350-601 Reliable Exam Pattern, 350-601 Reliable Test Dumps

The Cisco 350-601 questions certificates are the most sought-after qualifications for those looking to further their careers in the business. To get the Cisco 350-601 exam questions credential, candidates must pass the Cisco 350-601 exam. But what should you do if you want to pass the Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) exam questions the first time? Fortunately, Actual4dump provides its users with the most recent and accurate Cisco 350-601 Questions to assist them in preparing for their real 350-601 exam. Our Cisco 350-601 exam dumps and answers have been verified by Cisco certified professionals in the area.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q52-Q57):

NEW QUESTION # 52

An engineer is implementing OTV on a transport that supports multicast. The solution needs to meet the following requirements:

- Establish adjacency to the remote peer by using multicast.
- Enable OTV advertisements for VLAN 100 to the other site.

Which two commands should be configured to meet these requirements? (Choose two.)

- A. otv site-vlan 100
- B. otv control-group 232.1.1.1
- C. otv data-group 232.2.2.0/28
- D. otv extend-vlan 100
- E. otv use-adjacency-server 172.27.255.94

Answer: B,D

Explanation:

The otv data-group command is used to pass the data multicast traffic if there's any. While otv control-group is used to form an adjacency with other TEPs. otv extend <vlan> command is used to enable OTV advertisements for this vlan.

NEW QUESTION # 53

Drag and Drop Question

Refer to the exhibit. Server 1-must establish an FCoE connection with SW1. Drag and drop the code snippets from the right onto the boxes in the code to complete the FCoE configuration of SW1. Not all code snippets are used.

□

Answer:

Explanation:

□

NEW QUESTION # 54

A network engineer is adding a Cisco HyperFlex data platform to the Cisco intersight management portal.

Which two components are required for Intersight to claim the Cisco HyperFlex data platform? (Choose two.)

- A. device FQDN
- **B. device claim code**
- C. device public IP address
- **D. device ID**
- E. device serial number

Answer: B,D

NEW QUESTION # 55

A server engineer wants to control power usage on a Cisco UCS C-Series rack server down to the component level.

Which two components support specific power limits? (Choose two.)

- A. network controller
- B. memory
- **C. processor**
- D. storage controller
- **E. graphic card**

Answer: C,E

Explanation:

The two components that support specific power limits on a Cisco UCS C-Series rack server are the processor and the graphic card. The processor and the graphic card are the two components that consume the most power on a server, and they can be configured to have specific power limits to control the power usage and performance of the server. The power limits can be set using the Cisco Integrated Management Controller (CIMC) web interface or CLI, or using the Cisco UCS Manager if the server is integrated with a Cisco UCS domain. The power limits can be applied to individual processors or graphic cards, or to the entire server. The power limits can help to optimize the power efficiency and thermal management of the server, as well as to prevent power capping or throttling issues. References :=

NEW QUESTION # 56

A network administrator must perform a system upgrade on a Cisco MDS 9000 Series Switch.

Due to the recent changes by the security team:

- The AAA server is unreachable.
- All TCP communication between the MDS 9000 Series Switch and AAA servers is disabled.

Which actions must be used to perform the upgrade?

- A. Log in locally to the MDS 9000 Series Switch using a server-admin role and download the upgrade files from the remote FTP server.
- B. Log in to a server storing the upgrade files remotely using a network-admin role and download the files to the MDS 9000 Series Switch using HTTP.
- C. Log in locally to the MDS 9000 Series Switch using a network-admin role and download the upgrade files from the remote TFTP server.
- D. Log in to a server storing the upgrade files remotely using a server-admin role and download the files to the MDS 9000 Series Switch using SFTP.

Answer: C

Explanation:

Of all the answer choices, only TFTP does not use TCP. TFTP is a UDP based protocol.

NEW QUESTION # 57

.....

People around you are improving their competitiveness in various ways. Haven't you started to move? You must be more efficient than others before you can do more and get more pay! Our 350-601 study materials will tell you that in a limited time, you can really do a lot of things. Of course, the quality of our 350-601 Exam Questions is also very high. As you can say that with the help of our 350-601 practice guide, the pass rate for our loyal customers is high as 98% to 100%. It is unique in the market.
