10年以上のビジネス経験により、当社のPlat-Dev-210テストトレントは、顧客の購入体験を非常に重要視していました。電子製品の購入速度を心配する必要はありません。弊社では、Plat-Dev-210試験準備の信頼性を長期間にわたって評価および評価し、保証された購入スキームを提案するために尽力しています。

Salesforce Plat-Dev-210 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">• Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
トピック 2	<ul style="list-style-type: none">• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
トピック 3	<ul style="list-style-type: none">• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
トピック 4	<ul style="list-style-type: none">• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.

試験の準備方法-更新するPlat-Dev-210関連日本語内容試験-正確的なPlat-Dev-210復習過去問

IT認定試験を受ける受験生はほとんど仕事をしている人です。試験に受かるために大量の時間とトレーニング

費用を費やした受験生がたくさんいます。ここで我々は良い学習資料のウェブサイトをお勧めします。MogiExamというサイトです。MogiExamのSalesforceのPlat-Dev-210試験資料を利用したら、時間を節約することができますようになります。我々はあなたに向けて適当の資料を選びます。しかも、サイトでテストデータの一部は無料です。もっと重要なことは、リアルな模擬練習はあなたがSalesforceのPlat-Dev-210試験に受かることに大きな助けになります。MogiExamのSalesforceのPlat-Dev-210試験資料はあなたに時間を節約させることができるだけでなく、あなたに首尾よく試験に合格させることもできますから、MogiExamを選ばない理由はないです。

Salesforce Certified Omnistudio Developer 認定 Plat-Dev-210 試験問題 (Q14-Q19):

質問 # 14

A developer builds a new OmniScript. It contains a Set Values element with a ContextId key/value pair that was used during testing. What should the developer do before moving the OmniScript to a production org?

- **A. Delete or Deactivate the Set Values element.**
- B. Update the ContextId value to specify an id from the Production org.
- C. Add a Show/Hide condition on the Set Values element.
- D. Deactivate the contextId key/value pair

正解: A

解説:

The Set Values element with a ContextId key/value pair was used for testing purposes and is not needed for production. The developer should delete or deactivate the Set Values element before moving the OmniScript to a production org.

質問 # 15

Refer to the exhibit.

A developer has configured an integration Procedure element with SEND/RESPONSETRANSFORMATIONS as shown. Alternatively, how could the developer configure Additional input to send exactly the same data? Assume that the developer checked Send Only Additional input.

- **A.**
- B.
- C.

正解: A

解説:

Option C is the correct way to configure Additional input to send exactly the same data as Input Data. The Additional input should have a key/value pair for each field in Input Data, and the value should be set to `{{InputData.field}}` for each field. This will pass the value of Input Data for each field to Additional input.

質問 # 16

A developer needs to limit the of a DataRaptorExtract to a maximum of one result. How should the developer configure this?

- A. Set the Limit Property on the Action that calls the DataRaptor Extract.
- B. Define a formula with the Filter function
- C. Use a Custom Output Type when creating the DataRaptor
- **D. Use the LIMIT filter on the Extract definition**

正解: D

解説:

Using the LIMIT filter on the Extract definition allows the developer to specify the maximum number of results to return from the DataRaptor Extract. Defining a formula with the Filter function is used to filter the results based on a condition. Using a Custom Output Type when creating the DataRaptor is used to define the structure of the output data. Setting the Limit Property on the Action that calls the DataRaptor Extract has no effect on limiting the results.

質問 # 17

A developer writes an OmniScript that includes a DataRaptor that updates the Account status based on information provided from the OmniScript. The information must be updated only if the Account record already exists. Otherwise, a new account must be created.

How should the developer accomplish this task?

- A. Populate the Lookup Object and Lookup Fields
- B. Check Overwrite Target for All Null Inputs checkbox on the Account Id field
- C. Check the Upsert Key checkbox on the Account Status field
- **D. Check the Upsert Key and Is Required for Upsert checkboxes on the Account Id field**

正解: D

解説:

The Upsert Key checkbox indicates that the field is used as a key for upserting records. The Is Required for Upsert checkbox indicates that the field is mandatory for upserting records. The developer needs to check both checkboxes on the Account Id field to update the Account status only if the Account record already exists. Otherwise, a new account will be created.

質問 # 18

Which calculation procedure version in the list would execute on 2/15/2020 at 12:00 PM?

- A. Version Number 3
- B. Version Number 2
- **C. Version Number 4**
- D. Version Number 1

正解: C

解説:

the calculation procedure version that would execute on 2/15/2020 at 12:00 PM is the one that has the start date time and end date time that include that date and time, and also has the highest priority among the enabled versions. In this case, only version number 4 meets these criteria, as it has a start date time of 2/1

/2020 12:00 AM, an end date time of 4/1/2020 12:00 AM, a priority of 1, and is enabled. The other versions either have a different start or end date time, a lower priority, or are not enabled.

質問 # 19
