## Free PDF Quiz 2026 Citrix First-grade 1Y0-342: Citrix CCP-AppDS-NetScaler Advance Features (Security and Management) Reliable Exam Pass4sure

Most of the candidates who plan to take the 1Y0-342 certification exam lack updated practice questions to ace it on the first attempt. Due to this, they fail the Citrix CCP-AppDS-NetScaler Advance Features (Security and Management) (1Y0-342) test, losing money and time. And in some cases, applicants fail on the second attempt as well because they don't prepare with 1Y0-342 Actual Exam questions. This results in not only the loss of resources but also the motivation of the candidate.

## Citrix CCP-AppDS-NetScaler Advance Features (Security and Management) Sample Questions (Q142-Q147):

### NEW QUESTION # 142

Scenario: A Citrix Engineer configured an HTTP Denial-of-Service (DoS) protection policy by setting the Surge Queue depth to 300.

The surge queue reaches a size of 308, triggering the Citrix ADC "attack" mode. The HTTP DoS window mechanism is left at the

default size which, when reached, will trigger "no-attack" mode.

Which queue depth value must the Surge Queue be to trigger the "no-attack" mode?

- A. size should be 290.
- B. size should be 300.
- **C. size should be less than 280.**
- D. size should be between 280 and 300.

**Answer: C**

#### NEW QUESTION # 143

Scenario: A Citrix Engineer created the policies in the attached exhibit.

| Policy name | Priority | Expression                                       | Profile  | Goto Expression |
|-------------|----------|--------------------------------------------------|----------|-----------------|
| Policy_A    | 100      | CLIENT.IP.SRC.IN_SUBNET(192.168.10.0/24)         | Policy_A | END             |
| Policy_B    | 110      | HTTP.REQ.HEADER("User-Agent").CONTAINS("Safari") | Policy_B | END             |
| Policy_C    | 120      | HTTP.REQ.URL.PATH.CONTAINS("password")           | Policy_C | END             |
| Policy_D    | 130      | true                                             | Policy_D | END             |

Click the Exhibit button to view the list of policies. HTTP Request: GET /resetpassword.htm HTTP/1.1 User-Agent: Mozilla/5.0 (Windows NT 6.1; WOW64; rv:64.0) Gecko/20100101 Firefox/64.0 Host: www.citrix.com Accept-Language: en-us Accept-Encoding: gzip, deflate Connection: Keep-Alive Which profile will be applied to the above HTTP request?

- A. Profile\_C
- **B. Profile\_A**
- C. Profile\_B
- D. Profile\_D

**Answer: B**

#### NEW QUESTION # 144

A Web Application Engineer is reviewing log files and finds that a large number of bad HTTP requests are being sent to the web application servers.

What can the Citrix ADC Engineer do to prevent bad HTTP requests from getting to the web application?

- A. Create an HTTP profile and select 'Drop invalid HTTP requests'. Assign the HTTP profile to the Web App Firewall policy.
- **B. Select 'Change HTTP Parameters' under System > Settings. Select 'Drop invalid HTTP requests'.**
- C. Create an HTTP profile and select 'Drop invalid HTTP requests'. Assign the HTTP profile to the virtual server.
- D. Modify the default HTTP profile and select 'Drop invalid HTTP requests'. Bind the default HTTP profile globally.

**Answer: B**

#### NEW QUESTION # 145

What criteria must be met in order to create a certificate bundle by linking multiple certificates in Citrix ADC Application Delivery Management?

- A. The certificates must be created on the Citrix AD
- B. The issuer of the first certificate must NOT have issued the second certificate.
- C. The certificates must be issued by an external Certificate Authority.
- **D. The issuer of the first certificate must match the domain of the second certificate.**

**Answer: D**

#### NEW QUESTION # 146

**Answer: B**
