A. MITRE-Based Falcon Detections Framework

- B. Events Data Dictionary
- **C. Hunting and Investigation**
- D. Customizable Dashboards

**Answer: C**

Explanation:

The Hunting and Investigation guide is the Falcon documentation guide that you should reference to hunt for anomalies related to scheduled tasks and other Windows related artifacts. The Hunting and Investigation guide provides sample hunting queries, select walkthroughs, and best practices for hunting with Falcon. It covers various topics such as process execution, network connections, registry activity, scheduled tasks, and more.

**NEW QUESTION # 39**

Which of the following queries will return the parent processes responsible for launching badprogram.exe?

- A. event\_simpleName=processrollup2 [search event\_simpleName=processrollup2 FileName=badprogram.exe | rename ParentProcessId\_decimal AS TargetProcessId\_decimal | fields aid TargetProcessId\_decimal] | stats count by FileName\_time
- **B. event\_simpleName=processrollup2 [search event\_simpleName=processrollup2 FileName=badprogram.exe | rename TargetProcessId\_decimal AS ParentProcessId\_decimal | fields aid TargetProcessId\_decimal] | stats count by FileName\_time**
- C. [search (ParentProcess) where name=badprogram.exe] | table ParentProcessName\_time
- D. [search (ProcessList) where Name=badprogram.exe] | search ParentProcessName | table ParentProcessName\_time

**Answer: B**

Explanation:

This query will return the parent processes responsible for launching badprogram.exe by using a subsearch to find the processrollup2 events where FileName is badprogram.exe, then renaming the TargetProcessId\_decimal field to ParentProcessId\_decimal and using it as a filter for the main search, then using stats to count the occurrences of each FileName by\_time. The other queries will either not return the parent processes or use incorrect field names or syntax.

**NEW QUESTION # 40**

.....

After your payment is successful, you will receive an e-mail from our system within 5-10 minutes, and then, you can use high-quality CCFH-202b exam guide to learn immediately. Everyone knows that time is very important and hopes to learn efficiently to pass the CCFH-202b exam. Once they discover CCFH-202b practice materials, they will definitely want to seize the time to learn. So after payment, downloading into the exam database is the advantage of our products. The sooner you download and use CCFH-202b guide torrent, the sooner you get the CCFH-202b certificate.
