ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q14-Q19):

NEW QUESTION # 14
Demand assessments are triggered as soon as the demand enters what state?

- A. Approved.
- B. Screening.
- C. Qualified.
- D. Submitted.

Answer: D

Explanation:
Explanation
According to the Completing Demand Assessments document, demand assessments are triggered as soon as the demand enters the Submitted state. The other options are not correct, as demand assessments are not triggered when the demand is Approved, Screening, or Qualified.

NEW QUESTION # 15
Which role should be assigned to a user so they can read and retrieve data from any table of the Release Management application to generate reports?

- A. Project manager
- B. Release user
- C. Release admin
- D. Business stakeholder

Answer: D

Explanation:
Explanation
According to the Product Documentation for ServiceNow, the business stakeholder role (rm_business_stakeholder) can read and retrieve data from any table of the Release Management application to generate reports. This role can also view the release dashboard, release calendar, and release roadmap. The other roles have different levels of access and permissions for the Release Management application. You can find more information about the roles and responsibilities for Release Management in the Product Documentation for ServiceNow.

NEW QUESTION # 16
The combination of the user and the assigned portfolio must be unique when adding a user to which registry?

- A. Application Registry.
- B. Stakeholder Registry.
- C. UX Page Registry.
- D. Event Registry.

Answer: B

Explanation:
According to the Stakeholder Registry document, the combination of the user and the assigned portfolio must be unique when adding a user to the stakeholder registry. The stakeholder registry is a table that stores information about the stakeholders of a portfolio. The other options are not correct, as they are not registries that require a unique combination of user and portfolio. The application registry is a table that stores information about the applications in the system. The event registry is a table that stores information about the events that trigger notifications. The UX page registry is a table that stores information about the UX pages that are available for portfolios.

NEW QUESTION # 17
Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. All roles.
- B. it_pps_admin.
- C. business_stakeholder.
- D. it_project_manager.

Answer: B

Explanation:
According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it_pps_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it_project_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 18
Which field must be populated to request a person with a specific role when creating a resource assignment?

- A. Resource
- B. Role
- C. Group
- D. Skill

Answer: B

NEW QUESTION # 19
......
