CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q37-Q42):

NEW QUESTION # 37

What are the four main database domains?

- A. Local, Global, User, VPN
- **B. System, User, Global, Log**
- C. System, Global, Log, Event
- D. System, User, Host, Network

Answer: B

Explanation:

The four main database domains are System, User, Global, and Log. Each domain contains different types of data and serves different purposes¹²³. The System domain contains the configuration data of the Security Management Server (SMS), such as the SMS name, IP address, licensing, and installed products. The User domain contains the configuration data of the security policy, such as the objects, rules, services, and VPN communities. The Global domain contains the configuration data of the global policy, such as the global objects, rules, and services. The Log domain contains the log data of the security events, such as the source, destination, action, and time of each event¹²³. Reference:
