Real CloudSec-Pro Exam, CloudSec-Pro Training Solutions

The TestPassed is a leading and reliable platform that has been offering real, valid, and updated Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam practice test questions for many years. Over this long time period thousands of candidates have passed their dream Palo Alto Networks Cloud Security Professional (CloudSec-Pro) certification exam. And the one thing has come in their success that was the usage of top-notch CloudSec-Pro Exam Practice test questions. So you can also get help from TestPassed practice test questions and make the Palo Alto Networks CloudSec-Pro exam preparation simple, smart and quick.

As is known to us, different people different understanding of learning, and also use different methods in different periods, and different learning activities suit different people, at different times of the day. Our CloudSec-Pro test questions are carefully designed by a lot of experts and professors in order to meet the needs of all customers. We can promise that our CloudSec-Pro exam question will be suitable for all people, including student, housewife, and worker and so on. No matter who you are, you must find that our CloudSec-Pro Guide Torrent will help you a lot. If you choice our product and take it seriously consideration, we can make sure it will be very suitable for you to help you pass your exam and get the CloudSec-Pro certification successfully. You will find Our CloudSec-Pro guide torrent is the best choice for you.

Effective Real CloudSec-Pro Exam & Leader in Qualification Exams & Top CloudSec-Pro: Palo Alto Networks Cloud Security Professional

Like the Web-based Palo Alto Networks Cloud Security Professional practice exam, the Desktop CloudSec-Pro practice test software of TestPassed provides its valuable customers with CloudSec-Pro test questions which are very similar to the actual Palo Alto Networks Cloud Security Professional exam questions. There is no hustle. The Palo Alto Networks Cloud Security

Professional CloudSec-Pro Practice Test material is updated and created after feedback from more than 90,000 professionals around the globe. A free demo of any Palo Alto Networks Cloud Security Professional exam dumps format will be provided by TestPassed to the one who wants to assess before purchasing.

Palo Alto Networks Cloud Security Professional Sample Questions (Q257-Q262):

NEW QUESTION # 257
A customer is reviewing Container audits, and an audit has identified a cryptominer attack. Which three options could have generated this audit? (Choose three.)

- A. The mined currency is associated with a user token.
- B. Common cryptominer process name was found.
- C. The value of the mined currency exceeds $100.
- D. High CPU usage over time for the container is detected.
- E. Common cryptominer port usage was found.

Answer: B,D,E

Explanation:
In the case of identifying a cryptominer attack through container audits, the options that could have generated this audit include B. High CPU usage over time for the container is detected, which is a common indicator of cryptomining activity as it consumes significant computational resources, C. Common cryptominer process name was found, which directly indicates the presence of cryptomining based on known malicious processes, and E. Common cryptominer port usage was found, suggesting cryptomining activity based on network behavior typical of such attacks.

NEW QUESTION # 258
A customer has multiple violations in the environment including:
User namespace is enabled
An LDAP server is enabled
SSH root is enabled
Which section of Console should the administrator use to review these findings?

- A. Vulnerabilities
- B. Radar
- C. Manage
- D. Compliance

Answer: D

Explanation:
The correct section of the Console that the administrator should use to review findings such as "User namespace is enabled", "An LDAP server is enabled", and "SSH root is enabled" is "Compliance".
The "Compliance" section in CSPM tools like Prisma Cloud provides an overview of the current compliance posture against various regulatory standards and best practices. It can help identify configurations that do not adhere to best practices or that may violate compliance requirements, such as enabling the user namespace, which could be a security risk, or having an LDAP server and SSH root enabled, which may not comply with certain security standards.
Reference to the use of the "Compliance" section can be found in CSPM documentation, where it details how compliance checks are used to assess the security and configuration of cloud resources against established benchmarks and standards, allowing organizations to maintain compliance and improve their security posture.

NEW QUESTION # 259
Which two roles have access to view the Prisma Cloud policies? (Choose two.)

- A. Defender Manager
- B. Auditor
- C. Build AND Deploy Security
- D. Dev SecOps

Answer: B,D

Explanation:
In Prisma Cloud, roles with access to view policies include Auditor and Dev SecOps. The Auditor role is typically focused on compliance and oversight, allowing users to review configurations, policies, and compliance status without making changes. The Dev SecOps role bridges the gap between development, security, and operations, focusing on integrating security practices within the CI/CD pipeline. Both roles require access to Prisma Cloud policies to perform their functions effectively, ensuring that security and compliance are maintained throughout the cloud environment and application lifecycle.

NEW QUESTION # 260

An administrator for Prisma Cloud needs to obtain a graphical view to monitor all connections, including connections across hosts and connections to any configured network objects.
Which setting does the administrator enable or configure to accomplish this task?

- A. Cloud Native Network Firewall
- B. ADEM
- C. Host Insight
- D. Telemetry
- E. WAAS Analytics

Answer: A

Explanation:
Reference: https://docs.paloaltonetworks.com/prisma/prisma-cloud/21-04/prisma-cloud-compute-edition-admin/firewalls/cnnf_self_hosted.html To obtain a graphical view to monitor all connections, including those across hosts and to configured network objects within Prisma Cloud, the appropriate feature to enable or configure is the Cloud Native Network Firewall (Option D). Prisma Cloud's Cloud Native Network Firewall provides visibility into network traffic and allows for the monitoring and control of network flows within the cloud environment, effectively enabling administrators to visualize and secure inter-host communications and connections to network objects. ADEM (Option A) and WAAS Analytics (Option B) are not related to Prisma Cloud's capabilities for monitoring connections. Telemetry (Option C) involves the collection of data and metrics but does not specifically provide a graphical view of connections. Host Insight (Option E) focuses on providing visibility into host-related activities and vulnerabilities but does not specifically deal with monitoring network connections in the graphical manner described.

NEW QUESTION # 261

Which two IDE plugins are supported by Prisma Cloud as part of its DevOps Security? (Choose two.)

- A. CircleCI
- B. BitBucket
- C. Visual Studio Code
- D. IntelliJ

Answer: C,D

Explanation:
Prisma Cloud supports integration with various Integrated Development Environments (IDEs) as part of its DevOps Security offerings, including Visual Studio Code (Option B) and IntelliJ (Option D). These integrations allow developers to scan their Infrastructure as Code (IaC) templates and application code for vulnerabilities and compliance issues directly within their preferred development environments, promoting a
"shift left" security approach. BitBucket (Option A) and CircleCI (Option C) are more commonly associated with Continuous Integration/Continuous Deployment (CI/CD) pipelines rather than being IDEs.

NEW QUESTION # 262

......

Our CloudSec-Pro exam questions are so popular among the candidates not only because that the qulity of the CloudSec-Pro study braidumps is the best in the market. But also because that our after-sales service can be the most attractive project in our CloudSec-Pro Preparation questions. We have free online service which means that if you have any trouble, we can provide help for you

remotely in the shortest time. And we will give you the best advices on the CloudSec-Pro practice engine.
