Salesforce-Data-Cloud exam dump torrent & Salesforce-Data-Cloud free study material & Salesforce-Data-Cloud exam prep vce

Now you do not need to worry about the relevancy and top standard of RealVCE Salesforce Data Cloud Accredited Professional Exam in Salesforce-Data-Cloud exam questions. These Salesforce Salesforce-Data-Cloud dumps are designed and verified by qualified Salesforce-Data-Cloud exam trainers. Now you can trust RealVCE Salesforce-Data-Cloud Practice Questions and start preparation without wasting further time. With the RealVCE Salesforce-Data-Cloud exam questions, you will get everything that you need to learn, prepare and pass the challenging Salesforce-Data-Cloud exam with good scores.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q95-Q100):

NEW QUESTION # 95
Which of the following functions returns the first value from a list that isn't empty?

- A. REPLACE
- B. COALESCE
- C. CONCAT
- D. FIND

Answer: B

Explanation:
COALESCE is the function that returns the first value from a list that isn't empty. It takes a list of values as arguments and returns the first non-empty value. For example, COALESCE(NULL, '', 'Hello', 'World') returns 'Hello'. If all values are empty, it returns NULL. References: COALESCE

NEW QUESTION # 96
What should an administrator do to pause a segment activation but with the intent of using that segment again?

- A. Delete the segment
- B. Skip the Activation
- C. Stop the Publish Schedule
- D. Inactivate the segment

Answer: C

Explanation:
To pause a segment activation but with the intent of using that segment again, the administrator should stop the publish schedule for that segment. This will stop the segment from being refreshed and activated, but it will not delete or inactivate the segment. The administrator can resume the publish schedule at any time.

NEW QUESTION # 97
Cumulus Financial uses Data Cloud to segment banking customers and activate them for direct mail via a Cloud File Storage activation. The company also wants to analyze individuals who have been in the segment within the last 2 years.
Which Data Cloud component allows for this?

- A. Calculated insights
- B. Nested segments
- C. Segment membership data model object
- D. Segment exclusion

Answer: C

Explanation:
The segment membership data model object is a Data Cloud component that allows for analyzing individuals who have been in a segment within a certain time period. The segment membership data model object is a table that stores the information about which individuals belong to which segments and when they were added or removed from the segments. This object can be used to create calculated insights, such as segment size, segment duration, segment overlap, or segment retention, that can help measure the effectiveness of segmentation and activation strategies. The segment membership data model object can also be used to create nested segments or segment exclusions based on the segment membership criteria, such as segment name, segment type, or segment date range. The other options are not correct because they are not Data Cloud components that allow for analyzing individuals who have been in a segment within the last 2 years. Nested segments and segment exclusions are features that allow for creating more complex segments based on existing segments, but they do not provide the historical data about segment membership. Calculated insights are custom metrics or measures that are derived from data model objects or data lake objects, but they do not store the segment membership information by themselves. References: Segment Membership Data Model Object, Create a Calculated Insight, Create a Nested Segment

NEW QUESTION # 98
Which three actions can be applied to a previously created segment?

- A. Export
- B. Inactivate
- C. Copy
- D. Reactivate
- E. Delete

Answer: A,C,E

Explanation:
Explanation
These three actions can be applied to a previously created segment. You can export a segment to a CSV file, delete a segment from Data Cloud, or copy a segment to create a duplicate segment with the same criteria.

NEW QUESTION # 99
Which feature can integrate in real time with Salesforce CRM?

- A. Identity Resolution
- B. CRM Starter Bundle
- C. Data Actions
- D. Data Model Triggers

Answer: C

Explanation:
Explanation
This feature can integrate in real time with Salesforce CRM. Data Actions allow you to perform actions on Salesforce CRM records based on Data Cloud data, such as creating, updating, or deleting records.
