

# Valid CMMC-CCA Test Preparation & New CMMC-CCA Test Cost

## CCA Exam Preparation Domains 1, 2, 3, 4, 5, & 6 Practice Test (VERIFIED ANSWERS) (UPDATED 2024)

1. A patient is admitted with spotting. She had been treated two weeks previously for a miscarriage with sepsis. The sepsis had resolved, and she is afebrile at this time. She is treated with an aspiration dilation and curettage and products of conception are found. Which of the following should be the principal diagnosis?

- a. Miscarriage
- b. Complications of spontaneous abortion with sepsis
- c. Sepsis
- d. Spontaneous abortion with sepsis
- a. Miscarriage**

2. If a patient has an excision of a malignant lesion of the skin, the CPT code is determined by the body area from which the excision occurs and which of the following?

- a. Length of the lesion as described in the pathology report
- b. Dimension of the specimen submitted as described in the pathology report
- c. Width times the length of the lesion as described in the operative report
- d. Diameter of the lesion as well as the most narrow margins required to adequately excise the lesion described in the operative report
- d. Diameter of the lesion as well as the most narrow margins required to adequately excise the lesion described in the operative report**

3. A patient is admitted to the hospital with shortness of breath and congestive heart failure. The patient subsequently develops respiratory failure. The patient undergoes intubation with ventilator management. Which of the following would be the correct sequencing and coding of this case?

- a. Congestive heart failure, respiratory failure, ventilator management
- b. Respiratory failure, intubation, ventilator management
- c. Respiratory failure, congestive heart failure, intubation, ventilator management
- d. Shortness of breath, congestive heart failure, respiratory failure, ventilator management
- a. Congestive heart failure, respiratory failure, ventilator management**

4. Which of the following is a standard terminology used to code medical procedures and services?

- a. CPT
- b. HCPCS

If you decide to buy our CMMC-CCA study questions, you can get the chance that you will pass your exam and get the certification successfully in a short time. we can claim that if you study with our CMMC-CCA exam questions for 20 to 30 hours, then you will be easy to pass the exam. In a word, if you want to achieve your dream and become the excellent people in the near future, please buy our CMMC-CCA Actual Exam, it will help you get all you want!

## Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.</li> </ul>

## 2026 Cyber AB CMMC-CCA: Certified CMMC Assessor (CCA) Exam Accurate Valid Test Preparation

As promising learners in this area, every exam candidates need to prove self-ability to working environment to get higher chance and opportunities for self-fulfillment. Our CMMC-CCA practice materials with excellent quality and attractive prices are your ideal choices which can represent all commodities in this field as exemplary roles. Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our CMMC-CCA practice materials, we are here to satisfy your wish with following details.

### Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

While completing the Level 2 Assessment, the Lead Assessor found that the OSC was deficient on a number of CMMC practices. Forty practices were scored as NOT MET, all on the Authorized Deficiency Corrections list. The OSC remediated 17 of those during closeout, leaving 23 practices still NOT MET. What should the Lead Assessor recommend?

- A. Pass the OSC but put the 23 remaining on a POA&M
- B. Recommend an interim certification and revisit the failed practices upon certification renewal
- C. Fail the OSC and require them to remediate and reapply for Level 2 certification
- D. Recommend an interim certification and put the 23 remaining practices on a POA&M

**Answer: C**

Explanation:

Under CMMC 2.0 Level 2, POA&Ms are permitted only for a limited subset of practices and only if the organization achieves at least 80% compliance, with no high-weight practices failed. With 23 practices NOT MET, the OSC falls below this threshold. Therefore, the Lead Assessor must recommend a Fail, requiring remediation and reassessment.

Exact extracts:

\* "For Level 2, OSCs must achieve a score of at least 80% and cannot fail any high-weighted practices."

\* "POA&Ms may be allowed for a small number of selected practices but must be closed within 180 days."

\* "If the OSC does not meet minimum requirements, the assessment result is Fail and the OSC must remediate before reapplying."

Why the other options are incorrect:

\* A: POA&Ms cannot cover such a large number of deficiencies.

\* C/D: Interim certification does not exist in CMMC 2.0.

References:

CMMC Assessment Guide - Level 2, POA&M policy.

DoD CMMC 2.0 Program guidance on minimum passing scores and fail conditions.

#### NEW QUESTION # 40

The Cyber AB has completed an investigation into a report submitted by a CCA regarding a potential violation by another CCA. They have determined that the violation falls within the scope of the relevant Industry Working Group's authority. What is the likely course of action for the Cyber AB in this scenario?

- A. Dismiss the investigation as it falls outside Cyber AB's direct authority.
- B. Continue the investigation and make a final determination on the violation.
- C. Immediately suspend the CCA's certification pending the working group's resolution.
- **D. Refer the incident to the relevant Industry Working Group for resolution, which may include remediation, coaching, or termination, with a right of appeal.**

**Answer: D**

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CoPC delegates certain violations to Industry Working Groups, with Cyber AB referring them for resolution. Option A (continuing) oversteps this delegation. Option C (suspension) is premature. Option D (dismissing) ignores process. Option B is correct.

Extract from Official Document (CoPC):

\* Paragraph 4.1(4)(a) - Violation Resolution (pg. 10): "Refer incidents to the relevant Industry Working Group for resolution, which may include remediation or termination, with a right of appeal." References:

CMMC Code of Professional Conduct, Paragraph 4.1(4)(a).

#### NEW QUESTION # 41

After completing a CMMC assessment, the OSC should hash all the evidence artifacts in accordance with the CMMC Artifact Hashing Tool User Guide. However, you have just realized that this requirement was not fulfilled, and the OSC Assessment Official cannot be reached to confirm it was done. To avoid any issues, you quickly complete this step and later inform the OSC Assessment Official. Which CoPC principle have you just violated by hashing the evidence artifacts in place of the OSC?

- A. Professionalism
- **B. Information Integrity**
- C. Confidentiality
- D. Objectivity

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Hashing evidence artifacts is the OSC's responsibility to ensure their integrity, not the Lead Assessor's. By performing this task, the Lead Assessor compromises the evidence package's integrity, violating the CoPC's Information Integrity principle. Option A (Professionalism) is not directly breached here. Option B (Confidentiality) is unrelated, as no disclosure occurred. Option C (Objectivity) is unaffected by this action.

Option D is the correct violation.

Extract from Official Document (CoPC):

\* Paragraph 3.4(2) - Information Integrity (pg. 7): "Ensure that actions taken do not compromise the integrity of evidence packages, which is the responsibility of the OSC." References:

CMMC Code of Professional Conduct, Paragraph 3.4(2).

#### NEW QUESTION # 42

Risks are inherent in any organization. As a CCA working within an Assessment Team, you are assessing an OSC's implementation of RA practices. When evaluating RA.L2-3.11.3[b], you want to determine whether vulnerabilities are remediated in accordance with risk assessments. What Assessment Object would you likely examine to make this determination?

- A. Security Assessment Report
- **B. Patch and vulnerability management records**

- C. Vulnerability scanning tools and associated configuration documentation
- D. Vulnerability scanning results

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

RA.L2-3.11.3[b] requires remediation aligned with risk assessments, per NIST SP 800-171A. Patch and vulnerability management records (Option A) document vulnerabilities, risk assessments, and remediation actions, making them the key Assessment Object. Option B (tools) and Option C (results) provide raw data, not remediation evidence. Option D (report) is broader and less specific. Option A is the correct answer.

Reference Extract:

\* NIST SP 800-171A, RA-3.11.3[b]: "Examine patch and vulnerability management records for remediation per risk assessments." Resources: <https://csrc.nist.gov/pubs/sp/800/171/a/final>

### NEW QUESTION # 43

You are assessing a contractor's implementation for CMMC practice MA.L2-3.7.4 - Media Inspection by examining their maintenance records. You realize the maintenance logs identify a repeating problem. A recently installed central server has been experiencing issues affecting the performance of the contractor's information systems. This is confirmed by your interview with the contractor's IT team. You requested to investigate the server, and the IT team agreed. On the server, there is a file named conf.zip that gets your attention. You decide to open the file in an isolated computer for further review. To your surprise, the file is a .exe used when testing the server for data exfiltration. How should this incident be handled?

- **A. In accordance with the incident response plan**
- B. By sandboxing the malicious code and continuing with business as usual
- C. By immediately reporting it to the FBI's Cyber Division
- D. Decommissioning the server and installing a new one

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

MA.L2-3.7.4 requires "inspecting media for malicious code prior to maintenance and handling incidents appropriately." The .exe suggests a security incident, and CMMC mandates following the incident response plan (IR.L2-3.6.1) for investigation and containment (C). Immediate FBI reporting (A) skips internal process, decommissioning (B) is premature, and sandboxing alone (D) ignores broader response needs.

Extract from Official CMMC Documentation:

\* CMMC Assessment Guide Level 2 (v2.0), MA.L2-3.7.4: "Handle malicious code per incident response plan."

\* NIST SP 800-171A, 3.7.4: "Follow IR procedures for identified incidents." Resources:
