

Prepare Your Nokia 4A0-D01 Exam with Real Nokia 4A0-D01 Valid Braindumps Easily

Practice Exam Questions for: Nokia Data Center Fabric Fundamentals (exam number: 4A0-D01)

The following questions will test your knowledge and prepare you for the Nokia Data Center Fabric Fundamentals exam. Compare your responses with the Answer Key at the end of the document.

1. A static route is configured in two steps in Nokia SR Linux. Which of the following items CANNOT be configured in the static-routes container?
 - a. A blackhole option
 - b. An IPv4 destination prefix
 - c. A preference value
 - d. A next-hop-group
2. Which of the following about the leaf-spine topology (Clos network) is FALSE?
 - a. Every leaf router is connected to all spine routers.
 - b. Scaling can be achieved by adding an additional spine layer.
 - c. Layer 2 is typically used at the aggregation and access layers.
 - d. The leaf-spine topology uses ECMP to distribute traffic across duplicate links.
3. Which of the following is one of the recommendations for AS-number assignment in a leaf-spine network?
 - a. Assign the same AS number to all spine routers in a cluster
 - b. Assign public AS numbers to all leaf and spine routers
 - c. Assign a distinct AS number to all super spine routers
 - d. Assign the same AS number to all leaf routers
4. Which of the following is NOT a characteristic of Nokia's SR Linux?
 - a. YANG model defines the configuration and state information for each application.
 - b. Each individual Linux application uses a distinct IP-VRF.
 - c. Applications can be accessed through JSON RPCs.
 - d. Third-party defined applications can access the SR Linux applications.

P.S. Free & New 4A0-D01 dumps are available on Google Drive shared by Itcertkey: <https://drive.google.com/open?id=1u3AbJ67hBlz2M3snP0pY7mh1PToxQnWK>

All of these advantages, you can avail of after passing the 4A0-D01 exam. You must find the best resource to prepare for the Nokia 4A0-D01 test if you want to pass the Nokia 4A0-D01 Certification Exam. Without proper Nokia 4A0-D01 exam preparation, getting success in the Nokia 4A0-D01 exam is impossible.

Individuals who work with Nokia affiliations contribute the greater part of their energy working in their work spaces straightforwardly following accomplishing Nokia Data Center Fabric Fundamentals Exam certification. They don't get a lot of opportunity to spend on different exercises and regarding the Nokia 4A0-D01 Dumps, they need assistance to scrutinize accessible.

Your Partner in 4A0-D01 Exam Preparation with Free Demos and Updates

If you are preparing for the exam in order to get the related 4A0-D01 certification, here comes a piece of good news for you. The 4A0-D01 guide torrent is compiled by our company now has been praised as the secret weapon for candidates who want to pass the 4A0-D01 Exam as well as getting the related certification, so you are so lucky to click into this website where you can get your secret weapon. Our reputation for compiling the best 4A0-D01 training materials has created a sound base for our future business.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q26-

Q31):

NEW QUESTION # 26

Which of the following statements about resilient ECMP load balancing is TRUE?

- A. The hash value used to distribute traffic is calculated as a modulo function on specific fields of the packet header.
- B. A different hash seed is used on downstream routers to ensure that flows are randomly distributed across all eligible router interfaces.
- C. When one of the next-hops fail, only flows currently egressing to that next-hop are impacted.
- D. Hash buckets are used to ensure that flows egressing the same interface on one router use different egress interfaces on downstream routers.

Answer: C

Explanation:

In resilient ECMP load balancing, when a next-hop fails, only the flows that were using that specific next-hop are affected and need to be redistributed, minimizing disruption to other flows.

NEW QUESTION # 27

Which of the following statements about the YANG model used in Nokia's SR Linux is FALSE?

- A. The YANG model can be converted into other formats such as JSON or XML.
- B. The YANG model uses a tree structure with "leafs" as the branches and "containers" as the data components.
- C. All configuration and state information is defined as a YANG model.
- D. The YANG model provides a standardized way for applications to retrieve SR Linux configuration and state information.

Answer: B

Explanation:

In YANG models, "leafs" are the data nodes (not branches), and "containers" group related data nodes. The statement incorrectly reverses their roles by calling leafs branches and containers data components.

NEW QUESTION # 28

Which of the following is NOT one of the characteristics of Nokia's SR Linux?

- A. It uses a modular, state-driven architecture that gives applications efficient access to system information.
- B. It uses an unmodified Linux kernel that simplifies the use of third party applications.
- C. It uses mature and stable SNMP protocol to access the command line interface.
- D. It includes a NetOps development kit that supports the integration of third-party applications.

Answer: C

Explanation:

Nokia's SR Linux does not rely on the SNMP protocol for accessing the command line interface; instead, it uses modern, programmable interfaces aligned with its modular architecture.

NEW QUESTION # 29

Based on the exhibit output, what CLI command can be used to display the contents of "bgp-log" in Nokia's SR Linux?

```
--{ + candidate shared default }--[ system logging ]--
A:dc-leaf-1# info
:
:
file bgp-log {
    format "%TIMEGENERATED:::date-rfc3339% %HOSTNAME% %syslogfacility-text%|%syslogseverity-text:1:4:uppercase%
%SYSLOGTAG%MSG:::sp-if-no-1st-sp%MSG:::drop-last-1f%\\n"
    subsystem bgp {
    }
    subsystem netinst {
    }
}
```

- A. show system logging buffer bgp-log
- B. info system logging file bgp-log
- C. show system logging file bgp-log
- D. info system logging buffer bgp-log

Answer: C

Explanation:

The "bgp-log" is defined as a log file in the configuration, so the correct command to display its contents is show system logging file bgp-log.

NEW QUESTION # 30

Which of the following statements about Nokia's SR Linux logging is FALSE?

- A. Logging parameter configuration is translated into the /etc/rsyslog.conf file.
- B. SR Linux logs are handled using facility local6 of the native Linux syslog utility.
- C. SR Linux supports the use of filters to select log messages.
- D. SR Linux logs can be saved locally as an encrypted file.

Answer: D

Explanation:

Nokia SR Linux does not natively support saving logs locally as encrypted files. Logs are managed using standard Linux syslog facilities and can be filtered, but encryption of local log files is not a built-in feature.

NEW QUESTION # 31

.....

Hence, if you want to sharpen your skills, and get the Nokia Data Center Fabric Fundamentals Exam (4A0-D01) certification done within the target period, it is important to get the best Nokia Data Center Fabric Fundamentals Exam (4A0-D01) exam questions. You must try Itcertkey Nokia Data Center Fabric Fundamentals Exam (4A0-D01) practice exam that will help you get the Nokia 4A0-D01 certification.
