We assure that you can not only purchase high-quality 1Z0-1055-25 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of 1Z0-1055-25 Guide Torrent, you can download any time without registering. Fast delivery—after payment you can receive our 1Z0-1055-25 exam torrent no more than 10 minutes, so that you can learn fast and efficiently. What are you waiting for? Just come and buy our 1Z0-1055-25 exam questions!

## Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q42-Q47):

### NEW QUESTION # 42

SIMULATION

MANAGE EXPENSE REPORT TEMPLATE

Task 1:

Create an Expense Report Template for the US1 Business Unit, where:

- a. The effective start date is the current date.
- b. The hotel expense type requires itemization and should include Internet, Room Rate, and Dinner.
- c. The expense type is associated with the respective account
- d. Card Expense Type Mapping is not enabled.
- e. Company policy states that receipts
- f. Users can indicate receipts are missing in their expense report and a warning should be displayed for any missing receipts.
- g. All Expense Fields are optional.

### Answer:

Explanation:

See the Explanation for Step by Step Solution

Explanation:

Task 1: Create an Expense Report Template for the US1 Business Unit

The following configurations need to be implemented:

- ✓ Effective Start Date: The current date.
- ✓ Hotel Expense Type: Requires itemization with Internet, Room Rate, and Dinner.
- ✓ Expense Type: Associated with the respective GL account.
- ✓ Card Expense Type Mapping: Not enabled.
- ✓ Receipts Policy: Users can indicate missing receipts, and a warning should be displayed.
- ✓ Expense Fields: All fields should be optional.

Step-by-Step Solution

Step 1: Navigate to Expense Report Templates

Log in to Oracle Financials Cloud with the Expense Manager or Financial Administrator role.

Navigate to Setup and Maintenance.

In the Search Bar, type "Manage Expense Report Templates".

Click on Manage Expense Report Templates.

Step 2: Create a New Expense Report Template

Click Create New Template.

Enter the following details:

Name: "US1 Business Unit Expense Report"

Business Unit: US1 Business Unit

Effective Start Date: (Set to current date)

Enable for Use:  (Check this box)

Click Save.

Step 3: Define the Expense Type - Hotel with Itemization

Navigate to the Expense Types tab.

Click Add Expense Type.

Enter the following details:

Expense Type Name: "Hotel"

Expense Category: "Lodging"

Requires Itemization:  (Check this box)

Under Itemization, click Add Itemization Categories:

Internet

Room Rate

Dinner

Click Save.

Step 4: Associate Expense Types with GL Accounts

Click on Edit Expense Type "Hotel".

Go to the Accounting section.

Select the appropriate GL Account for lodging expenses.

Repeat this process for other required expense types.

Click Save and Close.

Step 5: Disable Card Expense Type Mapping

Navigate to the Corporate Card Expense Mapping tab.

Ensure the "Enable Corporate Card Mapping" checkbox is unchecked.

Click Save.

Step 6: Configure Receipts Policy

Navigate to the Receipts tab.

Under Receipt Handling, set:

Company Policy: Employees must provide receipts.

Allow users to indicate missing receipts?  (Check this box).

Action for Missing Receipts: Raise a Warning (so that expense submission is not blocked).

Click Save.

Step 7: Set Expense Fields as Optional

Navigate to the Fields Setup tab.

Ensure all Expense Fields are set to Optional.

Click Save and Close.

Step 8: Validate and Activate the Template

Review all configurations.

Click Submit and Activate.

Run the Validate and Deploy Expense Templates process to ensure all settings are applied.

Step 9: Testing the Expense Report Template

Simulate an Expense Report Submission:

Select Hotel Expense and enter details.

Verify if the system requires itemization (Internet, Room Rate, Dinner).

Submit without a receipt to check if a warning is displayed.

Ensure all fields remain optional.

Verify no corporate card expense mapping applies.

Expected Outcome:

The Expense Report Template is successfully created for US1 Business Unit.

Hotel expenses require itemization into Internet, Room Rate, and Dinner.

Receipts are required, and a warning is displayed for missing receipts.

GL Account mapping is correctly applied to each expense type.

Card Expense Type Mapping is disabled.

All fields are optional, allowing flexible data entry.

Conclusion

By following these steps, we have successfully created and configured an Expense Report Template that meets all business requirements for the US1 Business Unit.

## NEW QUESTION # 43

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Balancing Segment Value
- B. Primary Ledger
- C. Accounting Period
- D. Natural Account
- E. Supplier
- F. Business Unit

**Answer: A,C,F**

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process.

Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.

#### NEW QUESTION # 44

You have recently enabled the keyword audit feature for expenses to help automate the detection of potential policy violations or fraudulent activity within expense reports. After the feature is enabled all expense reports containing keywords in certain fields are selected for audit.

Which two Expense Item fields are included in this feature?

- A. Expense Type
- B. Location
- C. Merchant Name
- D. Itemization Type
- E. Description

**Answer: C,E**

#### NEW QUESTION # 45

As a Workflow Administrator, you are tasked with configuring certain invoice approval rules to align with your company's policy.

You decide to make use of the purchase order additional attributes and descriptive flexfields to appropriately configure invoice approval rules and route workflow notifications to approvers.

Which two are NOT purchase order additional attributes that workflow administrators can use to configure invoice approval workflow rules?

- A. Purchase Basis
- B. Purchase Order Schedule
- C. Purchase Order Destination Type Lookup Code
- D. Freight Terms
- E. Purchase Order Pending Fulfillment

**Answer: B,E**

### NEW QUESTION # 46

As an Expenses Administrator, you can control which expense values you do not want to automatically populate on the Create Expense Item page. You have therefore created the profile option EXM\_DFLT\_FROM\_PREV\_EXPENSE at the user level and set it to N (No).

Which three values will no longer populate from a previous expense item when a user enters a new expense item?

- A. Expense Location
- B. Template
- C. Project and Task Number
- D. Currency

**Answer: A,B,C**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Expenses, the profile option EXM\_DFLT\_FROM\_PREV\_EXPENSE determines whether certain fields on the Create Expense Item page are automatically populated with values from the previously entered expense item.

By default, when this profile option is set to 'Y' (Yes), the application carries over several fields from the last entered expense item to streamline data entry. These fields include:

Date

Template

Expense Location

Currency (both ledger and reimbursement currency)

Company and Department

Project Number and Task Number

However, when the profile option is set to 'N' (No) at the user level, the system stops carrying over certain fields from the previous expense item.

Fields That Will No Longer Auto-Populate:

Expense Location - Users must manually enter the expense location for each new entry.

Template - Expense templates (if used) will not be pre-filled from the previous expense item.

Project and Task Number - Users must reselect the project and task number for each new expense entry.

Fields That Will Still Populate With Defaults:

Currency - Defaults to the ledger currency as configured in Human Capital Management (HCM).

Company and Department - These values will be retrieved from the user's default expense account setup in HCM.

Thus, the correct answer is: A, B, D because the Expense Location, Template, and Project & Task Number will no longer populate from a previous expense item when a user enters a new one.
