

VMware 2V0-16.25 Training Questions - New 2V0-16.25 Test Pass4sure

What's more, part of that itPass4sure 2V0-16.25 dumps now are free: <https://drive.google.com/open?id=1oXcjYZSUKahIg3-hF6UYlp9rgsI3S8dx>

With the excellent 2V0-16.25 exam braindumps, our company provides you the opportunity to materialize your ambitions with the excellent results. Using our 2V0-16.25 preparation questions will enable you to cover up the entire syllabus within as minimum as 20 to 30 hours only. And we can claim that, as long as you focus on the 2V0-16.25 training engine, you will pass for sure. And the benefit from our 2V0-16.25 learning guide is enormous for your career enhancement.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 2	<ul style="list-style-type: none">VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Topic 3	<ul style="list-style-type: none">Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

Topic 4	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 5	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

New 2V0-16.25 Test Pass4sure - 2V0-16.25 Reliable Braindumps Ebook

The VMware 2V0-16.25 test materials are mainly through three learning modes, Pdf, Online and software respectively. The 2V0-16.25 test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of VMware vSphere Foundation 9.0 Administrator 2V0-16.25 test prep more conveniently at the same time.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q53-Q58):

NEW QUESTION # 53

An administrator is tasked with enabling a Supervisor in a VMware vSphere Foundation (VVF) environment using vSphere networking and the Foundation Load Balancer. The vSAN-backed cluster has been configured with a vSphere Distributed Switch. Which two actions must the administrator perform when enabling a Supervisor using vSphere networking? (Choose two.)

- A. Configure a Tier-0 Gateway with BGP or static routing.
- B. Select a vSphere namespace template to define initial namespace limits.
- C. Enable the VM Service before deploying the Supervisor.
- **D. Provide a static IP address range for the Supervisor control plane VMs.**
- **E. Assign a vSphere Distributed Switch and a corresponding port group.**

Answer: D,E

Explanation:

When enabling a Supervisor Cluster in vSphere with Tanzu using vSphere networking and the Foundation Load Balancer:

- * You must provide a static IP range for the Supervisor control plane VMs so they can be deployed with dedicated addresses. (B)
- * You must assign a vSphere Distributed Switch (VDS) with an appropriate port group for Supervisor networking. (E) Other options:
- * A. Namespace template# Optional after Supervisor is enabled, not required at setup.
- * C. Tier-0 Gateway# Applies to NSX networking, not vSphere networking.
- * D. VM Service# Enabled after Supervisor, not a prerequisite.

VMware vSphere 9.0 - Enable a Supervisor Cluster with vSphere Networking VMware Docs: Supervisor Setup Networking Requirements

NEW QUESTION # 54

In VMware Cloud Foundation (VCF) Operations, which node type is responsible for providing fault tolerance for administrative functions within the VCF Operations cluster?

- **A. Replica Node**
- B. Data Node
- C. Primary Node
- D. Witness Node

Answer: A

Explanation:

In VCF Operations (vRealize Operations) cluster architecture:

- * The Primary Node handles administration and management.
- * The Replica Node provides fault tolerance for the Primary Node, ensuring that administrative functions remain available in case of failure.
- * Data Nodes handle data collection and analytics.
- * Witness Node # Not a role in VCF Operations; relevant to vSAN clusters.

Thus, the node type providing fault tolerance for administrative functions is the Replica Node.

NEW QUESTION # 55

An administrator needs to ensure that only specific users can manage the virtual machines (VM) in a specific VMware vCenter folder.

Which three steps are required to accomplish this? (Choose three.)

- **A. Create a new role in vCenter with VM management permissions.**
- B. Add the identity source to vCenter.
- C. Create a datastore cluster.
- **D. Assign the new role to the appropriate users/groups.**
- **E. Apply the role to the specific vCenter folder.**

Answer: A,D,E

Explanation:

To ensure that only specific users can manage VMs in a specific VMware vCenter folder, the following three steps are required:

* Create a new role in vCenter with VM management permissions (Answer B): You must define a custom role tailored to managing VMs, which includes permissions such as powering on/off VMs, editing VM settings, and accessing consoles. This role must include the appropriate privileges under the "Virtual machine" category in vCenter permissions.

* Apply the role to the specific vCenter folder (Answer C): The custom role needs to be applied directly to the target vCenter folder. This enables scope-based access control, where permissions are applied only to VMs within that folder.

* Assign the new role to the appropriate users/groups (Answer A): After creating the role and applying it to the folder, the role must be associated with the correct users or groups. This step uses the vCenter Server's identity source integration to assign roles.

Why the other options are incorrect:

* D. Add the identity source to vCenter: This is a prerequisite step for any role assignment but is not directly required in this specific scenario if the identity source is already configured.

* E. Create a datastore cluster: This is unrelated to managing VM access. Datastore clusters pertain to storage management and are not involved in user permissions or role assignments.

VMware vSphere 9.0 PDF, section on vCenter Server Permissions Management.

NEW QUESTION # 56

An administrator is informed that a digital certificate used by vSphere has been revoked by the issuing Certificate Authority (CA) before the scheduled expiration date. The administrator checks the Certificate Revocation List (CRL) in VMware Cloud Foundation (VCF) Operations but the CRL tab is not activated.

What must the administrator do to view the CRL?

- A. Set the Threshold For Adapters Certificate Expiration Alert to 6 under Global Settings.
- **B. Select the Activate Standard Certificate Validation under Global Settings.**
- C. Select the External Event Based Active Symptoms under Global Settings.
- D. The CRL tab is not available when VCF Operations is licensed under vSphere Foundation.

Answer: B

Explanation:

In VCF Operations, the Certificate Revocation List (CRL) tab is visible only when Standard Certificate Validation is activated in Global Settings.

* Once enabled, administrators can view the CRL tab and monitor revoked certificates.

Other options:

* A. External Event Based Active Symptoms# Related to alerting, not CRL.

* C. Threshold for Expiration Alert# Configures warnings, not CRL visibility.

* D. Not available under vSphere Foundation license# Incorrect; CRL is available if validation is enabled.

NEW QUESTION # 57

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- A. Distribution
- B. Text
- C. Table
- **D. Trend**

Answer: D

Explanation:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

* Trend view displays data over time, showing both past and predicted future behavior.

* This makes them ideal for capacity planning, performance forecasting, and demand analysis.

* Table (A)# Shows raw values but lacks predictive visualization.

* Distribution (B)# Useful for comparing values across objects but not for time-based or forecasted trends.

* Text (C)# Displays static values or metrics, not historical/forecasting data.

NEW QUESTION # 58

.....

If you can obtain the job qualification 2V0-16.25 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our 2V0-16.25 preparation exam really suits you best. Our 2V0-16.25 Study Materials can help you get your certification in the least time with the least efforts. With our 2V0-16.25 exam questions for 20 to 30 hours, and you will be ready to take the exam confidently.
