The passing score for the exam is 85%, which means the candidate needs to answer at least 68 questions correctly. PSM-I Exam Fee is \$150, and the retake fee is \$100. PSM-I exam can be taken online, and the candidate can schedule the exam at their convenience.

Scrum Professional Scrum Master I Sample Questions (Q182-Q187):

NEW QUESTION # 182

When is implementation of a Product Backlog item considered complete?

- A. When the item has no work remaining in order to be potentially released.
- B. When QA reports that the item passes all acceptance criteria.
- C. At the end of the Sprint.
- D. When all work in the Sprint Backlog related to the item is finished.

Answer: A

Explanation:

According to the Scrum Guide1, an Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, an Increment must be usable. Multiple Increments may be created within a Sprint. The sum of the Increments is presented at the Sprint Review thus supporting empiricism. However, an Increment may be delivered to stakeholders prior to the end of the Sprint. The Sprint Review should never be considered a gate to releasing value. Therefore, implementation of a Product Backlog item is considered complete when the item has no work remaining in order to be potentially released.

NEW QUESTION # 183

Which of the following is an example of an Increment? (Choose the best answer.)

- A. A product roll-out plan.
- B. A mock-up of the product marketing materials.
- C. A plan for the overall product release.
- D. A design for the product.
- E. A valuable, useful set of products featured.
- F. All of the above.

Answer: E

Explanation:

An example of an Increment is a valuable, useful set of product features, as stated in [4]: "An Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, each Increment must be usable."

NEW QUESTION # 184

For which of the following is the Scrum Master responsible?
(choose the best answer)

- A. Managing the performance of the Scrum Team.
- B. Keeping track of resource allocation.
- C. Properly adopting and using the Scrum framework.
- D. The meetings and the objectives that a Scrum Team sets for itself.

Answer: C

Explanation:

According to the Scrum Guide, the Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide¹. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values¹. The Scrum Master is accountable for establishing Scrum². They do this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization while serving the Scrum Team as well as the larger organization².

Option B is incorrect because keeping track of resource allocation is not a responsibility of the Scrum Master. The Scrum Master does not manage or control the resources of the Scrum Team or the organization. The Scrum Team is self-organizing and responsible for managing its own work within a Sprint¹.

Option C is incorrect because managing the performance of the Scrum Team is not a responsibility of the Scrum Master. The Scrum Master does not evaluate or appraise the performance of the Development Team or the Product Owner. The Scrum Master serves the Development Team by coaching them on self-organization and cross-functionality, and serves the Product Owner by ensuring that goals, scope, and product domain are understood by everyone on the Scrum Team¹.

Option D is incorrect because the meetings and the objectives that a Scrum Team sets for itself are not a responsibility of the Scrum Master. The Scrum Master does not dictate or prescribe what meetings or objectives a Scrum Team should have. The Scrum Master facilitates the Scrum Events as requested or needed, and ensures that they are positive, productive, and kept within the time-box¹.

NEW QUESTION # 185

Who creates the Definition of Done?

(choose the best answer)

- A. The Scrum Master
- **B. The scrum Team**
- C. The Developers
- D. The Product Owner

Answer: B

Explanation:

The correct answer is C. The Scrum Team creates the Definition of Done. According to the Scrum Guide¹, "The Developers are required to conform to the Definition of Done, which is defined and evolves with the Scrum Team." The Definition of Done is a commitment by the Developers for the Increment, but it is also a shared understanding within the whole Scrum Team, including the Product Owner and the Scrum Master². The Scrum Team collaborates to create and update the Definition of Done as needed, based on the product and organizational standards³. The Definition of Done is not imposed by any external authority or individual.

NEW QUESTION # 186

For which is the Scrum Master responsible?

- A. Managing the performance of the Scrum Team.
- B. Keeping track of resource allocation.
- C. The meetings and the objectives that a Scrum Team sets for itself.
- **D. The Scrum framework being adopted and used properly.**

Answer: D

Explanation:

According to the Scrum Guide¹, the Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. They do this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization.
