## ASIS Physical Security Professional Exam Sample Questions (Q44-Q49):

### NEW QUESTION # 44

What considers all aspects of the security operation on a continuing basis?

- **A. Operational Audit**
- B. Data-security Act
- C. Security Vulnerability
- D. Inspection criterion

**Answer: A**

Explanation:

An operational audit is a continuous and comprehensive review of all facets of the security operation. It evaluates whether security procedures are functioning as intended and whether resources are being used efficiently. This process identifies inefficiencies, policy violations, or procedural weaknesses over time.

References from PSP: ASIS POA - Security Operations Review; PSP Study Manual - Domain 3: Operations and Program Evaluation

### NEW QUESTION # 45

Which of the following is considered the cornerstone of any construction project?

- A. Guidelines
- B. Procedures
- **C. Specifications**
- D. Drawings

**Answer: C**

Explanation:

Comprehensive Detailed Explanation:

Specifications are considered the cornerstone of any construction project because they define the materials, workmanship, quality standards, and installation requirements. They ensure consistency, compliance with design intent, and are the foundation upon which contractors bid and work.

A (Drawings) show layout but don't specify materials or quality.

B (Guidelines) are general and not enforceable.

C (Procedures) guide execution but are not foundational to the build.

POA Manual - Specifications in Security System Construction

### NEW QUESTION # 46

What signal the entry of persons into a facility or an area while the system is in operation?

- **A. Intrusion alarms**
- B. Access door
- C. Protection alarms
- D. Invasions

**Answer: A**

Explanation:

Comprehensive Detailed Explanation and References

Intrusion alarms are systems specifically designed to detect unauthorized entry into a protected area while the system is active. These alarms respond when a perimeter is breached, such as through windows, doors, or motion detection. When triggered, they signal unauthorized access.

ASIS International, Protection of Assets (POA), Chapter: Intrusion Detection Systems ASIS PSP Study Guide, Domain 2: Physical Security Systems

#### NEW QUESTION # 47

A security manager performing a site survey using crime prevention through environmental design (CPTED) techniques would MOST likely recommend:

- A. Planting trees for boundary control
- B. Installing revolving doors for entry control
- C. Installing video cameras for increased surveillance
- D. Constructing a brick wall as a barrier

**Answer: C**

Explanation:

Although CPTED focuses heavily on natural surveillance, incorporating mechanical or electronic means such as video cameras enhances visibility and monitoring. Surveillance deters criminal behavior and increases the chance of detection.

B (Brick wall) may obstruct visibility.

C (Planting trees) could obscure lines of sight.

D (Revolving doors) relate more to access control than CPTED surveillance goals.

#### NEW QUESTION # 48

Security is a business unit and its function must:

- A. Be performed at the lowest cost
- B. Be directed by a certified manager
- C. Support the organization's mission
- D. Cycle on a quarterly basis

**Answer: C**

Explanation:

Security is not a standalone function; it must align with and support the broader mission and strategic goals of the organization. This includes protecting assets, enabling business continuity, and ensuring safety in a way that complements business objectives.

A (Quarterly cycle) is not a standard requirement.

B (Certified manager) is good practice but not a defining mandate.

D (Lowest cost) is not always ideal; effectiveness and alignment are more important than minimal cost.
