AI-900 Free Dump Download, Reliable AI-900 Test Questions

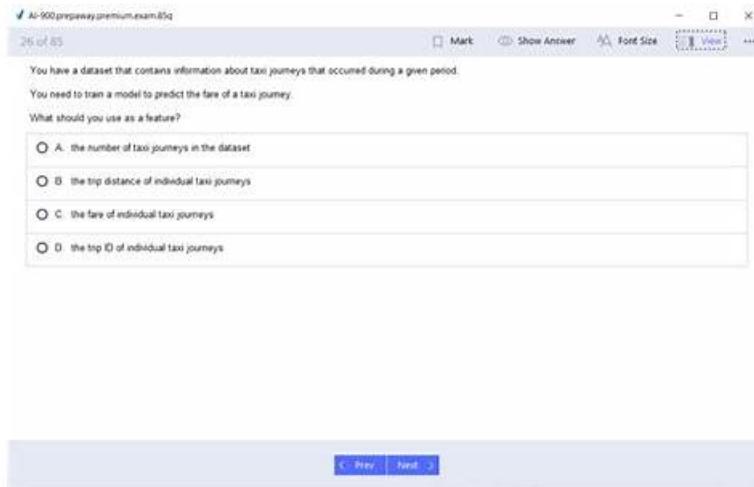

P.S. Free & New AI-900 dumps are available on Google Drive shared by PDFTorrent: https://drive.google.com/open?id=1tQ4Kk9VCGm2O2vd5OW4H64RUBDa4zBzi

PDFTorrent has a huge Microsoft industry elite team. They all have high authority in the AI-900 area. They use professional knowledge and experience to provide training materials for people ready to participate in different IT certification exams. The accuracy rate of exam practice questions and answers provided by PDFTorrent is very high and they can 100% guarantee you pass the exam successfully for one time. Besides, we will provide you a free one-year update service.

The Microsoft AI-900 exam will measure the candidates' skills and competence in a range of topics. They are as follows:

- **Explain the Features of Computer Vision Workloads Available on Azure (15-20%):** This domain requires that the test takers demonstrate competence in identifying the basic categories of computer vision solutions. It will also measure their skills in identifying different Azure services and tools for computer vision tasks. You will also need an understanding of the capabilities of Computer Vision service, Custom Vision service, Face service, and Form Recognizer service.
- **Explain the Features of NLP (Natural Language Processing) Workloads Available on Azure (15-20%):** This subject area will measure your ability to identify the features of basic Natural Language Processing Workload scenarios. It will also test your skills in identifying different Azure services and tools for NLP workloads. The topic will cover the understanding of the capabilities of Text Analytics service, Language Understanding service, Speech service, and Translator Text service.
- **Explain the Fundamental Principles of ML on Azure (30-35%):** The potential candidates for the Microsoft AI-900 Exam should be able to identify the common types of machine learning and explain its core concepts. They also need to know how to identify the core tasks that are involved in creating the ML solutions. Additionally, they need to have the knowledge of the capabilities of no-code ML with Azure ML studio.
- **Explain the Features of Conversational Artificial Intelligence Workloads Available on Azure (15-20%):** The applicants must demonstrate the understanding of common use cases associated with conversational artificial intelligence. This area also measures one's knowledge of Azure services associated with conversational artificial intelligence.
- **Explain AI Workloads & Considerations (15-20%):** This section will measure the individuals' ability to identify different features of common artificial intelligence workloads. It will also evaluate their competence in identifying the guiding principles that are responsible for AI.

Free PDF 2026 Authoritative Microsoft AI-900: Microsoft Azure AI Fundamentals Free Dump Download

Maybe you are still worried about how to prepare for AI-900 exam. You will stop worrying when you read this entry, because you have found the most authoritative professional provider of IT exam dumps. Our exam software has helped a lot of IT workers

successfully get AI-900 Exam Certification. The reason why they pass the exam easily is very simple. They all make use of our most complete and latest dumps. We will provide on-year free update service after you purchased AI-900 exam software.

Microsoft AI-900 Certification Exam is a great way to demonstrate your foundational knowledge of AI and machine learning concepts. With a focus on ethical and responsible AI principles, this certification is ideal for professionals across a range of industries who are looking to explore the possibilities of AI and machine learning technology to drive business growth and innovation.

Microsoft Azure AI Fundamentals Sample Questions (Q64-Q69):

NEW QUESTION # 64
Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 65
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 66
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Bot Service and Azure Congnitive Services can be integrated.	○	○
Azure Bot Service engages with customers in a conversational manner.	○	○
Azure Bot Service can import frequently asked questions (FAQ) to question and answer sets.	○	○

Answer:

Explanation:

Answer Area

Statements	Yes	No
Azure Bot Service and Azure Congnitive Services can be integrated.	◉	○
Azure Bot Service engages with customers in a conversational manner.	◉	○
Azure Bot Service can import frequently asked questions (FAQ) to question and answer sets.	○	◉

NEW QUESTION # 67
You are developing a model to predict events by using classification.
You have a confusion matrix for the model scored on test data as shown in the following exhibit.
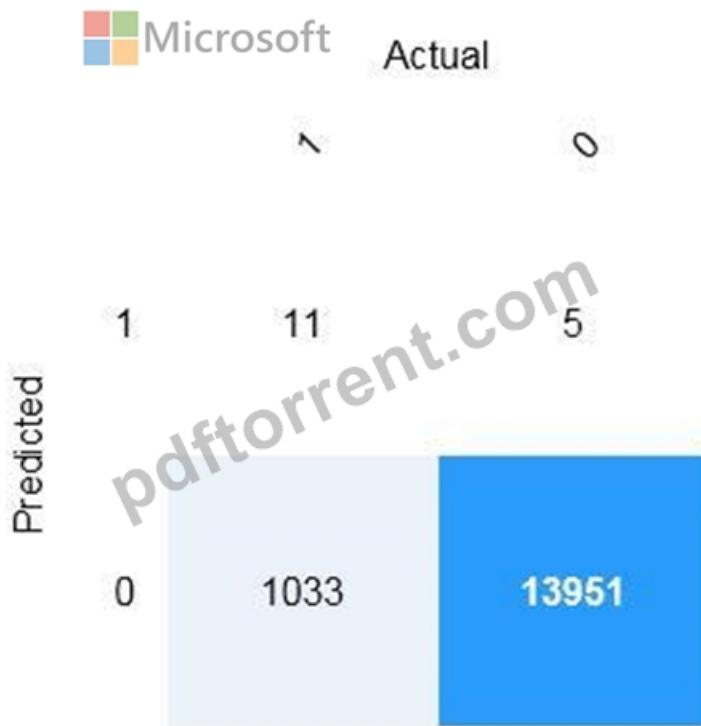

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

There are **[answer choice]** correctly predicted positives.   ▼

5
11
1,033
13,951

There are **[answer choice]** false negatives.   ▼

5
11
1,033
13,951

Answer:

Explanation:

There are **[answer choice]** correctly predicted positives.   ▼

5
11
1,033
13,951

There are **[answer choice]** false negatives.   ▼

5
11
1,033
13,951

Explanation

Answer Area

There are [answer choice] correctly predicted positives.

5	
11	
1,033	
13,951	

There are [answer choice] false negatives.

5	
11	
1,033	
13,951	

Box 1: 11

	Predicted	
	Positive	Negative
Actual True	TP	FN
Actual False	FP	TN

TP = True Positive.

The class labels in the training set can take on only two possible values, which we usually refer to as positive or negative. The positive and negative instances that a classifier predicts correctly are called true positives (TP) and true negatives (TN), respectively. Similarly, the incorrectly classified instances are called false positives (FP) and false negatives (FN).

Box 2: 1,033

FN = False Negative

Reference:

https://docs.microsoft.com/en-us/azure/machine-learning/studio/evaluate-model-performance Finding TP is easy. It basically means the value where Predicted and True value is 1 and that is 11 in this case.

False Negative means where true value was 1 but predicted value was 0 and that is 1033 in this case The confusion matrix shows cases where both the predicted and actual values were 1 (known as true positives) at the top left, and cases where both the predicted and the actual values were 0 (true negatives) at the bottom right. The other cells show cases where the predicted and actual values differ (false positives and false negatives).

NEW QUESTION # 68

Select the answer that correctly completes the sentence.

Answer Area

The interactive answering of questions entered by a user as part of an application is an example of

anomaly detection.
computer vision.
natural language processing.
forecasting.

Answer:

Explanation:

Explanation

NEW QUESTION # 69
