TrainingDumps is a trusted and reliable platform that has been helping SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) exam candidates for many years. Over this long time period countless Snowflake DEA-C01 exam questions candidates have passed their dream DEA-C01 Certification Exam. They all got help from TrainingDumps Snowflake Exam Questions and easily passed their challenging DEA-C01 pdf exam.

SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) certification exams are a great way to analyze and evaluate the skills of a candidate effectively. Big companies are always on the lookout for capable candidates. You need to pass the SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) certification exam to become a certified professional. This task is considerably tough for unprepared candidates however with the right DEA-C01 prep material there remains no chance of failure.

DEA-C01 Brain Dump Free | Certification DEA-C01 Training

Our DEA-C01 vce dumps offer you the best exam preparation materials which are updated regularly to keep the latest exam requirement. The DEA-C01 practice exam is designed and approved by our senior IT experts with their rich professional knowledge. Using DEA-C01 Real Questions will not only help you clear exam with less time and money but also bring you a bright future. We are looking forward to your join.

Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q194-Q199):

NEW QUESTION # 194

A company is building a dashboard for thousands of Analysts. The dashboard presents the results of a few summary queries on tables that are regularly updated. The query conditions vary by tope according to what data each Analyst needs Responsiveness of the dashboard queries is a top priority, and the data cache should be preserved.

How should the Data Engineer configure the compute resources to support this dashboard?

- A. Create a virtual warehouse for every 250 Analysts Monitor to determine how many of these virtual warehouses are being utilized at capacity.
- B. Create a size XL virtual warehouse to support all the dashboard queries Monitor query runtimes to determine whether the virtual warehouse should be resized.
- **C. Assign all queries to a multi-cluster virtual warehouse set to maximized mode Monitor to determine the smallest suitable number of clusters.**
- D. Assign queries to a multi-cluster virtual warehouse with economy auto-scaling Allow the system to automatically start and stop clusters according to demand.

Answer: C

Explanation:

Explanation

This option is the best way to configure the compute resources to support this dashboard. By assigning all queries to a multi-cluster virtual warehouse set to maximized mode, the Data Engineer can ensure that there is enough compute capacity to handle thousands of concurrent queries from different analysts. A multi-cluster virtual warehouse can scale up or down by adding or removing clusters based on the load. A maximized scaling policy ensures that there is always at least one cluster running and that new clusters are added as soon as possible when needed. By monitoring the utilization and performance of the virtual warehouse, the Data Engineer can determine the smallest suitable number of clusters that can meet the responsiveness requirement and minimize costs.

NEW QUESTION # 195

A company plans to use Amazon Kinesis Data Firehose to store data in Amazon S3. The source data consists of 2 MB .csv files. The company must convert the .csv files to JSON format. The company must store the files in Apache Parquet format.

Which solution will meet these requirements with the LEAST development effort?

- A. Use Kinesis Data Firehose to invoke an AWS Lambda function that transforms the .csv files to JSON. Use Kinesis Data Firehose to store the files in Parquet format.
- B. Use Kinesis Data Firehose to invoke an AWS Lambda function that transforms the .csv files to JSON and stores the files in Parquet format.
- C. Use Kinesis Data Firehose to convert the .csv files to JSON and to store the files in Parquet format.
- D. Use Kinesis Data Firehose to convert the .csv files to JSON. Use an AWS Lambda function to store the files in Parquet format.

Answer: C

Explanation:

By using the built-in transformation and format conversion features of Kinesis Data Firehose, you achieve the desired result with minimal custom development, thereby meeting the requirements efficiently and cost-effectively.

NEW QUESTION # 196

A media company wants to improve a system that recommends media content to customer based on user behavior and preferences. To improve the recommendation system, the company needs to incorporate insights from third-party datasets into the company's existing analytics platform.

The company wants to minimize the effort and time required to incorporate third-party datasets.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Use Amazon Kinesis Data Streams to access and integrate third-party datasets from AWS CodeCommit repositories.
- B. Use API calls to access and integrate third-party datasets from AWS Data Exchange.
- C. Use Amazon Kinesis Data Streams to access and integrate third-party datasets from Amazon Elastic Container Registry (Amazon ECR).
- D. Use API calls to access and integrate third-party datasets from AWS DataSync.

Answer: D

Explanation:

Data Exchange is the AWS official third-party datasets repository:

<https://aws.amazon.com/data-exchange>

NEW QUESTION # 197

A data engineer set up an AWS Lambda function to read an object that is stored in an Amazon S3 bucket. The object is encrypted by an AWS KMS key.

The data engineer configured the Lambda function's execution role to access the S3 bucket.

However, the Lambda function encountered an error and failed to retrieve the content of the object.

What is the likely cause of the error?

- A. The Lambda function's execution role does not have the necessary permissions to access the KMS key that can decrypt the S3 object.
- B. The data engineer misconfigured the permissions of the S3 bucket. The Lambda function could not access the object.

- C. The Lambda function is using an outdated SDK version, which caused the read failure.
- D. The S3 bucket is located in a different AWS Region than the Region where the data engineer works. Latency issues caused the Lambda function to encounter an error.

Answer: A

NEW QUESTION # 198

A new customer table is created by a data pipeline in a Snowflake schema where MANAGED ACCESS is enabled. Can gran access to the CUSTOMER table? (Select THREE.)

- A. The role that owns the database
- B. The SECURITYADMIN role
- C. The USERADMIN role with the manage grants privilege
- D. The role that owns the schema
- E. The role that owns the customer table
- F. The SYSADMIN role

Answer: A,B,D

Explanation:

Explanation

The roles that can grant access to the CUSTOMER table are the role that owns the schema, the role that owns the database, and the SECURITYADMIN role. These roles have the ownership or the manage grants privilege on the schema or the database level, which allows them to grant access to any object within them. The other options are incorrect because they do not have the necessary privilege to grant access to the CUSTOMER table. Option C is incorrect because the role that owns the customer table cannot grant access to itself or to other roles. Option D is incorrect because the SYSADMIN role does not have the manage grants privilege by default and cannot grant access to objects that it does not own. Option F is incorrect because the USERADMIN role with the manage grants privilege can only grant access to users and roles, not to tables.

NEW QUESTION # 199

.....

An individual can't have a significant understanding of the subject of the SnowPro Advanced: Data Engineer Certification Exam certification in any event, going before scrutinizing accessible. They don't know anything about how to make sense of the center thoughts, which is a test in the event that they need to approach the subtleties to others concerning the SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) exam. Thusly, more keen to take help from specialists who have some involvement in the SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) exam. Snowflake DEA-C01 Certification Exam concentrate on material which incorporates a rundown of the multitude of points and an outline making sense of the general subject.
